2015 IHMSA World Championships

By Dan Hagerty

First, We will be holding a 500 Meter Silhouette Match on July 7-8 2015 at Avenal Gun Club, Avenal, CA. Before the start of the World championships. For The Brave souls, We will be setting up 1 bank of ½ size targets for whoever is willing to shoot 500 Meter Half Scale! This will be a match where you will set your own targets But There is 5 banks, so we should be good to go. The Range is located about 150 Miles north of LASC just off I-5 freeway. For Information concerning this match or directions, You Can Email Eric King at therose7@earthlink.net Or contact me (your news editor) as I am also a member of this club.

For LASC, The range has Limited camping area and limited hookup for Trailers. attached is some suggested Hotels also, and if you contact Jerry Ray at jrray@pacbell.net, He should be able to provide details of other hotels and Motels in the Area.

For you that might have to do some reloading during the championships, LASC used to have a reloading setup at the Range, but this has not been confirmed if it is still available. But, I personally will have my reloading setup available for your use. Just bring your bullets, powder and primers and we can get you set up.

And last, Be ready to have some Fun! Not just at the championships, but the local area offers plenty of entertainment.

I hope to see you at LASC in July!

Notes from the Editor:

First, Congratulations to Steve Martens for winning the nomination for IHMSA President. Steve will take over as president after the 2015 World championships on July 17th. Nancy LaCroix Has done a Great Job over the Years as President and I personally have to congratulate her as she was a great help when I took over as the News editor.

Second, WE STILL NEED A Secretary/treasurer! Somebody, could you please volunteer to take over this important position!

Also, a mass mailing was sent out to All Life members that I did not have a preference for receiving the IHMSA news. These have started to trickle back to me and I will get them set up. Just remember that if you want a Printed copy of the IHMSA news, it will be an additional \$20.00 per year to get the printed copy. At present, I have about half the membership's preference done. This list will take the whole year to get finalized depending on when you renew your membership.

My first attempt at sending the IHMSA news directly via email has failed. Too many email servers still have the 5MB size limitation on them and the IHMSA news is much larger than that. This issue is over 10MB in size itself. I will instead be sending an email that will have a link to the IHMSA website where you could read the issue on the site or download the News. The 2015 Match schedule is also available for download at the IHMSA website.

And Now, Please send me some articles for Printing! If you have something that you would find useful to the membership, please send me an article and I will print it. Also, since I took over as News editor, I have not received any Letters to the editor. If you have something to say send me something and I will print it (as long as it does not have foul language). One thing I would like to see come back is a Cast bullet section. If anybody is willing to start this, let me know and we can bring this back.

For anybody who will be at the West coast championships in Grants Pass, Oregon or at the world championships, I will have available back issues of the IHMSA news or I can print it out. I can print out as far back as May 2014. Any issues before this date, I would have to get from the Old printing company.

And Last, This is from me Personally, **I Appreciate the dedication and support of the executive committee, board of directors, regional directors, state directors, match directors and All volunteers that help out anywhere it is needed. It is your dedication that will help us Grow IHMSA back to the fastest growing handgun sport. And Also, I must Applaud Cindy Smith as taking the job of IHMSA headquarters. This is the one position that keeps IHMSA alive. And last, to all Target setters, Thanks as you make our shooting competition enjoyable.**

Hotels for Pasadena, CA – IHMSA Internationals

These rates are for the dates of arrival 7-10-15 and departing 7-18-15.

Note: These are the dates I gave to the hotels to hold the rates for our group so when you call make sure to state that you are with the IHMSA Group

President's Column

Presidents Report - May 2015

Well the good thing is that summer has arrived in Minnesota and our matches have started. Remember that the Internationals, that will be held in California at the LASC Gun Range is not far away. So get in your registrations as soon as you can, it really helps to get them in and not all at the range that week for those who have to process all the schedules.

The results of the voting for your new president of IHMSA are now over. Steve Martens is your new president and he will take over at the end of this year's International match. Please congratulate Steve, and give him your support in this endeavor.

California Here We Come! Until next time shoot often and safely!

THE NEW SILHOUETTER

Use What you Have Hornady Lock-N-Load Quick Change Hand Tool By Ken Horowitz

We will never know who really started silhouette shooting as a sport. Sure, we know who organized it under particular rules as we have IHMSA today, but the origins of shooting at real tethered animals in the Southwest, particularly in Mexico, will forever remain a mystery. Much as we can identify who started modern organized baseball, we will never know any name of the first person who whacked a rounded object (probably not a ball as we know it today) with a stick in the form of a game. It may even have been a warlike pastime, much as I speculate golf got started. I can just picture an ancient Scottish general commanding "Bring up the golfers," thereupon unleashing a hail of rocks falling on the enemy driven by crude clubs. It would certainly have been cheaper than arrows and probably just as effective.

Legend and fact pretty well merge regarding *hidalgo* sponsored shoots on ranchos that could have straddled both sides of the border. Prior to the establishment of fixed borders, the Rio Grande was merely an inconvenience for both Mexican and United States residents. (Some would argue that it remains so today, but that's another story for another time in another publication.) Even today, there are towns north of the Rio Grande dominated by US citizens whose first language is Spanish while there are towns below the river where English comes first.

For normal outdoor family activities, the mansion-like homes on these ranchos typically had inside courtyards, insulating family and guests from unwanted intrusion by outsiders. I have seen several of these style buildings, both original and modern replications, in trips to the Southwest and trips to Mexico. (At one time I worked for a company where we had business south of the border that required me to go there on several occasions. Between business meetings, I tried to see as much as I could.) However, for entertainment of larger crowds, and the sport shooting of animals that preceded the feeding of a large crowd, the activities would have to be moved outside the house, similar to the way big parties were handled in the front or back of large Southern plantation homes prior to our Civil War.

Since animals for the bash had to be slaughtered anyway, adding some sport to it seemed harmless enough. I doubt that anyone at the time envisioned a sanitized future event where steel plate was substituted for flesh and blood or that any formalized rules would be developed. Also, such gala events were not limited to just four types of animals and I'm sure many others joined the then real chickens, pigs, turkeys and rams (I'm guessing that the "ram" was more likely a goat).

One thing we can state for sure without having been there. The guns would have been a

"bring what you've got" affair with no specialty silhouette outfits and no special cartridges. To be sure, some firearms would have been much more accurate than others and the well heeled *hidalgos* most likely had the most upscale and possibly ornate arms. The true root of our sport did not have restrictive classifications and there were no restrictions on caliber, barrel size, weight or anything else. Participants shot what they had which were the usual types of firearms extant at the time(s).

Which brings us to what I would hope to be the more popular portions of our current sport; unfortunately, that is not the case. If I can peg a timeframe for development and popularization of our modern incarnation of silhouetting, it would straddle the 1970s, although valid claims can be made for somewhat earlier. My two favorite Big Bore specialty cartridges date from development starting in the 1960s (7MM BR Remington) and as late as 1980 (7mm TCU). This twenty some odd years is when we made a giant push to change the focus from Field Pistol guns and ammunition to the more specialized silhouette Big Bore rigs and specialty cartridges.

