Official publication of the International Handgun
Metallic Silhouette Association, Inc.

NOVEMBER/DECEMBER 2017

PRESIDENT'S REPORT

By Steve Martens

As 2017 comes to end we look forward to the 2018 shooting season. We remember the great matches put on by our dedicated match directors. We also remember the shooters who have left the range. We will always remember their dedication to the sport and we hope we can contribute as much as they did. We recently lost Tom Leibold to cancer in Minnesota, he was the Vice President of IHMSA when it was going through some tough times. With some tough decisions and leadership IHMSA came out stronger.

Also late 2017 saw wildfires do major damage to the LASC range in California.

Lets hope they can make the repairs to their exceptional range quickly. If you are in the area I'm sure they would appreciate any help you could provide.

We will soon be going to the 2018 shot show. We will be meeting with reflex sight manufacturers and other silhouette related industries. We will be thanking those manufacturers for their support in 2017 and their continued support in the future.

One more reminder that your dues for 2018 are now due and if you haven't renewed please do so as soon as possible. You will then receive your 2018 scorecard and the printed copy of the Annual issue of the IHMSA news in mid March. We do a mass mailing in March as this saves the organization money on mailing costs and keeps the membership dues lower.

Have a great new year and shoot often.

Steve

Annual memberships are \$35.00 and printed newsletters are an additional \$20.00.

Please send membership renewal dues to
IHMSA, Inc.

3061 Sand Hill Rd

Bismarck, ND 58502-6437

or pay by PayPal on the ihmsa.org website.

IHMSA Bulletin Board

MEMBERSHIP RENEWALS

Annual memberships are \$35.00 and printed newsletters are an additional \$20.00. Mail membership renewal dues to IHMSA, Inc.
3061 Sand Hill Rd
Bismarck, ND 58502-6437
or pay by PayPal on the ihmsa.org website. You will receive your new 2018 membership card in the annual newsletter in March.

NOTE TO MATCH DIRECTORS

Please continue to send match results via email to ihmsaheadquarters@gmail.com, but please include the club name or city and state and date of the match in the subject line of the email. This helps to match the emails with the recap reports. If you are able to create the report using the IHMSA match program that would be preferred. Please send sanction fees and recap sheets to IHMSA headquarters as well.

RULE CHANGE PROPOSALS

If you have any rule changes you would like to present for 2018 Board of Directors/Annual Membership meetings please submit them to IHMSA Headquarters at ihmsaheadquarters@gmail.com.

FOR SALE

40X40 IHMSA zinc buckle, limited quantity, \$17.50 each from IHMSA Headquarters.
IHMSA Inc; 3061 Sand Hill RD; Bismarck, ND 58503

TARGETS FOR SALE

If there are any clubs looking for "free standing" big bore targets or "auto reset" small bore targets contact your regional director as we have some extra targets from the Fort Stockton range that we are looking to sell. We will have more information on the available targets in the future.

LEFT THE RANGE

Thomas Frank Leibold, 74, passed away Friday December 29, 2017 at his residence of cancer. Son of Dr. Herbert William and Eleanor (Kopushar) Leibold. Older sibling of Richard John Leibold. Tom's parents and brother are deceased. Tom never married but was very dedicated to his immediate and extended family and friends. Tom is survived by his Aunt Jane Leibold and numerous cousins in Washington, Utah and Illinois.

Tom was a graduate of the University of Minnesota majoring in Aeronautical Engineering and Mechanics. Tom served in the Army during the Vietnam war. Tom was a life member of American Legion Post 577, Veterans of Foreign Wars Post 295, and Voiture 838 of the Forty and Eight. Tom had a very successful career in Engineering, heavy equipment sales and insurance sales.

Tom will be greatly missed by his family and friends.

BIG BORE RECORDS PROGRAM (BBRP)

by Joe Cullison

2017 is over by the time you read this. Another year gone and many great scores posted. It was nice to see six different states posting scores in the records program. Actually there were 7 states but one particular central Northern state seems reluctant to send in their scores. (There is still time before the final report ... MN)

Rich Hawkins (IN) shot a S-27 and a US-33 for a Standing agg of 60. Rich also shot an excellent US-71 at the World Championships taking 19 of the turkeys.

