 - Iron Man

Nancy LaCroix - President and Cindy Smith put in countless hours in the stat house keeping everything straight.

Over 80 shooters and getting toward 600 entries crossed the line at the 2014 IHMSA World Championship in Oklahoma City in July.

With cooler temperatures the first few days increasing into very warm temperatures by the end, this year's event was blessed with little wind for the entire 8 days as well as good light conditions, and the shooting results showed the benefit of these conditions.

With around 200 entries more than

last year's World Championship, this event was an obvious success. In addition to the United States, the countries of Australia, Brazil, Canada, and Paraguay were represented.

The annual banquet had many big winners as well. The top prize went to Dave Silva as he was drawn first for a new Ruger handgun. A huge thanks goes out to our many supporters in the industry.

As for some facts concerning the shooting at the World Championship, here are some impressive statistics passed along to me by Jim Fields.

A total of 77 perfect 80x80s were shot, which may be a record in itself. Four 80x80s in fifth-scale is a record. For a breakdown of these perfect scores by discipline:

- 2 were shot in BB Production
- 7 were in BB Unlimited
- 19 were in BB UAS
- 6 were in BB 1/2 scale
- 7 were in SB Unlimited
- 21 were in SB UAS
- 4 were in SB 1/5 scale
- 4 were in Practical Hunter
- 7 were in Air Pistol

As anyone who has attended a match of this caliber knows, it takes a lot of people to make this happen. Serving as match director, Jim Fields certainly did another fantastic job of putting this together. Jackie Brown and Dave Stone did an incredible job calling the line. Dave even called the line on the 9th day for the 500 meter match. Jim Myers deserves a great deal of credit for coordinating the line officers. Jim doesn't even shoot silhouette, but was there every day, all day. Nancy LaCroix and Cindy Smith kept things organized and in order in the stat house. John Frizzell was there checking guns on and off the line a large number of the days. The target setters worked their tails off, keeping the match going and an incredibly brisk pace as it seems things were usually running ahead of schedule. These are just a few of the many dedicated people who helped make everything work to put on the fantastic event.

A huge thanks goes out to all of the members of the Oklahoma City Gun Club and all the volunteers who made the 2014 IHMSA World Championship a great success.

President's Column

The 38th IHMSA World Championship is now over. Five countries participated; they were as follows; Australia, Brazil, Canada, Paraguay and the United States. We had 100 competitors and 600 guns shot over the course of the seven days. Our annual IHMSA Board meeting took place and no new rules had to be voted on. However, we will be reprinting the rule book this next year to include the Practical Hunter category.

On our trip to Oklahoma this year, Ken and I took a tour of two industry supporters, one was in Iowa at the Brownell's operation, they have been a longtime supporter of IHMSA and the other one in Kansas at the Manufacturing Services, Inc. from who we purchased our logo chamber flags from this year and in return, they donated a quite a unique product called the bottle eze. The bottle eze is a plastic holder for water bottles that you hook into your belt or pant pocket so you can carry your water hands free. They have a patent on it and they even put our IHMSA logo on it.

Brownell's is currently building a huge warehouse with a state of the art computer processing system and they are adding a clothing line. We were given the tour by the president, Pete Brownell and met his father Frank Brownell who is the current CEO. It was amazing to see their operation and to see a family owned business that is very successful.

Manufacturing Services, Inc., is also a small family owned business that is run by a husband and wife and their children. They mold plastics and make items like the chamber flags, bottle eze, and many more items at a very reasonable price. Again, it was a great tour of their manufacturing operation.

This year is leading into my last year as your president, a comment was made

to me that all the past presidents of IHMSA seem to go away after their term is up. That will not hold true for me; Ken and I just want to enjoy more of the shooting end of this wonderful game and not have to be concerned with the administrative duties. So we are looking for someone to step up and take my position. Please note, I will work diligently with that person to go over the duties of the position so a smooth transition can be made.