Unfortunately, what was once the cause of impetus to our game is now an obstacle to entry. Our tools of trade are but a miniscule part of the vast number of firearms owned by people and we have pushed our sport away from those who represent the greatest possible source of new shooters. While we might appease ourselves by saying we always have classifications for those shooters, their perception of the requirement of hardware to compete psychologically knocks them out of the game before they even start.

Really, I love 10" and 15" barrels and long eye relief scopes and specialty cartridges and watching steel fall out at 200 yards is a hoot, no matter how many times it happens. But our emphasis needs to be on people who don't have such rigs and may not even possess the ideal Field Pistol firearm. Even though we can say to someone to bring whatever they have, a novice shooter with a 4" barreled 38 Special may feel a bit intimidated shooting next to someone with a 10" barreled gun chambered in 22 Hornet. While you know and I know that each shooter should only be shooting against his or her own scores, we then publish everyone's and really give an edge to the equipment race. While I know that is not our intention to do so, that's the way it is and I've talked myself blue trying to convince shooters that I meet in other disciplines to give IHMSA a try. While it works some times, most of the time my pitch falls on deaf ears.

So what should we do? Realistically, we are not going to ban specialty rigs on the firing line, nor I am inclined to so volunteer myself. However, more of us should walk the walk and talk the talk and bring plain vanilla firearms for at least one entry at each match. Sure, we may not win as much as we used to do but it may engender our sport to more people if they see what we are doing and join us.

How much sacrifice does it entail in terms of accuracy and falling steel? That ranges from a whole lot to not much. For the whole lot, I think of guns that I own that are not accu-

rate by such a long shot it would be a waste of time. For some it may be that snubby that can't hit anything. Luckily, I don't own any of those so-called belly guns. Sometimes, guns with even longer barrels are just dogs when it comes to hitting anything. While I think very highly of Ruger in general, I happen to have a 4" barreled Blackhawk that is perhaps the most inaccurate handgun I possess. I do use it occasionally for Field Pistol and my scores show it. But it's still fun to shoot.

On the other hand, I have a 4" barreled S&W Model 586 which is certainly Field Pistol accurate but I have never used it for that purpose. It's time to get it into action. While I will get "looks" of questionable sanity using such a handicapped firearm compared with what fellow shooters know I own, it will be worthwhile and I know that so many more shooters have 4" 357s or 38 Specials.

The performance penalty of a 4" barreled 38 Special or 357 Magnum is not in the chambering or the barrel length. Both cartridges are more than flat enough for 100 yard trajectories and there are lots of accurate factory and hand loads for either cartridge. Further, 4" of barrel has more than sufficient rifling to stabilize the bullet.

The biggest culprit is sight radius. An error of 1/32" over a 10" span converts to approximately 2-3/4" at 25 yards, 5-1/2" at 50 yards, 8-2/5" at 75 yards and 11" at 100 yards. All those errors would double if the sight radius were cut in half. Keep in mind that the rear sight of a revolver is usually behind the cylinder while the front sight is behind the muzzle. Depending on make and model, the sight radius may be 5", usually a bit more, maybe a bit less. To hit within a 4" radius at 100 yards using a sight radius of 5" would require no greater an error at the gun end than about 1/175".

That miniscule allowed sight error brings us to the biggest culprit, shooter error. There is just so much more tolerance in a longer sight radius. There is virtually no tolerance in 4" barreled guns. I am not ashamed to admit that this presents a real problem for my skill level. Nevertheless, I am going to try it. My only request is to keep the laughing internal, no loud outbursts allowed.

Bullseye competitors would seem to be a great recruiting source for Field Pistol. Their outdoor shoots at 50 yards are on a NRA B6 target, with a bullseye diameter of 8 inches. While the shape of our targets varies, the widths are consistent with the bullseye dimension. The heights are shorter, but reasonably within what a good bullseye shooter can hit. After all, the better shooters don't shoot 8" groups; they are much tighter than that.

Years ago I watched a video of a USAMU shooter who took a service Beretta M9 out of the box, sighted it in with just a few shots and then fired a score of 95 on 10 shots at 50 yards, commenting that the score was just okay. That's more than sufficient to convince me of the capability of plain vanilla firearms to hit our Field Pistol silhouette targets. Obviously, it's more up to the shooter than to the gun. Further, the 9mm Luger round has more than enough energy to topple the steel animals.

IHMSA Bulletin Board

Installment Plan Life Memberships

The Installment Plan for Life Membership allows you to purchase a Life Membership by making four monthly payments of \$105.00 each (a total of \$420.00), or in the case of a spouse two \$50.00 each (a total of \$100.00). When your last payment is received, Headquarters will send your Life membership card, certificate, and pin.

If you're in the middle of your membership year, you can purchase a Life Membership now and apply the unused portion of your current membership. Call IHMSA Headquarters at (801) 733-8423 to find out how much credit you'll received for your current membership.

Life Membership is a great way to enjoy IHMSA for years without the hassle of paying yearly dues and show your support of IHMSA at the same time . . . order yours today!!!

2014 Rule Books

Dear IHMSA Members,

In an effort to keep costs down and with the only changes being the addition of the Practical Hunter category, Headquarters has been directed to not print the IHMSA Rule Book for 2014, but to send an addendum with these changes instead.

We understand that it is important for the membership to have access to the rules. Therefore, since the 2014 rule book is available on our website (go to ihmsa.org, then click on the RULES link). Headquarters is being directed to only send rule books with New Memberships and upon request for replacement. If you need a rule book, please contact headquarters.

Thank you for your patience and understanding in this matter.

Nancy LaCroix
IHMSA President

~NOTICE~

Please keep your 2013 rulebook for the 2014 season. You will receive an addendum with your membership renewal

Rules Addendum: Practical Hunter

Class Description: All 3 classes are to be shot from any SAFE freestyle position including prone, kneeling, sitting, or standing.

The Practical Hunter Long Course will be shot on the 200 meter Big Bore range with the standard full size targets at their normal ranges.

The Practical Hunter Short Course will be shot on the 100 meter Field Pistol range with the standard targets at their normal ranges, using standard field pistol cartridges only.

The Practical Hunter .22LR Course will be shot on the 100 yard SB range with the standard Small Bore targets at their normal ranges.

Class Rules:

- Any hunting style handgun with

a maximum overall length of 21 inches.

- Optics are allowed up to a maximum of 6x power.
- Gun must be as manufactured with only cosmetic modifications.
- Ported barrels are allowed as long as they are shot from a safe position.
- A rest such as a bipod or a sand-bag supporting the barrel in a prone position may be used by a new unclassified shooter and by shooters in classes A and AA.