Paul Habig (NV) Did some excellent shooting. Paul is one of the best smallbore shooters in the world so it is always a real treat for us to get BBRP scores from him. Paul runs the matches in Las Vegas and as any director can tell you it is tough to get in a gun and nearly impossible to get in 4. Paul did it in grand fashion. He shot a S-29, P-40, U-40 and a R-40 for a 3-gun 109 and a 4-gun 149. Just to make things a little harder Paul used an 8" BF in 41 mag for his standing score. (I think maybe we make him use a 4" 38 special next time)

State totals for 2017 are: OH-12, OR-5, NV-3, CA-3, IN-2, SC-1

Please bring at least one friend or acquaintance to every match. Together, we can keep IHMSA growing.

Please forgive me if I have left anyone out or made any other errors. Send me the information and I will make it right as soon as I can.

Thank you for your support of the BBRP.

Send entries to:

Joe Cullison, 28988 Berlin Road, Sweet Home, OR 97386 or to jcunclejoe@aol.com. 541-317-8801 evenings

Thank you.

THE NEW SILHOUETTER

Bass Pro Shops and Newly Discovered Trap Range By Ken Horowitz

(Originally written for Aug, 2015 but not published)

I was pleasantly surprised at the fully stocked shelves of ammo on a recent trip to the new Bass Pro Shops in Atlantic City, New Jersey. I was staying in the area in Galloway Township, about 10 miles away and I just had to see what struck me as a peculiar place to choose for a store site. Like all Bass Pro shops I've visited (Virginia, South Carolina and Florida), this one was a nice place to go and it sure beat the pants off spending time in the outlet shops right across the street this time.

While the photo I had seen in a local newspaper showed what looked like throngs of people on the grand opening of the store, the activity on the day I went was pretty quiet, with perhaps more sales associates than potential customers. As of now, this is the closest Bass Pro shop to where I live (although an even closer one has been announced for future development) and I hope there is sufficient traffic to keep it alive. All the previous shops I visited were along heavily trafficked highways or in more deeply populated areas. With Atlantic City on its current decline and with the shop location not somewhere where a lot of people might casually be passing on an interstate, I wonder what the thought process was on this one. Nevertheless, I do wish it well and I'm sure I'll be back there since I do have occasion to travel to Galloway Township several times a year.

There was lots of ammo here. With the exception of 22LR, all common and some not so common cartridges and shot shells were in plentiful supply. Of course, there wasn't everything in every brand, but there never is or has been. With the exception of my specialty IHMSA cartridges that are not being offered by any factory currently, I could have bought something for everything I shoot. There was even a moderately impressive (for a big box store) selection of reloading components.

When I was heavily into fishing years ago, Bass Pro Shops was my go to source for just about anything I couldn't find in a local bait and tackle shop. I think it may have been my first mail order experience after getting the idea from one of my brothers. I'm talking paper order forms here, pre-internet. I still have lots of unopened stuff that just seemed like a good idea or was a tremendous bargain. When I abruptly gave up most fishing due to its conflict with leisure time for shooting some 20 odd years ago, friends and family were the beneficiaries of most of my stockpiles. Luckily, I still have enough stuff to get me started now that my grandchildren have shown an interest in pulling fish out of the water. However, with a walk-in Bass Pro Shop within driving distance, I can now just toss new items into a real shopping basket instead of an internet cart.

Besides the firearms, ammo and other accoutrements of our sport, Bass Pro Shops is just a fun place to be. Every one I've visited

has a huge fish tank, and this one was no exception. Trout the size that make you drool were overshadowed by a sturgeon that kept meandering back and forth in the tank. They even have some oversized chairs in front of the tank if anyone in your party cares to sit a spell while you look around the rest of the store.