I also want to take this time to thank Steve Martens for serving as VP and to welcome Dave Smith to this position. Dave will be serving as Region 8 and VP until a Region 8 Director is appointed. Please join me in welcoming Dave to the IHMSA Board. Cindy, Dave's wife is also our new HQ Volunteer Administrative person, who will be handling this position while working full time outside of her IHMSA Duties. Please note that the IHMSA Board talked about this and if you need something resolved or have a question on, we are asking you to contact your regional director, or you can contact me directly and we in turn will contact Cindy to help eliminate some of the stress on her.

Until next time, shoot often and safely.

Update Concerning Recent Perfect Standing Score

by Joe Frey

As was reported in the August issue of the *IHMSA News*, Joe Cullison fired a 60x60 at the West Coast Championship in Big Bore Unlimited Standing. This was thought to be the first perfect standing score, in that the IHMSA World Records showed no evidence of it, and of the several 20+ year standing shooters who were aware of Mr. Cullison's accomplishment at the time, nobody had ever heard of a perfect standing score. Even the ol' Google search didn't show any evidence of an IHMSA perfect score, though many could be found for NRA matches. I must admit, I found this curious because I couldn't imagine NRA shooters being that much better than IHMSA shooters, knowing how many fantastic and well-accomplished people we have in our sport and our organization.

Well, as it turns out, the NRA may not have better shooters—they just have better record-keeping! Thanks to a few contacts from faithful IHMSA members, as well as the lengthy research performed by Region 1 Director Allan Olsen, it was discovered that this indeed was not the first perfect standing score in IHMSA.

An email from Brian Witzeling was the first one I received, followed by a couple of others, noting that he remembered Jeff Hunt of Kalamazoo, MI shooting a 40x40. When it was brought to our attention that this tremendous feat had possibly been previously accomplished, Allan Olsen took the time to go back through his copies of the *IHMSA News*, dating clear back to 1991, to verify this.

In the beginning of 1999, Blair Hamilton took over the Big Bore Records Program. His June 1999 article indeed reports a 40x40 BB US score by Jeff Hunt

fired on April 25, 1999. Then in the October 1999 edition, he reports Mark Resner (from North Dakota) shooting a perfect score on August 23, 1999 at Bison, SD. In that article, it states that 40x40 as being the 2nd known perfect standing score.

Another informative conversation and great history lesson for me came in a phone call from Lon Pennington. In what turned out to be a quite lengthy conversation, Lon mentioned names such as Marvin Tannehill and Roger Ward as people he believe may have achieved perfection in the standing realm.

While this does not diminish Joe Cullison's great accomplishment—doing something which had seemingly been forgotten or lost to history certainly is an accomplishment—we certainly appreciate the efforts by our members to get this information corrected. It should be noted too that Joe's perfect score was a 60x60 as opposed to the 40x40 scores listed above.

In the near future, I plan to get the existing known records posted in the *IHMSA News*, that way people can see the records we currently have on file. With multiple people conducting the various records programs over the years, one can easily see where maybe something would have gotten lost over time. By posting our existing records, this may bring about other great conversation of times and events which may not be known to current members.

Thanks again for the contacts people have made to me concerning this, to Allan Olsen for his work in researching this, as well as Joe Cullison for performing an accomplishment so exciting that it has allowed us to generate renewed conversation about our sport.

Contender Misfires:

What Causes Them, and What To Do About Them

Part 2 of 2
by Mike Bellm

Editor's Note: This is the 2nd part of a great article by Mike Bellm. Part 1 was featured on page 5 of the August edition of the IHMSA News.

Once in awhile a barrel will be too long from the hinge pin back, and the barrel will hit on the breech face before the locking bolts drop down far enough to engage the frame. Not common, but it does happen. You could try to send it to TC, or you can contact me, or take a few judicious strokes with a file on the end of the barrel to correct this. This is rare, so don't go whacking on your barrel until you are sure this is needed.

Once in awhile the chamber is not cut deeply enough for factory ammo or new factory cases, rimmed or rimless. Usually TC chambers are cut amply deep. You are most likely to encounter this problem with custom barrels. Cutting the chamber deeper is the cure if it is for a factory round, best done by someone who knows what he/she is doing with chamber reamers. If it is for a wildcat round, the size die may need to be shortened enough to permit it to push shoulders back farther.