Classification Scores:

- A 0-15
- AA 16-25
- AAA 26-38
- INT 39-40

NOTICE

The IHMSA Board of Directors have voted to allow the printing of NRA match results in the *IHMSA News*, providing they are submitted by a club that is running dual (IHMSA/NRA) sanctioned events.

These results must be submitted by the established deadline presented in the previous edition of the *IHMSA News*, with the Dual Sanction Match Write-up and will be listed at the end of the IHMSA related report. No NRA reports will be printed without IHMSA reports/scores accompanying them. **Please send all Match Reports to IHMSA, Inc., P.O. Box 22356, Cheyenne, WY. 82003 Phone - 801-733-8423, FAX: 801-733-8424**

SANCTION FEE NOTICE

Please make every attempt to send in your Sanction Fees promptly as the Sanction Fees help us pay for the printing of the Match Results.

Infrequently we have a club(s) that does not remit sanction fees for a match held. We understand club officers are busy, so we just send a gentle reminder. Still failing to receive the fees, a second notice is forwarded.

A final notice is sent if fees are still delinquent. After the final notice, the match dates will be deleted from the match schedule and the club's sanction will be withdrawn until the fees are received.

Disclaimer Concerning Reloading Data

Neither the *IHMSA News*, the contributing shooters or the writers or IHMSA, Inc. assumes any responsibility for the safety of any reloading data published in the *IHMSA News*. Neither IHMSA, Inc nor the writer has control over the firearms or components used, or the manner in which they are utilized. Therefore, no liability is assumed by either IHMSA, Inc, the writer, the contributors or the *IHMSA News* for any damages that result from any reloading information printed. Always consult standard reference manuals before duplicating loads or attempting any reloading procedures.

(Continued from Page 3)

Yet, over the past couple of decades, the number of times I've seen a 9mm semi-auto aimed downrange at a steel target is once. I'm sure we've had several more than I've personally observed, but the number is still small. Up until this point, I've never thought of using my S&W 5906 for Field Pistol but now I am thinking about it.

In last year's October issue of IHMSA News there was an interesting article on Bordello where some very non-IHMSAesque short barreled guns were used in an unofficial category

simply for fun's sake. If those snubbies can hit a periodic target think about what can be accomplished with a 4" or 5" barreled firearm.

Turning to a new product, I recently got my hands on a Hornady Lock-N-Load Quick Change Hand Tool. When I first saw the name, I incorrectly assumed it was a tool for changing things on a Lock-N-Load press or something like that. Such is not the case. The Lock-N-Load Quick Change Hand Tool is an ergonomically designed hand tool that allows quick changes of chamfer and deburring tools, primer pocket cleaners and neck brushes. In addition to the ten tools included with the comfortable handle,

any tool with an 8-32 thread can be used with the Lock-N-Load Quick Change Hand Tool. The quick changes are accomplished through the use of three dual sided chucks that can accommodate six tools. The chucks are inserted and released from the handle by simply pressing release buttons on both sides of the handle. It's easy on and easy off for any tool and the oversized and very comfortable handle takes the cramping of fingers (at least for me) out of the picture. For example, my current hand tool for chamfering and deburring is the typical two sided tool that more or less just requires a twist of the thumb and forefinger while applying substantial finger pressure to hold the tool. It doesn't take too long for me to get finger cramps with that tool.

With the Lock-N-Load Quick Change Hand Tool, the action is a twist of the wrist while the hand is wrapped around the substantial handle without undo grip pressure. The result is getting the same job done with a lot more comfort. Sometimes it's the small things in life that make a big difference and this new tool by Hornady certainly fits the bill. By the way, be careful on price. A quick look on some of the usual Internet sites yielded the most inexpensive at MidwayUSA at \$42.99 (after a \$5 off sale); the most expensive I found was as high as \$61.99 (also claiming a sale with \$4 off). That's quite a spread!

any tool with an 8-32 thread can be used with the Lock-N-Load Quick Change Hand Tool. The quick changes are accomplished through the use of three dual sided chucks that can accommodate six

Request for Nominations

Office of Secretary/Treasurer of IHMSA, Inc.

Article VII, Section I of the IHMSA bylaws states the following: "Officers: The officers of the corporation shall consist of a President, Vice President, and Secretary/ Treasurer. Officers shall be elected every year prior to the annual business meeting held in conjunction with the International Championships. Officers shall assume their official duties following the close of the annual meeting and shall serve for a term of three years or until the election and qualification of their successors. To ensure stability, the term of office of the officers shall be staggered."

For 2013, the office of Secretary/Treasurer of IHMSA, Inc. was scheduled to be filled by election of the Membership held prior to the 2013 annual business meeting. However, no nominations were received. Mr. Alkire, the current Secretary/Treasurer has continued to serve until replaced, With his current work duties, Mr. Alkire is no longer able to devote the time needed to carry out this office and someone else is needed to fill that position. Therefore, this is a call for nominations for the office of Secretary/Treasurer:

The IHMSA bylaws state that all nominations must bear the signature and endorsement of the nominee and signatures of two other financial members of the corporation, Also each nominee may provide a statement of claims of not more than 500-words that cites why he/she should be elected to the office for which he/she is being nominated.

Article VII, Section 3 of the IHMSA bylaws describes the "Nominations Officer" whose job it is to receive the nominations for the Executive Officer positions and conduct the election. This officer is appointed annually by the Board. Dell Taylor is again serving this year as the Nominations Officer. For that reason Mr. Taylor's address is listed on the nomination form below and is the person to whom the nominations should be sent.

Candidates for the office of Secretary/Treasurer should use the nomination form provided below or a facsimile thereof to declare their candidacy. The nominations Officer must receive no later than the 1st of March 2015. Candidates will be declared in the April edition of the IHMSA news if more than one nomination is received.

The statement of claims mentioned in above must also be received by the 1st of March 2015 in order to be published in the April edition of the IHMSA News. Therefore, candidates should submit the statement of claims with their nomination.

Duties

The duties of the Secretary/Treasurer are specified in Article VIII, Section 3 of the IHMSA, Inc. bylaws. For easy reference, that section is reproduced below.

"Section 3. Secretary/Treasurer: The Secretary/Treasurer shall ensure the recording of all decisions of all meetings of the corporation, Executive Committee, and Board of Directors. He shall perform such other duties as may be assigned to that office from time to time.

"The Secretary/Treasurer shall on a quarterly basis, furnish the members of the Board an up-to-date financial statement, with the cycle of reporting beginning with an annual financial report presented to the Board and the annual business meeting of the corporation held in conjunction with the International Championships. This report is to show the financial position of the corporation as at the end of the quarter immediately preceding the annual business meeting.

"The Secretary/Treasurer shall present a full, half-year and annual financial report to the membership via the pages of the IHMSA News. As a general rule, such reports will not have been subjected to external audit."