The boats are always fun even if not in the market for one. Whether you're looking at a basic bass boat, ocean capable Boston Whaler type or a pontoon party barge, every one of them impresses. While I'm not into camping, I do like a lot of the cooking hardware for my own backyard deck. The selection of smoking woods is incredible (although I do always come back to basic hickory no matter what other wood I try). I still keep avoiding buying a turkey fryer but the selection was awfully tempting.

My thoughts on the turkey fryer are that tossing something that large into boiling oil is not a good idea. Sure, it needs to be defrosted and gently lowered, but I can just see the spattering and other bad things - call me chicken (or turkey). The more important holdback is that I know how much I'll like it that we'll be frying things to excess. Someone had given us a Fry-Baby as an engagement gift. It wasn't the first thing we used when we got settled, but once the ease of use was there we were having fries and other delicious goodies practically every night. I also gained a ridiculous amount of weight during my first six months of marriage. It's getting too easy to put it on and too difficult to lose it, so I don't want to be tempted by having the ease at my fingertips.

Having fried turkey periodically wouldn't be bad and I've offered several friends of ours that I will purchase a turkey fryer for them and they can do the frying and we'll come over for dinner. No one has taken me up on my offer yet. (I guess we all got Fry-Babies or maybe even a larger Presto product back then.)

Back to shooting stuff at the Atlantic City Bass Pro Shop, there was even a decent selection of firearms, both long gun and handgun. This is especially welcome since the offerings in more general sporting goods stores such as Dick's and Sports Authority are getting pretty skimpy. There is a Sports Authority in my Township that doesn't have firearms at all. I've yet to find a local Wal-Mart that has any firearms (it makes it more pleasant to visit out-of-area Wal-Marts that do have them). As more dealers disappear, it's refreshing to have a new presence, even if it's one that I can only frequent several times a year.

Speaking of new presence, there has been an announcement of a new indoor range just over the Township/County line where I live. While my indoor range shooting is self limited, it is still great news that a new range will be coming soon. Also good news is that it will be attached to a gun shop. While big box stores like Bass Pro Shops are great to have, the personal touch of a local dealer is a becoming a shrinking commodity.

Once I heard about this coming indoor range, I Googled it for

info. Entering the internet abyss, I started following links after learning what I could about the construction plans and status of the new facility. You know how it is; one link leads to another and another and then, much to my surprise, I found a trap club that was open to the public on particular days, a mere 4.18 miles from my house! What? I've been living here going on 35 years this coming August and I'm just discovering a new place to shoot?

When I first moved here there was a public range maybe a mile or so as the crow flies. During Fall and Winter when foliage does not absorb any sounds reports of distant guns being fired were regular. That facility, now gone, had a 100 yard rifle range (bench only), 60 feet pistol range (standing only) and a regulation clays area for trap, as I remember, and probably skeet as well. I went there a few times and then stopped because the facility was less than satisfactory and there were some cranky people there. Still, when the range closed I was not happy.

When I discovered a new (for me, that is) trap range so close to me, I was excited. As it turns out, it is in the same township that the new indoor range is planned. It's down a road I have never had reason to go, off of one that I occasionally drive. It's a good thing I saw a picture of the entrance because when I visited the range this past Fathers' Day, I passed it by a car length or two before I saw the sign. Backing up, I proceeded down the one vehicle width road and came to rest at the trap range.

I shot two rounds and was back home in plenty of time to go bowling with the kids, then dinner. The range was plain trap, with up to three trap houses depending on patron traffic, run very well and the people, both running it and the shooters, were nice and they shot safely. That's my kind of range and my new find had me back there for another couple of rounds the following Wednesday. It will surely have me back there on a regular basis starting this Fall. It's too hot for me now!

While I've been shooting Sporting Clays for a while, it's been over 9 years since I last shot trap. Both my historical score records and my scores on my two visits can attest to that. I'm way too slow and simply cannot get over the aiming technique(s) of shooting rifles and pistols for so long. By the books I know what to do but I'll need a lot more practice to become respectable. With such a close trap range, I'll be able to work on it.