But... 9 times out of 10, **failure to lock up is due to a loose nut on the reloading press—the operator.** Virtually nowhere I have seen are you being told in the mainstream gunzines or by most of your guru buddies about the fact that "give" in the frame lets cases grow in length when fired. If this extra length of the case is not removed, guess what? The case is too long for the chamber. If it is too long for the chamber, guess what? It has to be crammed in by slamming the barrel shut. And if it is severe enough, even slamming the barrel shut will not push the case into the chamber far enough to allow the barrel to close fully and lock up as it should... thus due to the No. 1 cause, cases too long. Then you get misfires.

You must bump shoulders back or eventually be faced with misfires and extraction problems due to cases too long for the chamber.

And by "too long", I am talking about from shoulder to head on bottleneck cases, not the overall case length.

Bottom line is this. The Contender is not a bolt action. Nor is it a fixed barrel single shot rifle. It is a break open design. It does give when fired, and this "give" lets the cases get too long.

And, you CANNOT do an accurate job of adjusting the size die with the barrel on the frame, unless that is, you take steps that I am not going to cover here. With the barrel on the frame, anything you do by the way of size die adjustment is a blind stab in the dark. You can make it work, absolutely, but you won't hit that "sweet spot" where it is just right.

The best results are normally where the case head sticks out of the chamber about .001" LESS than what the gap between the barrel and frame measures, i.e. such that the breech face is not cramming the case forward and up in the chamber

when you close the barrel.

At this point, I refer you to The Experiment Every Contender Shooter Should Perform. Read it, do it, and you will then understand what happens when a case is fired in a Contender. Knowing what happens, you will then see one of the most common, most useful cures for misfires.

And guess what? Your misfire problems will most likely suddenly go away. But don't be too surprised if extraction is easier and accuracy is also better.

Hint: If a case sticks out of the chamber too far because it is too long from shoulder to head, what is the situation when a bullet is seated out too far? Same thing, and the same potential problems.

Another hint: If you continue to fire rounds that are too long and slamming the barrel shut on them is only giving minimal lock up, you stand a strong risk of rounding the locking table in the frame and ruining it. It may be locked up enough to fire, but the minimal contact surface between the locking bolts and the frame cause accelerated wear on the frame at this point. When this happens, the next step is the barrel coming unlocked and flying open when fired.

I think this is a good time to insert my favorite quote:

"Most men occasionally stumble over the truth, but pick themselves up and continue as if nothing had happened."

--Winston Churchill

Many erroneous ideas exist about sizing cases. Many times they work fine for years, whether they are well advised or not. But again, 9 times out of 10 when someone complains of misfires, it is due to not full length sizing cases and doing it correctly. If you understand this point and try other methods, you will at least know what to fall back on when misfires do occur.

The Experiment Every Contender (and Encore) Shooter Should Perform
Step 1:

When the Contender (or Encore) is fired, the frame stretches within its limits of elasticity, then relaxes when the pressure drops. This leaves the fired case longer from shoulder to head than it was before it was fired. You will never see this with the extractor installed, but shooting the barrel without the extractor will show you clearly what happens when a round is fired.

This additional length must be removed when the case is resized, or it will interfere with lockup and cause misfires and accuracy problems.

DO THIS:

Take the barrel off the frame.
Remove the extractor by tapping out the 1/16th roll pin that holds it in.

Drop one of your sized bottleneck cases into the chamber.

The case head should be flush with the end of the barrel. If it isn't, you need to adjust your sized die down in small increments until the case head is flush with the end of the barrel or protrudes no more than about .002". If the case head falls below the end of the barrel, you have pushed the shoulder back too far and created headspace. You can rely on "feel" as you run your finger across the end of the barrel and

case head, or hold the end of the barrel up to eye level and sight across the end of the barrel to determine that the case head is not sticking out of the end of the barrel. .002" is difficult to see... it is not much.

Now load this case with a full normal load, and shoot it.

When you open the barrel without the extractor installed, the case head will be in the position it was when fired.

Take the barrel off the frame and look at the case head again. It will usually be sticking out of the end of the barrel about .010" or more.