"The Secretary/Treasurer shall be responsible for ensuring the maintenance of all books of account and records so as to conform to the requirements of these bylaws. If so determined by a majority vote of the board, the day to day record keeping of the financial affairs of the corporation shall be contracted out to and an individual/ firm qualified and properly licensed to undertake such activity, Notwithstanding such a decision the Secretary/Treasurer remains responsible for the provision of the periodic reports referred to above."

**Nomination for the office of Secretary/Treasurer
of IHMSA, Inc.**

I _____ do hereby declare my intention to stand as a candidate for the election of the office of Secretary/Treasurer of IHMSA, Inc. I hereby endorse that my name be placed in nominations for said office, and attest to being a member in good standing of the IHMSA, Inc.

Signed: _____

The bylaws of IHMSA, Inc. require nominations for this office be submitted on this form or a facsimile thereof to the nominations officer, Dell Taylor, 8899 Midvalley Drive, West Jordan, UT 84088. The Nominations Officer must receive nominations no later than the 1st of June 2015.

Heavy Bullet Loads in the 30-20 Caliber. By Larry Harris

Reprint from June 1995

I have been using the Hornady 150 SP bullet at about 1540 fps for a ram load in the 30-20 caliber, in both my BF pistol and TC Contender, for the big bore Standing category. While ram line momentum factor is only about .80, it takes properly set rams in good condition nearly every time. Targets with problems are sometimes left standing, but this load has about the same recoil and muzzle blast as a full-power .357 Magnum load in these guns, which is fairly minimal, and I've shot all my 100 club standing scores to date with this load.

At the 1994 Internationals in Texas, I rang two pigs with my C,P,T, load of 130 Hornady SSSP bullet at 1580 fps. The wind was blowing straight in and holding up the targets. This gave me an incentive to look for a stronger load with the same or less recoil level than what I was currently using. While there, I talked to the TC representative about the development process for the 300 Whisper loads, and spotted Randy Hillyer through his Production entry with his. I also talked to some of the cast bullet shooters using the 32-20 and bullets as heavy as 180 grains in their case about their loads and how they started their load development from scratch. It seems they have known about this heavy-slow bullet thing forever. Why didn't I?

As the 1994 silhouette season ended in Ohio, I read with interest Todd Spotti's two articles about load development for the 300 Whisper and 30 Superslow. These would possibly give me a starting point for my own load development.

The 32-20 case is between the 32 H&R magnum and 300 Whisper cases for internal volume remaining with bullets seated to the proper depth. Measuring the 32 magnum Federal case at 2.066" oal with a 190 Sierra BTHP match bullet, I got 11.3 grains of water internal capacity remaining. The 32-20 RP case at 2.066" oal gave 14.2 grains, and the 300 Whisper WW case at 2.264" oal gave 16.0 grains. Further, the 32-20 case is very thin and will not take abuse well from high pressures or sloppy reloading techniques. Consequently, I can not overstate the need for caution when working up loads for this case. It demands extreme care and is not for anyone who will not use precise handloading techniques. One-half grain increments in powder charge increases are the maximum recommended by this author.

I used two different guns for testing these loads; a 10" 30-20 TC Contender, and a 10" 32-20 BF pistol with .308" bore. While both were chambered for the same cartridge, the internal dimensions and rifling of the bore were quite different, as were the results I got. The TC has an 8 groove, right hand twist barrel and a relatively large, loose chamber with a very short throat by normal TC standards. It measures 2.108" oal with the 190 Sierra seated touching the lands. The BF has a 6 groove left hand twist barrel with a tight chamber with a loose field grade neck to accept .312" loaded rounds, and a 2.132" oal. I tested both guns with test loads set at 2.066" oal to get them well off of the lands and prevent high chamber peak pressure spikes

due to starting the long bullet bearing surface engraving right as the bullet starts moving.

Both the BF Pistol and the TC Contender barrels have a 1-10" twist rate. The TC Barrel is identical to the 300 whisper barrel except for the chambering. This appears to limit the bullet lengths the guns will stabilize at subsonic velocities to 190-200 grains. I therefore started looking for the bullet at the 190 grain weight with the maximum ballistic coefficient to give the greatest retained energy at 200 meters. If your gun does not like this bullet, the 190 Speer or Hornady bullets will work as well, giving up very little.

I used Redding's 30-20 TC neck sizing die and Hornady's micrometer seating die for all loading once the brass had been fireformed to their respective chambers. This sizing die has a .306" expander plug, which is perfect for the .308" boat tail bullets. I also used RP 32-20 bulk brass, only squaring up the case mouths and checking all cases at 1.305" length. No match preparations of these cases were done. CCI 400 small rifle primers were used in all loads.

I tested 6 powders in the load development. These were AA-1680, H-110, WW-296, H-4227, and Vihtavuori N-110 and N-120. These last two are relatively new powders to the American scene, imported here from Finland. N-110 is rated as having a burn rate close to H-110, and N-120 is close to H-4227 according to the Vihtavuori load manual. I also tested H-110 and WW-296 here, as in previous testing in small cases, they can have a significantly different burn rate.

The load chart data shows somewhat larger group sizes and standard deviations than some people are used to, due to these being 10-shot groups at 100 yards. I shoot them that way in load development, because I shoot them that way during matches. A 24x Tasco scope was used to shoot groups, along with a Stinger benchrest. All flyers were counted, as the weather during the shooting often prevented calling shooter-error flyers with any confidence.

Several of these loads were shot in both the BF and TC pistols. The TC averaged about 1/4 "larger group sizes and 20-40 fps slower velocities with the same loads. This is a bit odd, as the TC shoots my normal 130 grain Hornady load 30 fps faster, and the 150 Hornady load 10 fps faster than the BF.

The ball powders (H-110, WW-296, AA-1680) gave plenty of room in the case. Loads were stopped and backed off 1/2 grain when pressure signs started to appear. The short extruded powders all ran out of case capacity before, or just as, pressure signs started to show. This is a tiny case.

H-110 gave good velocities, but poor standard deviations and extreme spreads, and some vertical stringing of groups in these loads. AA-1680 was much too slow burning for this size case. It showed only 1058 fps at full case capacity, and showed a distinct tendency to rise quickly when even slightly compressed. VVN-120 showed a burn rate much closer to 1680 than H4227 in this application, giving only 1030 with compressed loads. H-4227 gave good stable loads with consistency and accuracy, as well as good velocities. It did leave some unburned powder granules in the bore. While this didn't

affect the TC with its large clearances, the granules in the BF chamber occasionally caused the next round to be difficult to chamber. WW-296 was very impressive here. It burned clean, gave excellent accuracy over a wide range, and showed standard deviations of only 5-10 fps over the entire tested load band.