In my youth I was actually pretty good at trap. My favorite for this was my father's single shot goose gun with a 36" barrel. It was the epitome of ungainly, especially against other more gentlemanly guns on the local public trap range. Even on a bad day I would regularly be in the upper teens to low 20s on score. 23s, 24s and 25s were more typical when I paid attention. Of course I could never shoot doubles with it and that proved less satisfying with one of my father's several pump guns.

Over the years I've shot at just about every sort of trap range,

including Spartan throw your own places, cruise ships (although it's called trap it's really just a touristy thing for a half dozen or so shots) and nice clubs. Perhaps the poshest place was back in the 1980s when I shot at the Greenbrier Resort in West Virginia. I was staying there and noticed that trap was offered as an activity. I called the front desk and in short order, a limousine (really!) was sent for me. It took me a few miles to a clubhouse on the top of a hill. The traps launched clays across empty air in the direction of spectacular mountain scenery. The trip to this trap range was worth it even if I had not fired a shot. The location was simply spectacular.

Coming fast forward to now, trap is a fun activity and now that it is so convenient for me to go down that newly discovered road to the next town, I'll give it my best.

STARLINE ROLLS OUT MORE NEW RIFLE CALIBERS: 6.8 SPC AND 7MM-08

SEDALIA, MO – Starline Brass has recently rolled out more new rifle cases for their growing rifle brass line. Now, reloaders can load 6.8 SPC and 7mm-08 ammo using a high-quality Starline case.

The 6.8 SPC was designed for the military as a cartridge that landed between the 5.56mm NATO and the 7.62mm NATO. Built for the AR-15/M-4 platform, the 6.8 SPC offers better knockdown power than the 5.56mm, without sacrificing much magazine capacity or adding much recoil.

The 6.8 SPC works very well in short barreled rifles and is an easy conversion for an AR-15, requiring only a barrel, bolt, and magazine swap. It's a great AR-15 caliber for hunting, especially for recoil-sensitive shooters. Starline's new 6.8 SPC brass is safe to use in both 6.8 SPC and 6.8 SPC II chambers.

The 7mm-08 is a flat-shooting, mild-recoiling caliber that has a devout following of both hunters and competition shooters. A wide selection of 7mm (.284") caliber bullets makes the 7mm-08 a very flexible cartridge.

The 7mm-08 is available chambered in semi-auto and bolt action rifles, single-shots and a few pistols. While the 7mm-08 Remington was commercially manufactured first in the early 1980's, its roots can be traced back to the late 50's as a popular wildcat cartridge.

Visit www.starlinebrass.com today to order Starline's new 6.8 SPC and 7mm-08 brass factory direct, and to see Starline's full line of high-quality handgun brass and growing line of high-quality rifle brass.

Starline is a family owned business that prides itself on producing the highest quality brass cases available at the best possible price. For more than 40 years, Starline's unique manufacturing process and commitment from their team of employees has distinguished Starline from the competition. Starline manufactures a growing line of handgun and rifle cartridge brass cases, 100% made in America.

Stay up to date with Starline's new handgun and rifle case releases, exciting promotions and other great content. Follow Starline at:

BREAKING THE MOLD

By Russell Plakke

Winter time is upon us, which means cooler weather and time to bring out the casting equipment for another session with the molds. Throughout the years that I have been involved with IHMSA I have met many individuals that cast and shoot lead bullets in competition. The little details on how they perfected their bullets/loads has always fascinated me. There are as many ways to do this as there are casters. Over the last five years or so I have begun to shoot more and more cast bullets in competition, including the Internationals, and have found it to be very rewarding. It is amazing how often a row of cast bullets laid out on your mat prior to the next relay attracts other shooters and starts conversations. Many of these shooters have often wondered if we could put together some sort of a program that helps promote and/or recognize cast bullet shooters and does so on a level playing field regardless of classification or ability.