This excess length must be removed, i.e., you have to bump the shoulder back in a full length size die. Neck sizing is out. If you insist on neck sizing or just partially full length sizing and have misfire problems, this is the reason.

Typical barrel to frame gap is normally from 0 to about .004". Some will be up to about .006" or so. To be more precise, close the barrel on feeler gauges to determine exactly what the gap is.

Your sized cases should not protrude from the end of the barrel more than the amount of the barrel-to-frame-gap.

Failure to understand the above is one of the two main causes for misfires, and accounts for a big percentage of the questions I get.

So at the first hint of misfires, CHECK YOUR SIZE DIE ADJUSTMENT.

Cases grow in length when fired in these break open guns. DO NOT TRY TO CRAM THEM BACK IN BY SLAMMING THE BARREL SHUT. It is like trying to drive a square peg into a round hole. It just won't work.

Step 2:

...to demonstrate that the firing pin strike collapses the shoulder of rimless bottleneck cases that have a traditional long sloping shoulder angle substan-

tially, thus increasing headspace.

Using our Bellm Headspace Indicator or a depth micrometer with the barrel off the frame and the extractor removed, drop an empty primed rimless bottleneck case into the chamber and measure where the case head is in relationship to the end of the barrel.

Install the barrel on the frame.

Fire the primer.

Remove the barrel from the frame.

Measure where the case head is in relationship to the end of the barrel.

You will find that the firing pin has driven the case INTO the chamber at least several thousandths. Thus, if let's say, you started with .003" actual headspace, in the milliseconds before the powder is ignited and pressure builds, the headspace has been increased by however much the case is driven forward by the firing pin.

Functionally, you now have excess headspace.

Excess headspace and anything that softens the briskness of the firing pin strike contributes to misfires and/or erratic primer ignition and poor accuracy. Note that this also occurs with neck sized cases where the body of the case is binding on the chamber wall and not letting the case shoulder make firm contact at the chamber shoulder.

To alleviate erratic ignition and misfires due to cartridge DESIGN...

1) Choose a rimmed cartridge or a cartridge with a sharp "Ackley Improved" type shoulder angle that resists collapse of the case shoulder under the impact of the firing pin.

2) If it is a rimmed bottleneck cartridge, set it up with the minimum headspace so the forward stopping point on the case is the rim and the case is not touching at the shoulder.

Installment Plan Life Memberships

The Installment Plan for Life Membership allows you to purchase a Life Membership by making four monthly payments of \$105.00 each (a total of \$420.00), or in the case of a spouse two \$50.00 each (a total of \$100.00). When your last payment is received, Headquarters will send your Life membership card, certificate, and pin.

If you're in the middle of your membership year, you can purchase a Life Membership now and apply the unused portion of your current membership. Call IHMSA Headquarters at (801) 733-8423 to find out how much credit you'll received for your current membership.

Life Membership is a great way to enjoy IHMSA for years without the hassle of paying yearly dues and show your support of IHMSA at the same time... order yours today!!!

2014 Rule Books

Dear IHMSA Members,

In an effort to keep costs down and with the only changes being the addition of the Practical Hunter category, Headquarters has been directed to not print the IHMSA Rule Book for 2014, but to send an addendum with these changes instead.

We understand that it is important for the membership to have access to the rules. Therefore, since the 2014 rule book is available on our website (go to ihmsa.org, then click on the RULES link). Headquarters is being directed to only send rule books with New Memberships and upon request for replacement. If you need a rule book, please contact headquarters.

Thank you for your patience and understanding in this matter.

Nancy LaCroix
IHMSA President

~NOTICE~
Please keep your 2013 rulebook for the 2014 season. You will receive an addendum with your membership renewal

Rules Addendum: Practical Hunter

Class Description: All 3 classes are to be shot from any SAFE freestyle position including prone, kneeling, sitting, or standing.

The Practical Hunter Long Course will be shot on the 200 meter Big Bore range with the standard full size targets at their normal ranges.

The Practical Hunter Short Course will be shot on the 100 meter Field Pistol range with the standard targets at their normal ranges, using standard field pistol cartridges only.