VVN-110 nearly got me into trouble here. I assumed that since N-120 burned slower in the smaller cases, that N-110 would also. Wrong! It showed a burn rate similar to Blue Dot in this application. Only a very conservative approach to the initial powder charge kept this from possibly getting hazardous to health. On the good side, it showed outstanding velocities before starting to show any pressure signs. The 9.5 grain load showed excellent accuracy and an outstanding standard deviation of 3 fps for a 10-shot group. This load bears more testing in hot weather, as my limited experience with these powders show good temperature stability, in admittedly larger cases.

The upsides to these loads are pretty good. Felt recoil is the same or less than my current loads, and is spaced out over more time; more a push than a punch. Muzzle blast with the milder loads is about like shooting .38 Special loads out of the TC. Ram line momentum factors calculate out in the .88-.98 range for a significant improvement over current loads.

The downside is a much greater bullet drop over 200 meters than faster loads have. Also, due to the longer time the bullet is in the barrel, consistency in grip pressure and recoil follow through is a must to prevent vertical stringing of groups. This will also affect your sight settings.

Practice with the 9.5 grain WW-296 load at 1090 fps showed a visual difference in the target's reaction to the bullet strike. This load slowly pushes over all the targets, chickens included. The load has a lower momentum factor at the chicken line (.90), than any other big bore load I've ever shot. Everything else giving that light of contact at the chicken line won't take rams. Every other load giving this much ram momentum just blows down chickens. This load will make your spotter look like a pro on the close targets.

This load offers 300 Whisper performance with heavy bullets, without case forming wildcats or custom dies. It eliminates the hunt for the rare and elusive 221 Fireball brass. It also has a big rim, which works much better in most single shot Production guns.

I shot this load in the local April match to get sight settings for future comparison. I got a 23 standing, 40 production, and 39 unlimited, for a 102 aggregate. It did lose one ram hit of the 27, but in fairness, it was 42 degrees out, the wind was 20 mph from behind the rams holding them up, and the hit was right at the bellyline center. Other than being nearly 50 clicks lower to start off, and my spotter asking if I had shot yet, this was a very comfortable load to shoot, with better ram takedown, and the promise of even better scores to come.

If this sounds like something you would like, jump in and enjoy. I have. Just remember to be very cautious working up loads and when reloading, as this little case has zero tolerance for error.

(continued on Page 8)

IHMSA NEWS-SECTION B

MARKSMANSHIP COMPETITIONS

The Burris cup:

Scoped .22 Long rifle caliber Handguns only. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a ransom rest, vise or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns setup for Creedmoor to better compete.

The Weaver Trophy:

Scoped centerfire handguns. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a ransom rest, vise or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns setup for Creedmoor to better compete.

The Merit Challenge:

Centerfire handguns with iron/open sights. Your best 5-shot group at 100 Yards or Meters. Groups must be fired from an IHMSA legal position. No benchrest or artificial support allowed.

The Daisy Avanti Trophy:

AIR production guns with iron/open sights. Your best 5-shot group at 18 Yards. Groups must be fired from an IHMSA legal position. No benchrest or artificial support allowed.

General Rules:

All entries must be shot with IHMSA legal guns. Production, Revolver, and Unlimited guns are allowed in the Burris, Weaver and Merit classes.

Witness:

Winning groups must be witnessed by an IHMSA or NRA member. Eligible winning targets must be signed and dated by the shooter and witness. Also, please include the shooters IHMSA number and the witness's IHMSA or NRA number by their name. A witness is not required to enter but is required to win.

Targets:

Targets submitted must contain no more and no less than 5 shots in each bull zone.

RECORDS PROGRAM

Big Bore Records Program (BBRP)

By
Joe Cullison

Pretty slow this month but a new name joins the ranks this month. I hope everyone is practicing for the World Championships in Los Angeles on July 10-17th. Shoot great and then send me the scores.

John Zumwalt (CA) shot a S-22, P-38 and a U-40 for a 3-gun score of 100. This also puts California in the lead for the state race.

Joe Cullison went down to LA for practice at their latest match. Joe shot a S-33, a US-38, a P-39 and a R-34 for a 3-gun score of 110 (using 2 standing guns) and a 4-gun 144. Joe raised the high US score so far for the year and also raised the standing agg.

State totals for 2015 are: CA-6, OR-5, OH-2.

Please bring at least one friend or acquaintance to every match. Together, we can keep IHMSA growing.

Please forgive me if I have left anyone out or made any other errors. Send me the information and I will make it right as soon as I can.

Thank you for your support of the BBRP.

Send entries to:

Joe Cullison, 28988 Berlin Road, Sweet Home, OR 97386 or to jcunclejoe@aol.com. 541-317-8801 evenings

Thank you.

Just one score to report in this addition. Joe Lipp fired a 36 in PAS using his TC 22 Hornet. Then Joe added a 31 in Prod shooting his TC in 9mm. That puts Joe on the list with a nice PAS score and a combined 67. Joe was shooting at the Marathon Trap & Sportsman Club in Wausau, WI. Nice shooting Joe. Shoot well and shoot often.

Send your scores to Al Kuenn, 5725 E Peak View Rd, Cave Creek, Arizona 85331 or e-mail to: allank@cox.net.

1/2 and 1/5 Scale Records

May 2015

By Jim Harris

The season is off and rolling now! Entries are coming in a little more briskly with UAS multiples from Steve Soya up in snowy Michigan, and Jerry Ray down in sunny California.

Gary Crews is back out of mothballs in Oklahoma, posting his first open sight 40 of the year in 1/2 Scale. That's his 6th career perfect score with open sights on the little critters, moving him one above his fellow Sooner, John Anderson (I foresee a seesaw between them!).

Keep up the great shooting, everybody!

Send your records notices to me at harrisgrp@earthlink.net, or my home address: 1567 Bridget Ave., Simi Valley, CA 93065. Or give me a call at (805) 581-0009.

Tusco Rifle Club, Midvale Ohio Presents:
**THE 2015
EAST COAST IHMSA
CHAMPIONSHIP**
July 30 and 31 • Aug 1 and 2, 2015

MATCH PROGRAM
60 Round match. Disciplines offered will be Big Bore, 1/2 Scale, Small Bore, 1/5 Scale and Field Pistol. Big bore, Field Pistol and Half-size are set in meters. Small bore and 1/5 scale are set in yards. Sighter targets are available for all disciplines. Shoot-off will be mandatory for perfect scores and shoot offs may not necessarily be at standard distances. Shoot offs will be shot on the day of your entry as soon as you finish rams. Carpets/mats will be provided at each position.

ELIGIBILITY
Open to all IHMSA members in good standing. Guests will be allowed to shoot but cannot compete for match/discipline championships. Pre-registration is strongly recommended. Walk-ins will be taken as time allows.

FOOD
Food, pop, and water will be available to buy at the range. We are trying to arrange a get together on a night at a local restaurant. That will be on either Friday or Saturday and that announcement will be made at the match. Everyone is responsible for their own tab.