The start of my cast bullet shooting was kicked off by a local shooter named Bob. Bob is a highly accomplished cast bullet shooter out of Colorado, particularly with his revolver. He encouraged me to try some 30 caliber silhouette bullets he had casted. Starting out as a joke, I developed a load for a 32 H&R barrel I had lying around. Now it is my production gun and load. Recoil is light, and my spotter (and wife) loves the way they mark on the target. She is not too crazy about the rainbow trajectory and how long it takes the rams to go down though, but it works surprisingly well. Since then I have converted numerous guns over to cast bullet loads and have not looked back.

This year, 2018, IHMSA will be hosting a cast bullet "fun" competition to provide a spotlight for those that shoot cast bullets within our organization. Match directors, do not fear, we shooters will be responsible for score submittals and it is on an honor system so there will not even be a need for retuning score cards to the shooters. For full details see the official competition write up on the following page. To participate, you do not have to cast your own but the score must be shot with all cast bullets. In an attempt to provide balance between those who shoot in the winter and those who shoot in the summer months, the competition year will be from March through November. Handicaps are provided to allow for all levels of shooters to be competitive in this event. May not be perfect but it is a start and we can improve upon it next year after we see how it goes.

Would love to hear from all you casters on how your loads are doing and how you have made them better. I also hope to see you at the Internationals this year shooting those casted gems! I'll be there, look me up. Man I love this game!

Thanks and good luck,
Russell Plakke
firstchckn@outlook.com

Starline
Made With Pride
in the USA

VALUE IS IN THE BAG

Starline quality and value is in the bag... a new bag. Starline's new look reflects the superior quality brass you'll find in every case and every bag. IHMSA CAST BULLET COMPETITION - 2018

Key factors to accomplish with competition:

- Increased interest in IHMSA
- Recognize and facilitate a segment of our sport in a broader sense
- Promote sportsmanship and fair competition on a level playing field regardless of shooters current ability
- Increase knowledge level of cast bullet value for use in competition
- Be safe and have fun
- Match directors are not responsible for submitting cast bullet scores for this competition, the shooter will be responsible for doing so as described below.

General competition boundaries:

- To be eligible, competitive scores must be shot at a sanctioned IHMSA match between Mar 1 – Nov 31 of competition year by an IHMSA member in good standing.
- Bullets must be of a cast bullet design and have no jacketing with the exception of gas checks. No rim fire or air pellets allowed as a cast bullet
- All IHMSA rules apply to the competition as set forth within the current rule book or have been adopted by the board in recent decisions
- Keep it simple

Competition:

- Two competitive categories.
 - Category 1 - Scoped, includes the following:
 - * UAS/UASHS/PH/FPAS/US
 - Category 2 - Traditional, includes the following:
 - * U/UHS/P/R/S/FP
- Top four scores after addition of handicap shot by individual with cast bullets for the year will be aggregated for each category (Scope & Traditional) to determine that individual's final score.
- Scores will be sent to frstchckn@outlook.com by the shooter for tabulation along with category (i.e. UAS, PAS, etc...) and classification (AA, AAA, INT, etc...) no later than December 31, 2018.
- Scores can be from the same discipline or from different ones within the same category and will be adjusted to a 40 round match as needed.
- Handicap is based on shooters current classification in the category in which the shooter obtained the score. Handicapped scores will be rounded down to the first whole number. The following will be the handicap multipliers.
 - P/R/UHS/US/FPAS
 - * <AA = Score X 135%
 - * AAA = Score X 110%
 - * INT = Score X 100%
 - U/UAS/UASHS
 - * <AA = Score X 110%
 - * AAA = Score X 105%
 - * INT = Score X 100%
 - PH
 - * <AA = Score X 160%
 - * AAA = Score X 110%
 - * INT = Score X 100%
 - FP/S
 - * <AA = Score X 180%
 - * AAA = Score X 140%
 - * INT = Score X 115%
- Example: Shooter is a class AA in FPAS and shoots a 27. Shooter would be handicapped as follows: $27 \times 135\% = 36.45$: After rounding down a score of 36 will be awarded to the shooter.
- If a tie at the end of the competition exists, winner will be selected through a random drawing.
- Prize awarded will be one year membership to the Cast Bullet Association for each category (Scoped and Traditional).
- Write up of the top scoring shooters in the IHMSA news (may also submit to CBA) and will include load data as possible.