The Practical Hunter .22LR Course will be shot on the 100 yard SB range with the standard Small Bore targets at their normal ranges.

Class Rules:

- Any hunting style handgun with

a maximum overall length of 21 inches.

- Optics are allowed up to a maximum of 6x power.
- Gun must be as manufactured with only cosmetic modifications.
- Ported barrels are allowed as long as they are shot from a safe position.
- A rest such as a bipod or a sand-bag supporting the barrel in a prone position may be used by a new unclassified shooter and by shooters in classes A and AA.

Classification Scores:

- A 0-15
- AA 16-25
- AAA 26-38
- INT 39-40

SANCTION FEE NOTICE

Please make every attempt to send in your Sanction Fees promptly as the Sanction Fees help us pay for the printing of the Match Results.

Infrequently we have a club(s) that does not remit sanction fees for a match held. We understand club officers are busy, so we just send a gentle reminder. Still failing to receive the fees, a second notice is forwarded.

A final notice is sent if fees are still delinquent. After the final notice, the match dates will be deleted from the match schedule and the club's sanction will be withdrawn until the fees are received.

NOTICE

The IHMSA Board of Directors have voted to allow the printing of NRA match results in the *IHMSA News*, providing they are submitted by a club that is running dual (IHMSA/NRA) sanctioned events.

These results must be submitted by the established deadline presented in the previous edition of the *IHMSA News*, with the Dual Sanction Match Write-up and will be listed at the end of the IHMSA related report. No NRA reports will be printed without IHMSA reports/scores accompanying them. **Please send all Match Reports to IHMSA, Inc., P.O. Box 22356, Cheyenne, WY. 82003 Phone - 801-733-8423, FAX: 801-733-8424**

Diary of My First IHMSA World Championship

by Richard Slaton

Editor's Note: For those who know Richard Slaton of Tuscaloosa, Alabama, you already know the outgoing personality he brings with him any place he goes. Having shot IHMSA for just a few years now, Richard participated in his first World Championship this July. Knowing how detailed he is in his continued efforts to improve as a shooter, I asked him to consider submitting an article detailing his experiences—which he readily did. Richard and Patti arrived in OKC on Saturday to absorb the scene, and then he shot on Sunday-Friday. This is a fantastic account of a shooter's great experience and what he learned from it to continue his growth in this sport.

Day 1—Sunday July 20

Well, I guess I can now say I have shot in the IHMSA World Championship! After arriving in OKC before noon on Saturday, I got to take in the sights at the range and learn through observing, helping me prepare for my own actual shooting today.

Things did not go as well as I had hoped, but did go as I expected. Honestly, it was as good as I should have been for a "AA" and "AAA" shooter participating in his first World Championship.

My first ever World Championship entry was in UFS, and as most know, some days you can see the targets and sometimes you can't. Today was somewhere in between. On my 2nd bank of chickens, I shot the first chicken, and when I looked up, the first was still standing and the second was gone. I'm thinking I have done what I normally do at least once a match, which was SHOOTING OUT OF ORDER, which pretty much rattled me for that bank. However, after that bank, the guy running that part of the line came up and told me that I had hit the 1st target; however it did not fall. The 2nd target did fall, which was a malfunction, and that I could have an alibi. So, this let me feel somewhat better—until on the alibi shot, I did hit the target but because of let's just say a little interference, I shot the alibi before the "FIRE" command, so it did not count.

Now I'm rattled/embarrassed worse than before. The next bank, the same thing happened with hitting the first target but having it stay while the second fall down (this is real life—you can't make this stuff up!). But I manned up and made that alibi shot, this time after the "Fire" command. At that point in time, I'm thinking my best option might be to pack it up, say I've been there and done that, get my T-shirt, and go home. But then I found the humor in it and realized if somebody asked years later if I remembered by first entry at the World Championship, I would definitely say "Yes!"

The score was not a new high for me, but is a new memory. I did feel a little better after I saw a real shooter shoot the Small Bore turkeys instead of the Half-Scale turkeys that he was supposed to be on.