Entry fees \$10 per gun for 1-10 entries. Maximum fee \$100, with unlimited entries after \$100

Please email jimologist@aol.com or mastertone69@yahoo.com for entry forms and complete details. You may also call Jim Kesser at 614-214-6165

2015 WEST COAST CHAMPIONSHIP
GRANTS PASS, OREGON
JUNE 16-20

We offer it all from Big Bore to AIR & Unlimited One-Fifth Scale.
A 60 round match in scenic southwest Oregon.

- Ride the Wild & Scenic Rogue River
- Tour our wineries.
- Enjoy fine dining & visit our new brew pubs.
- New restaurants have opened this year!
- Watch the Osprey dive for salmon on the Rogue.
- Enjoy our museums and public artwork.
- Shop in the Historic District.
- Crater Lake is a "must see".

This match is open to all IHMSA & NRA pistol silhouette shooters.

GREAT FOOD, COOL MATCH T-SHIRTS WITH A PROFESSIONALLY DONE LOGO, 15th ANNIVERSARY PINS, & HOT COMPETITION!

IT DOESN'T GET ANY BETTER THAN THAT.
Contact Steve Ware for details.

Robert L. Walker, Match Director

4/25/2015

This match was one for the books; it was raining hard and the wind was howling; the forecast was for Thunderstorms. But being the Match Directors we are, we showed up to host any brave souls who ventured out. Received a call from one shooter who indicated the radar showed a clearing from 10 am to 3 p.m. Unusual, but around 10 a.m. it quit raining and the dark overcast turned to bright overcast and by the end of the match, the sun was shining. It was so bad that even the Target Setter did not show; so we sat our own targets. I don't blame those of you who did not show up; if I had not been hosting, I probably would have stayed home too. See you next Thursday – Saturday for the Georgia State Small Bore and Field Pistol Championship in Gainesville – Cherokee Gun Club.

5/23/2015

What a magnificent day for a silhouette match; the weather was next to perfect and we had the added benefit of a couple of new shooters; Andrew Kerlin and Stephen Kuehl and then there were almost all of our regular shooters. To top off this beautiful weather and new shooters, we had the pleasure of hosting a couple of Alabama's finest (Roll Tide); Richard Slaton, Bruce A.C. Barrett and Stuart Barrett. Let me tell you, these gentlemen came to shoot, with each putting in 4 or 5 entries; heck, Melvin and I were both able to get in 3 entries a piece too.

We would also like to acknowledge your most generous contributions to the Target Setter "Scholarship Fund"; he was more than pleased with the offering; and I believe he did an outstanding job of setting targets.

Cherokee Gun Club

Gainesville Ga

Georgia State smallbore and field pistol championships (60 round)

By Ron Dixon

Thanks again to Cherokee Gun Club for letting us hold the Georgia State IHMSA Smallbore and Field Pistol match here on April 30, May 1, and 2nd. Twenty one shooters shot in the match, and they shot 75 entries. This year the weather was great, and those who shot enjoyed some great conditions.

At this time I would like to thank several whose help made the match better. Larry Davis helped get the targets ready for the match, Herb Dalton called the line for three and one half days, and Ronnie Owens spent one whole day helping and painting targets. Robby Lawrence helped with our supper on Saturday night, and my wife Sherri did all the registration and paper work.

As for the match Robert Walker got the Four Gun Aggregate and the Standing agg. Richard Slaton captured the Three Gun Aggregate and the Fifth Scale agg. And Melvin Calliham won the Field Pistol agg. There were a couple of fellows who really stepped up their game. Richard Slaton got match legs in three classes, and Dave Chaney got match legs in two classes.

In UAS we had four shooters who shot 60x60. We thought there was only going to be three but along came Alana Munday shooting the last entry of the match, and you guessed it she shot a 60x60 as well. For our shoot off we set one fifth scale targets at 100 yards. It started with a ram then a chicken a pig and two more chickens. It was a ten round contest and after each shooter fired their ten we had a clear winner in Ken Hale, but we had a tie for International first; so ten more rounds had to be expended. After this contest Howard Strickland came out on top. We also had to settle a tie in Unlimited Any Sight Fifth Scale. Howard Strickland and I went 54x60, and that also had to go to the mat to decide the winner. For this contest we shot at one fifth scale chickens at 100 yards. After 15 rounds I managed to luck into one more target than Howard.

LOUISIANA

ASCENSION SILHOUETTE

GONZALES, LA

MAY 3, 2015

BY: CHARLIE BRAUD

We had a light turnout for our May match. Aside from myself and brother Philip, only one other shooter joined us today. Richard West came from the Lafayette area. We did also have 3 rifle shooters share the range for some NRA Cowboy Lever Action Silhouette. Philip missed not a single target today between two entries: UAS and Practical Hunter Short Course. I'm still seeking that elusive 40X40 in UASFS. Today was not to be the day and I finished with a 38X40. Richard fired a couple of UAS entries. I also debuted a "New To Me" gun in Practical Hunter 22LR. I recently acquired another High Standard Trophy with the 7 1/4" barrel. This one is a 1972 vintage. I had no initial sight settings having never even fired the gun. But I wanted to shoot it and maybe get some idea of how well it shoots. I tried a couple of different ammo types through the 40 shots and ended with a 25X40. Next time out I'm sure I can do much better, now that I have some settings.

Had a good turnout but the cold keep people from shooting a lot of guns. Gary Rex brought a big pot of chili to keep everybody warm and it was greatly appreciated. Bill, Dave and Jim went over on Friday to set up so we were able to start early on Saturday. It was just starting to get nice about the time we shut down for the day. This was a one day match because of Easter weekend. Thanks to all who came out and all that helped it is greatly appreciated. Be sure and come out next month as I guarantee it will be warmer.

5/9/2015

We had perfect weather and a great turnout. It was good to see four junior shooters on the line although only two shot for score. Maybe just as important is that two of the junior shooters were female. We had a brand new novice shooter who has never shot a match, Vince Resor who posted an amazing 17 with a Ruger MarkII in production. If any of you rememeber your first match, that is about 5 times the number of targets I hit the first time. Vince must be an excellent shot to begin with and I'm sure we will hear more from him in the future. Thank-you goes