SIERRA INTRODUCES NEW 6.5MM 107 GR TIPPED MATCHKING BULLET

Posted on November 28, 2017 by Sierra Bullets
<https://sierrabulletsblog.com/>

Sierra Bullets is proud to announce another addition to our popular Tipped MatchKing® line. In 2014, Sierra Bullets crowned the MatchKing® with an acetal resin tip that lowers the drag by improving the ballistic coefficient. We continue to expand this extremely popular line by adding another 6.5mm option in 107 gr.

While they are recognized around the world for record-setting accuracy, MatchKing® and Tipped MatchKing® bullets are not recommended for most hunting applications. Although MatchKing® and Tipped MatchKing® bullets are commonly used for varmint hunting, their design will not provide the same reliable explosive expansion at equivalent velocities on varmints compared to their lightly jacketed Hornet, BlitzKing®, or Varminter counterparts.

The new 6.5mm 107 grain Tipped MatchKing® bullets will be available in boxes of 500 bullets (#7407C) with a suggested retail of \$205.07 per box and boxes of 100 bullet (#7407) with a suggested retail of \$41.79 per box.

SIERRA BULLETS 300 AAC BLACKOUT LOAD DATA

Posted on December 21, 2017 by Sierra Bullets

<https://sierrabullets.files.wordpress.com/2017/12/300-aac-blackout-12212017.pdf>

Test Specifications/Components

Firearm Used: Universal Receiver

Barrel Length: 16"

Twist: 1-8"

Case: Hornady

Trim-to Length: 1.363"

Primer: Winchester WSR

Remarks:

The 300 AAC Blackout (300 BLK, or 7.62x35mm) was created by Advanced Armament Corp. and Remington in order to provide the military with a way to shoot .30 caliber bullets from the M4 platform with only a barrel change. It has since become popular for a wide range of uses including hunting and home defense.

The cartridge shares case-head dimensions and body taper with the .223 Remington. Not only does this allow for compatibility with existing magazines and bolts, but it allows reloaders to form their own brass from cut-down 5.56mm or .223 cases – ensuring brass supply even in the event of a shortage of factory brass.

The 300 AAC Blackout is a similar concept to previous wildcats, such as the 30-221 and 300 Fireball, as well as the proprietary 300 Whisper®, except that 300 BLK was the first to be a SAAMI approved cartridge and any company is free to make firearms or ammunition.

300 AAC Blackout is also finding use with hunters, who may not have been able to legally hunt with .223 in their state, and who prefer .30 caliber bullets for medium-sized game. It provides similar effectiveness to the 7.62×39 or the slightly more powerful 30-30 cartridges except works in the more up-to-date AR15 platform. Effective range for hunting is about 100-150 yards.

Despite rapidly changing Florida weather, managed to get in a good day shooting. First rain, then sunny, then more rain and wind didn't stop SCGAA's hardy group from having a match. Hopefully we'll have better weather as the season continues. As a bonus, Hope H provided a light lunch for all.

49 degrees and rain all AM. I think we're snake bit on weather. Sept cancelled due to hurricane. Rain in Oct and now more rain in Dec. Hope and I try to promote the matches within the club and at other silhouette events. I send out 2 emails a month to my list, but just too many other more "exciting" events, like action pistol I think. We do get help from Tom and Don, but it's a lot of work for not much return. Sorry to sound down, but it really is getting tough to keep going.