Next up was Unlimited Small Bore with Joe Frey as my spotter. I shot the sighter's missing low on the pig and getting center

hits on all the others. I re-shot the pig and center punched it the second time around.

Now to the firing line. I cleaned the four banks of chickens and the first two of the pigs. The first shot on the 3rd bank of pigs went between the legs (remember my sighters—lol), then cleaned bank four.

Onto the turkeys! I cleaned the first 2 banks of those birds, then I did what I normally do in the course of a day—shot out of order! I lost two on that bank, and then cleaned the fourth bank, so now I'm down 3 shots heading into the rams.

I hit high on the first ram, then overreacted and shot under the next one, so now I'm down 4. I then missed the first ram on the last bank, so I finished 5 down for a 75x80, which converts to a 37 which ties my highest score.

I had a blast on this first day. I got to hang out and spot with the Frey brothers, spent a little time with Allen Gaskin, and met a lot of people. David Smith spotted for me on fifth-scale and thanks to him for that. I got to watch Dan and the California crew do their thing. I'm pumped up about the fun I will have tomorrow. Up next for tomorrow—UASFS in the a.m., and SB UAS in the p.m.

Day 2—Monday July 21:

I started with FS UAS and because of all the problems yesterday on the chicken targets on the "red" bank, I decided to use the yellow bank. The line officer agreed as well. However, the yellow bank was not any better, so I ended up having to use the yellow and red banks to have 5 targets to shoot at.

I cleaned the chickens and missed one pig. Then the turkeys ate my lunch! But I ended up with a 70 UASFS, which converts to a 35, which is a new high score for me, so I'm with this score, a happy camper.

Next up—Small Bore UAS. I was clean through the 2nd bank of turkeys, missed two of those darned turkeys, then finished by cleaning the rams. A SB UAS score of 78, which is a 39 converted is not bad for a "AAA" shooter, I was a happy camper once again.

I had a fun day. Spent time with Jackie Brown and was on the line with John Anderson. After the match, the Frey family and the Slaton family went to Pop's for ice cream to celebrate Mrs. Slaton's 59th birthday, followed by dinner with Allen Gaskin and his wife, Shella for more celebrating. Fun day! Tomorrow—SB standing in the a.m., SB production in the p.m.

Day 3—Tuesday July 22:

Well, the heat is here, but that is no excuse. Starting off with SB standing, I shot the lowest score I have shot in 2 years. Started off badly, and without a spotter, I just never recovered. I was on the line with Captain John and Steve Martens (who made my sights). John was asking me how I liked the Martens set up—I told him I was sold on them, but today they were not miracle workers!

After adding up my score, I was writing the total on my score card. A guy leaned over and said, "Oh, are we supposed to convert it to a 40 round score?" I looked at him, and replied, "No dude, that 31 is my 80 round score!" I thought Joe Frey was going to wet his pants laughing. Once again, this is real life stuff that you can't just make up!

On to SB production. Being a "INT" SB production shooter (the only thing I'm INT in), I'm supposed to be able to run with the big dogs. And I did... until I got to the turkeys. As it always seems, I got one of those "Houston, we have a problem" bumps in the road; however, I seemed to get back on track with spotter help from Joe. Then for some reason, I decided to miss the first ram in all four tries, ending up with a middle of the pack 67.

A pretty good day today. All in all, most of the people are really nice—especially the locals.

Tomorrow I start with SB US using my production/standing gun—the same gun I shot both events with today.

Day 4—Wednesday July 23

Today was a record-setting day. I may be tied or set a new low SB US score, and did set a new low BB standing score for me. And thanks to Jackie Brown for bailing me out on the BB standing or it could have been a new all-time low for a World Championship! But on a good note, today was the last of 2 days of shooting standing, and today was the most fun I have had!

I spent time on the line with Richard and Janie Porter whom I met a few years back at their range in Sweetwater, TX. I also spent time with the Bakkens, a super nice couple from Canada, and a host of others that I did not always catch their names. It is always a good start when you're greeted by the always-smiling Jackie Brown and John Anderson. The weather was a great 101 degrees in the shade with 95% humidity, making it just like being at home.