out to our Region 3 director Brian Gildea for bringing Vince and two of the junior shooters. Junior shooter Isaiah Herron is knocking on the door of a perfect score in UAS. He scored 37 and actually hit 38 but ran out of time on the 10th turkey. His younger brother Jeremiah is going to give him some tremendous competition. Both posted excellent scores! We were honored to have husband and wife team Judy and Jerry Stringham travel all the way from Marion, Il. These guys are what keeps silhouettes going. Their dedication to the sport is unbelievable. Jerry had a Ruger revolver tricked out to shoot flop and it was interesting to see. I had heard of one but never seen it. He said it is a work in progress. His other work in progress seemed to be working pretty good because he shot a 40 in unlimited with yours truly spotting which gives him a leg into International. Good shooting Jerry and thank-you to you and Judy for coming all the way over to shoot with us. Victor Aume shot a perfect-perfect score in SB-UAS. He shot all 40 of the regular targets then cleaned the shootoffs for a 40/10. Excellent shooting! Carl Skidmore and Bill Urbank battled it out to tie with 59 aggregates in FP. Carl had more shootoffs in Prod. Three perfect scores were shot; Victor Aume before mentioned in UAS and Dave Calloway with 40/7, and Jerry Stringham in Unlimited. Bob Ochs and Steve Powell are knocking on the door of International in FP prod. Bob hit 28/1 and now is getting the hang of the peep. Steve re-entered his iron sight gun in PAS and scored a 29/2. Jim Lejman is ready to move up to AAA in FP Prod and could easliy grab a 60 club with a few more in PAS. We had a battle in 1/5 scale with Victor Aume cleaning 34. Dave Calloway and Rich Baird were right behind with a 32 and 27 respectively. It was good to see Steve Beck-Montgomery post a couple and interestingly he used to shoot with Judy and Jerry at the Paducah, Ky range. Thanks to everyone who helped set-up and stayed and tore down. I appreciate each and everyone. Thanks to Dave for fixing lunch. See you all next month.

By Pete Durrant

Pretty good turn out for our first match of 2015, weather was kind which was a relief after a brutal winter!

Closest competition came in BB Standing where Murray Anderson edged out Joe Lesko by felling a ram, good to see you shooting on your feet again Murray.

No 40's posted this match, closest was a 39 in SB UAS by Howard Sims.

Our April match which we actually shot on March 29th, to avoid shooting on easter Sunday was about right weather wise, a little windy but all in all a good day to shoot.

We had a fair turn-out, for our 1st match of the years (our march match was cancelled due to snowy conditions) with 28 entries. As usual our target setters did a great job and thanks to everyone who helped with the match.

Only nine fortys were shot in this match: Jackie Brown (1), Jim Fields (1), Larry Curts (1), Dave Stone(1), John Blue(2), Scott Thompson(1), and Woody Lidell(1). Great shooting guys.

**LASC Match Report
April 11 & 12, 2015
By Jim Harris**

As always, thanks to Ramon and Joe, and all the Young Marines who set our targets!

Things are really warming up for attendance as we approach the IHMSA International Championships in July. Lots of people coming out to get their three qualifying entries in each discipline.

A face from the distant past, Tony Wong, drove up from San Diego to join us. Tony shot a ton of different categories, making him the Iron Man of the match!

Also making an appearance (sorry I missed him!) was Mike Bowman, shooting a very nice 39 in Unlimited after a lot of down time.

Allan Brooks came up to shoot a rifle entry with one of his cool antique lever guns. Hope he's back for the season.

In an unusual match winner result, Richard Mishler and I share the Big Bore top honor. Both of us got the 40x40 plus 4 preliminary shoot-off targets, not sticking around for the end of the match shoot-off. So, we share!

Jerry Ray took Smallbore Match Winner and Boris Sorkin takes High Rifle score.

Looking forward to seeing everyone at the May match!

4/1/2015**

___ Well, it was April Fools' Day; so, that must explain things. We were fooled because only 3 people showed up. Then we were fooled by the fact that Gordy & I each had a pistol go South & we DNF'ed them! (But we paid the sanction fees for them even though they are not reported in this report.) Congratulations to Mike & Gordy on their wins and

thanks to both for helping to set up and tear down the range.

COMMENTS

First thanks to the club for taking the reigns and running this match while I was playing on the Oregon coast. & Special thanks to Paul for being the match director.

Congratulations to Dave Whitman for sweeping the Field Pistol titles. Great job Dave! Rick Redd pretty well cleaned house taking the Fifth Scale, Production, Unlimited & UAS titles plus High Senior. Joe Cullison took the Revolver, Standing & Unlimited Standing titles plus shot into the President's 3 Gun 100 Club.

COMMENTS

Considering the fact that we had sunshine & temperatures in the 80's, it was a rather lack luster turnout, but the competition was pretty hot!

Doug Hockinson was our Production champion. Joe Cullison continued his winning ways taking the Revolver, Standing, and Unlimited Standing titles, and shooting into the 100 Club 3 Gun Aggregate and 60+ Standing Clubs.

Mike Abel and Rick Redd had an interesting battle in Unlimited with Mike taking the title with 4 shoot-off targets to Rick's 2. However, Rick ended up with High Senior in several events plus the UAS title and both Half Scale wins.

Thanks to Doug, Joe, Mike, Rick, and Paul for helping to set up and tear down the range.

COMMENTS

It was good having Team Medford back & they were richly rewarded as Dave Healy shot the only 40, took the UAS championship & was High Senior. Ron Sprafkin didn't shot a 30, but it was enough to take the win in US. Barb Rodriguez was High Lady, and Gordy took the USIS title.

Thanks to the whole group for helping to set up and tear down the range. Many hands do make light work.

___We had a darned fine Small Bore match with 29 total entries. Many thanks to our stalwart travelers who continually support us, Dave Whitman, Doug Hockinson, & Joe Cullison.

Dave Whitman was our FP-P champion with his S&W, and Paul Hoadley came out of AAA class to take the PAS title. Dave also took the Fifth Scale Any Sight title.

Walt Padgett and his son Gavin joined us to shoot their rifle in the sitting position, hence we are now shooting Freestyle Rifle along with Rifle. Son Gavin beat dad by 2 targets. Good job Gavin! Rich Burket also shot his Remington and considering he is having some back issues, he was pleased with his 26.

Rick Redd and Joe Cullison had a great day in Small Bore running neck and neck in several disciplines. Rick took the Production and Unlimited titles as well as High Senior and an entry into the Small Bore 100 Club. Joe took the Revolver, Standing and Unlimited Standing titles and shot another entry into both the 100 & 140 Clubs and the Standing 60+ Club

Team Medford did not go home empty handed as Dave Healy took the UAS title.

Many thanks to those who helped to set up and tear down the range – Dave, Doug, Paul, Charlie, Joe, and Rick

WASHINGTON

**Paul Bunyan Rifle Club
Puyallup, Washington
Bret Stuntebeck, Match Director
4/4/2015**

We had 8 shooters this month put 17 guns across the line. Weather was excellent with the sun coming out making for a great day to bust some steal. We had one new, well semi new shooter his month. My son Brian came out to shoot with us. It has probably been 10+ years since he has been out. He has started shooting IDPA and thought that the slower pace of silhouette would help him with proper sight alignment thus helping him in IDPA. What ever his reason I was happy to have him come out and shoot with the ole man. On to the results of the match.