Brookston, IN
Jim Heath, Match Director
October 8, 2017

It was an excellent day for a match. We were lucky this year. We had one 40 shot by Keith Adams. I'm not sure if that makes him international or not. Dave Wood got a 61 fifth scale aggregate putting him in the 60 club. I want to thank everyone who helped with the match. Perry Brown (and I) set up. I think Mike Slusher called the line so I could shoot. Gotta start taking notes Bob painted targets and set up FP chickens and spotted for shooters. Dave, Perry, Mike and Bob put the toys away while I did the bookkeeping. I think we had a pretty good summer. I hope you will all come back for our next match Sunday May 6, 2018.

This was our last match of the year and despite the temperature only peaking to the low 40s we did have about 20 entries for the day. Everyone must have been working hard to end the year with a good score because we did have 3 perfect scores fired in various classes. Bob Ochs shot a 40 and half the little ones in big bore iron sight unlimited and Lynn Shultz had a 40 and 8 in big bore UAS. In small bore Gordon Lash came close to a 50 with a 40 and 9 in UAS, great shooting in tuff conditions guys! We start shooting again in March of 2018 so get all your gun modifications and reloading done for next season. Till then, have a safe and healthy winter and we will see you in the spring. Safe shooting, Steve

TRI COUNTY ROD & GUN CLUB

LINWOOD, KS
OCT. 8, 2017
BY BOB CURRY

The Coveted Rex Cup was once again on the line at Tri County. The excitement was palpable. Expectations ran high as rexpert shooters from Kansas and Missouri lined up to vie for the famed trophy. When the last target had rexpired, the scores were carefully tallied. Bob Curry, Rob Dunlap, and Larry Jackson each garnered a Coveted Rex Point. But it was to no avail, as the rexultant Bob Doherty captured an unprecedented three for yet another year as the Rex laureate. Once again, Margaret and I wish to thank all who participated this year, and especially those who have been so supportive when it came time to do the prep work and run the line. You know who you are, and so do we. We hope to see you back next season. Try to recruit at least one new person to come and shoot steel with us.

In Big Bore Kieran did it again shooting a perfect 40. Way to go! Ron and Jack tied in Unlimited. We gave it to Ron for his 3 to 1 Ram count. Jack shot all 10 of those chickens in FP. I think he has a future in this spot. SB, Perfect weather and another new shooter this month. Steven Hamlin came out and gave a good show knocking down 15 critters. I thought my24 was good in AAA but Roger had a great 27 to take it. He shot 6 turkeys. Thanks for all the help putting animals away fellas.

Big Bore Match

The Sin City Silhouette Shooters put on our own version of the Good, the Bad, and the Ugly this month in BB. The Ugly was a standing score I've been forbidden to discuss. The bad was Debi Wright and Joe Donnelly both struggling with their guns. The good was Sue Redhead shooting a personal best with her Revolver and Joe Kennedy shooting an amazing US-39. Joe hadn't been out to shoot BB in 8 years and wasn't sure about his sight settings at all but he had me to help him thru it. Actually, if he had listened to me he would have shot a 40(long story). Shhhhhh,I know you want to know, the Ugly was Joe K's standing score but after an 8 year lay off you've got to give him a break. Shoot Well, Take Care

Small Bore/Field Pistol Match

It was another small turn out for the Sin City Silhouette Shooters. Joe Kennedy couldn't recapture his US magic from BB Sunday and after another sub par standing score says he won't shoot open sights til he gets new lenses. You can't hit what you can't see. Been there, done that. Debi Wright had it going her way til she got to the rams and she just couldn't find 'em. Art Cheshire made the long drive in from Logandale, shot 3 guns and seemed to have a pretty good time when that damn Charger worked right, which wasn't often. He did shoot a personal best in standing though, so it wasn't a total waste. Shoot Well, Take Care

It was another small turn out for the Sin City Silhouette Shooters with only Gary and Joe Donnelly to keep me company on my birthday, Joe struggled again with his Revolver and didn't have time for another gun this month. Gary and I "cheat" together all the time and he does so much better on those days, and then his old eyes fog out on match day. One of these days he's going to get it all together, I'm sure. Even if he isn't. Shoot Well, Take Care