Day 5—Thursday July 24

Well, it is all but over. And yes, it was Alabama day. And Alabama won the first gun, but Oklahoma won the second. I started the day with UAS HS and was clean until... you guessed it, the turkeys. I went 15/20 on those. Got back on track with rams, going 18/20 and finishing with a 73. That equals 36.5 for a new high score for me and put me in 1st in AA UASHS, so I was pretty happy with that.

The second gun, BB UAS (same gun) finished my first World Championship just like I started—doing everything I could to shoot myself in the foot. And I did a great job at that. Let me just put it this way—I shot 79 times, knocked over 78 targets, and my score was 75. I will leave the rest to your imagination.

Either way, I shot 10 guns, had 2 new personal best scores, and tied two other high scores, so I was somewhat pleased with the way I shot 6 of them. I had great fun spending time with Mr. Fields, Jackie Brown is top notch, I got to spend time with an old friend and meet some super new ones.

But the main thing I learned from this match is that the World Championship is no green monster. There is no reason for a new shooter such as me to be intimidated. The people on the line took very good care of me and made it a great experience.

Return to Home:

Well, I'm back home in Alabama, and with an 800 mile drive, I had time to fully analyze my first World Championship. And after doing so, it was still a positive adventure.

Jim Fields, Jackie Brown, and the whole OKC bunch, along with the help of Cindy Smith, is what made this boat float! I rate them right up there with the Georgia and the Oregon bunch, and that is some good company. Every IHMSA member needs to thank Cindy regularly.

As for the range, the target visibility was as good as I have seen, and I think that is about all you can ask for. The main

complaints I heard was it was hot some days, some days it was windy, and every day you shot down hill. Well, suck it up, this is the World Championship. "Conditions" is what separates world class shooters from the rest; "conditions" is what brings the cream to the top. I thought the "conditions" were actually mild, but I'm still willing to use it as my excuse.

My "shooting highlight" was 1st place in AAA SB U with a score that was in the middle of the pack in the INT scores. This one means a lot more than the AA UASHS or AA BB US first place finishes.

My "fun highlight" was a three-way shoot off for first place in AA UASFS. Coming in second isn't all that bad!

My biggest disappointment was the lack of afternoon and evening group socializing like they do at the WCC. But at the WCC, most camp at the range, and sharing food everywhere reminds me of tailgating at a football game. At this World Championship, most people stayed at hotels.

I think the price for admission was a little overpriced, both for entries and the banquet. But this was the World Championship.

As for advice from a first timer, I think it was/would be a lot more fun to go as a "AA" or "AAA" shooter than as an "INT" shooter. If you are going as an INT shooter and you're going just to win and you can't handle the "conditions", then it could be a long week for you. Yes, this is the World Championship to decide the best in the world, but sometimes that fly in the ointment is what causes excitement.

Would I ever go to another World Championship? I hope to, but not every year. Would I ever go back to OKC? In a heartbeat! Of course, all of this is solely my opinion, and opinions are just that.

Final Notes to Self:

- 2 guns a day was the right call—no more, no less.
- Shooting BB Unlimited or half-scale unlimited would have been more fun than shooting SB US.
- If you're lucky and get a spotter, distrust exactly what you need to hear and what you don't need to hear. The main thing for me is to keep ME on the correct target and let me know of any shot trending.
- All my standing shooting shots trended high (shooting down hill at this range) was not a problem with free style.
- Felt tip pen writes better on score cards than ball point!

KEN LIGHT MFG.

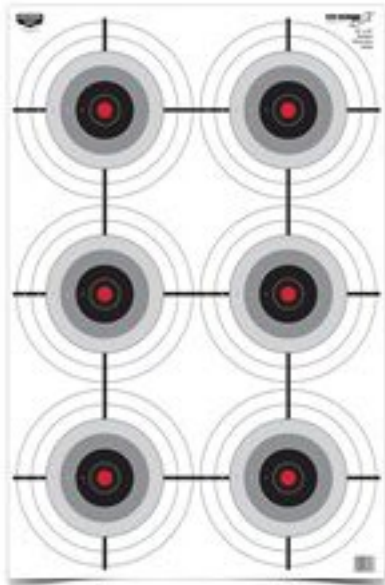

The New Silhouetter

By Ken Horowitz

The imagination of target manufacturers is highlighted in the continuing flow of new targets from Birchwood Casey. Whether shooting for score, measuring groups, practicing for a match or just having fun plinking, Birchwood Casey seems to have something for everyone and keeps adding to its repertoire.