We had two 40's this month. The first by Steve Cozort in UAS shooting a UAS-AAA, 40. Joe Stumpf posted a UAS-Int, 38. Nice shooting Guys. The second 40 was by myself in Unlimited posting a U-Int, 40. Richard Nicol posted a very nice U-AAA, 37 followed by Steve Bishop's 34 and Joe Stumpf's 31. Brian Stuntebeck posted a U-uncl, 26 using my Cast bullet 7BR. In Half size Steve Cozort posted a nice UASHS-AAA, 34 followed by Vince Leete with a 31. In Production I managed a P-Int, 38 missing 2 rams and narrowly edged out Vince Leete who posted a P-Int, 37. Richard Nicol posted a P-AA, 37 giving him a leg into AAA. Nice shooting Richard.

On the Smallbore side Steve Bishop posted a P-AAA, 26. I posted a S-AAA, 21. Dave Chalfant Posted a S-AA, 21.

In Field Pistol Dave Chalfant posted a P-AA,

24. Vince Leete posted a very nice PAS-AAA, 34. Nice shooting guys.

Once again our target setters did a fantastic job. Thanks to all who stayed to help pick up targets after the match.

Until next time shoot straight and be safe.

**Puyallup, Washington
Bret Stuntebeck, Match Director
5/2/2015**

We had 7 shooters this month put 15 guns across the line. Weather was excellent making for a great day to bust some steal. On to the results of the match.

No 40's this month. In UAS-Int, Joe Stumpf shot a 39 missing a one ram. Richard Nicol posted a U-AAA, 32 followed by Joe Stumpf with a U-AAA, 27. In UASHS Steve Cozort Posted a UASHS-AAA 31. In UHS-AAA, I managed a 31 also. In Production I ended up with a P-Int, 38 missing one turkey and one ram. I was pretty happy with that score seeing I was using some experimental bullets that I had swaged using 22mag cases for the jackets of the 6.5mm bullet. Steve Bishop posted a P-AAA, 32. In Revolver I managed to eek out a R-Int 32, Steve Bishop posted R-AAA, 30.

On the Smallbore side Joe Stumpf posted a UAS-AAA, 37. Vince Leete posted a nice U-AAA, 35 going clean on everything but the turkeys. Dave Chalfant came out smoking posting a S-AA entry of 28! That's an international score folks. Not bad for a fairly new shooter. This is a jump class putting him into AAA with a leg into international.

In Field Pistol Dave Chalfant posted a P-AA, 20. Vince Leete posted a very nice PAS-AAA, 32. Nice shooting guys.

Once again our target setters did a fantastic job. Thanks to all who stayed to help pick up targets after the match.

Until next time shoot straight and be safe.

COLORADO

**Colorado Rifle Club
Byers, CO
5-2-15
By Russ Plakke**

What a day for shooting! Weather was about as good as it gets out here in Colorado for this time of the year. Mid 70's with light cloud cover and light winds to match. Ground was a little muddy in the morning due to recent rains but the range truck old blue pulled us through and enabled us to get set up. Only thing better than the weather was the great showing of shooters we had. Was great to have Gary Porter back with us after some time away. He has picked up where he left off and is gaining speed and doing really well. Was also good to see Flip and Lon up from the south to shoot with us. Appreciate the effort and long drive to get here. Shout out to Joanna and Bill for 40's this week. Already looking forward to the next match. Man I love this time of year!

Match Publication Policy

As we continually have new match directors, following is the IHMSA News' policy on publication of state, regional, and "specialty" match notices and match results.

Any IHMSA sanctioned club in good standing may publish a notice of their club's state or regional championship match at no charge for three months. State match notices are limited to 2 1/4 "x5". Regional match notices are limited to 4 3/4"x5". If a club is holding a "specialty" match and that match does not replace one of these championships, the *IHMSA News* will publish a 2 1/4"x5" notice at no charge one time. These notices will run in Section B only. The club may publish additional notices of the same size for \$45 per issue. Ads must be prepaid before printing. All payments are to be sent to IHMSA HQ, P.O. Box 22356, Cheyenne, WY 82003. The club may specify whether the paid notice is published in Section A or B.

State match results can list both first and second place finishes. Regional match results can list first, second, and third place finishes. "Specialty" matches replacing a state championship may publish first and second place finishes. "Specialty" matches replacing a regional championship may publish first, second, and third place finishes. All other match results wherein the total number of handgun silhouette entries exceeds 11 (including all IHMSA, NRA & non-member guests) can list only the first place finish. Matches with less than 11 total handgun entries as defined above can list all IHMSA handgun entrants and their place. Regardless of the above, all 40's, 60's, and 80's (depending on the number of rounds fired at the match) can be published from ANY IHMSA match.

An IHMSA club holding a dual sanctioned (IHMSA/NRA) match may submit a match report for publication in the *IHMSA News* containing both IHMSA and NRA results. The number of published NRA results may not exceed the number of published IHMSA results. **Publication is limited to IHMSA sanctioned handgun disciplines only.**

Please address any questions concerning this policy to your Regional Director.

Mark Basham, Match Director
5/2/2015

We had an unbelievable match with a terrific turnout. The weather was absolutely perfect both days and we couldnt ask for more. The turkeys that kept crossing over around the 250 yard area were a little distracting but all them survived!

Pete Durrant and his wife and grandson came from Canada to help us enjoy the weather and Pete shot 12 guns. He is slowing down a little in his old age! His grandson Alexie did a great job helping us paint.

There were some good scores shot, so the cobwebs were of no bother. Carol Urbank was high lady, Olivea Gildea was high junior, Pete Durrant was high senior BB and Lynford Singer High senior in FP. Steve Powell jumped a class into Int. in 1/2 UHSAS with a 40, and Jim Kesser squeaked a 100 club in BB. New shooters and brother Dave and Doug Edney came over to visit from Pa. and Doug smoked everybody in .22 standing. Bill U and Bob Ochs duked it out in BB rev. tying with shootoffs but Bob had more turkeys! Bill kicked Jim in BB standing, but Jim got him back in SB. Pete Durrant got a leg up in 1/5 scale to AAA with a fantastic 38. Pete how do you say sandbag in Canadian?

There were a total of 13 perfect scores fired! Emery Adanich, Victor Aume, Craig Eagle, Doug Peters, Jim Hanson, Gordon Lash, Jim Kesser, Steve Powell, Pete Durrant and Dave Calloway all had 40s, some had multiples. We had 80 entries total and that is a bunch nowadays. Thank-you to all that came and all that helped. Especially Carol Urbank for cooking both days. And Larry McClintock for keeping it all running.

Arrangements have been made with Ron Cottriell, President of Angeles Shooting ranges to receive ammo from people flying in to the World Championships. Ammo can be shipped to the following address:

Angeles Shooting Ranges
C/O Ron Cottriell
12651 N. Little Tujunga Canyon Road
Lake View Terrace, CA 91342

Make sure you indicate on the outside of the box that this is for the IHMSA World Championships.

Also, Sales of firearms from Gun shops to Non-Residents are not allowed in the state of California. Private party sales will be discussed later as these laws are changing due to a federal court ruling and I need to do more research.