With Kate moving to AZ and Art and Gary being unable to stay healthy the Sin City Silhouette Shooters keep having small turn outs. Gary did make it thru one gun today but couldn't get thru a 2nd. Joe has stopped shooting open sights til he gets new lenses but he did shoot 2 scoped guns. That helped. Debi took my advice and changed her ammo but didn't come out and "cheat" with me to get it dialed in so she only shot a UAS 38. Next time Debi? I don't normally talk about my shooting but I shot a 33 standing with 9 turkeys and I'M TELLING EVERYBODY!!!!!! Sorry about that. I think the last time I hit 9 turkeys I shot a 27. What? How? Never mind. Our next SB match is on Christmas eve so I'd like to wish everyone a Merry Christmas and a wonderful Happy New Year. Shoot Well, Take Care

November is a very special month in that we celebrate Thanksgiving and Veterans day at our Saturday night meal. We had a delicious meal, and I want to thank all the chefs and bottle washers. We ate turkey with ham and all the fixens. It was a real feast!!! If you did not make it to dinner, it was fantastic and your loss. We have quite a few vets in our club. WE HONOR ALL VETS. We cannot thank you enough for your service. It is a pleasure being around these guys, and shooting with them. It was good to see the out of town friends show up to mingle, dine and shoot with us. We had plenty of guns shot. Al Miyamoto shot his first ever 40x40. This was shot in small bore UAS. He told me it took him 20 years to do, I hope this is just the beginning with many more to come. Eric King posted a 39 in 1/2 size with all 5 shoot-off targets. This makes him our match winner for big bore. Val Shaver posted 2- 40s in practical hunter, Jerry Napier a 40 in small bore UAS, Hulan Matthies a 40 in big bore UAS, and Steve Howard got 40 small bore UAS on a rerun. Great shooting!!!

We put 15 entries across the line this month. This was our first match of the year that we didn't have to fire up the wood stove. Temperatures were in the 70's a perfect day for shooting steel. On to the results of the match. No 40's this month. Vince Leete posted an U-AAA, 37 followed closely by Richard Nicol with a U-AAA, 35. Steve Bishop posted a nice R-AAA, 34 followed by a P-AAA, 33 both shot with his FA. Joe Stumpf posted a respectable UASHS-AA, 33. I managed a pair of 27's in UHS-AAA and US-AAA. In Small bore Vince Leete posted a P-AAA, 22. Joe Stumpf posted a UAS-AAA, 35. On the Field Pistol side Vince Leete posted a PAS-AAA, 28 eking me out by one target to my PAS-AAA, 27. Joe Stumpf posted a PAS-AA, 23. I ended up with a P-AAA, 19 Our target setters did a fantastic job getting our targets set. Thanks to all who came out to shoot the match and also to those who stayed to help pick up targets after the match. Until next time shoot straight and be safe.

We put 16 entries across the line this month. Last month was our first match of the year that we didn't have to fire up the wood stove, well it was back to the ole wood stove for this match. Temperatures were in the low 30's when I arrived and probably peaked in the high 30's for the day. On to the results of the match. Only one 40's this month shot by myself in U-Int followed by Richard Nicol with a U-AAA37. Steve Bishop posted a P-AAA, 26 edging out Richard Nicol's P-AAA, 21. I managed a R-Int 37. Joe Stumpf edged out Vince Leete in UHSAS. Both posted a UHSAS-AA but Joe out rammed Vince. In Small bore Ron Craig posted a US-unc, 19 starting him out in A class. Vince Leete posted a very nice UAS-Int, 39 letting just one ram get away. Steve Bishop posted a UAS-AA, 26. Vince Leete posted a P-AAA, 22. Joe Stumpf posted a UAS-AAA, 35. On the Field Pistol side Vince Leete posted a very nice PAS-AAA, 32. Joe Stumpf posted a PAS-AA, 21. Ron Craig posted a PAS-B, 21 which will move him into A class for the next match. Our target setters did a fantastic job getting our targets set. Thanks to all who came out to shoot the match and also to those who stayed to help pick up targets after the match. Until next time shoot straight and be safe.