Most recently, I've tried three of Birchwood Casey's Eze-Scorer 23"x35" targets. One is a two bullseye target, one is a 6 bullseye target, and one is a "52-Card Shootup." The advantages of these targets include the sheer size and the number of bullseyes or shooting points per target. Our target boards at Falls Township Rifle and Pistol Association are the typical 24"x36" that are found at many ranges. The Birchwood Casey targets utilize the full 23"x35" sheets that I saw millions of passing through sheet-fed presses when I was in the printing business. By the time these sheets are stapled to the target boards, that 1" difference disappears and the shooter gets full utilization of the entire backer board.

For open sight practice, I like the two bullseye version, vertically positioned,

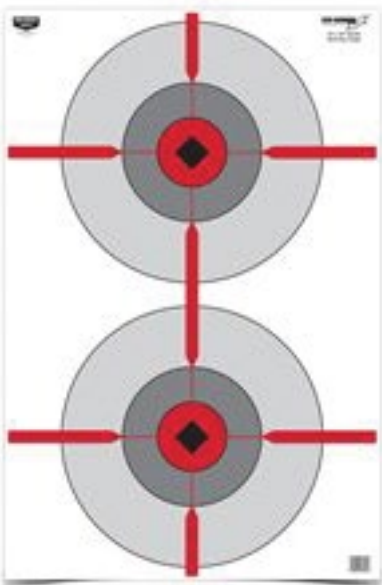

time downrange. The "52-Card Shootup" can be set up for a full day's range shooting, especially with a well sighted and aimed 22LR. There are actually 56 cards

per sheet, including all the cards in a full deck, two Jokers and two additional targets. Each separate card has multiple aim points. For example, every suit has two symbols for that suit (spade, heart, club or diamond) plus the center point of the card. I have yet to use a full sheet at one range visit!

While the two bullseye targets are more practical for competition practice,

saving one-half of my trips downrange to change targets. For some open sights and many scoped guns, I like the 6 bullseye target, greatly decreasing my walk

the "52-Card Shootup" brings back fond memories of the use of playing cards for targets when I was in my youth. My friend Tommy and I would have contests on who could completely remove all the red diamond from a card similar to some boardwalk gallery games. The difference was that we really aimed rifles that shot fairly well instead of the virtual spray and pray of the beat up 22 shorts or BBs that they usually had at the boardwalk.

At the then spectacular distance of just 21 feet, we were always both successful at achieving a ragged hole with all white around it, having completely removed the red. The only contest was who did it first and the winner/loser changed just about 50-50. Reporting the results was always fun. When asked by other friends how we made out, even if Tommy won I could always say I came in second place and Tommy was next to last! For the past 20 years or so, I don't recall shooting anything at less than 25 yards nor have I kept in touch with Tommy, but it would be interesting to try clearing the red at the greater 75 feet distance. I suppose I could get one sheet of "52-Card Shootup" to last a very long time.

Birchwood Casey just announced three new targets in its Ground Strike line. I've previously written about these types of reactive targets made from a firm resin material that almost seems to heal itself. These targets take a pounding with all kinds of fodder including 22LR, pistol and rifle cartridges. Two of the items that are on the way to me are "dancers" where the target is held on a spring like base to wobble back and forth upon being hit. The

third Ground Strike is its Hex Ball Target that is free to spin, fly and dance wherever it pleases. It seems to have more nooks and crannies than the previously tested Ground Strike Jack target. The indentations and cutouts ensure that every shot will result in its own particular reaction. I can't wait to get my hands on these new offerings from Birchwood Casey.

Returning to one of the threads in last month's column, I've now shot my third CMP match at my new 200 yard standard instead of the 100 yards I have been using for the last couple of decades. While not my personal best using my Garand, I have now shot my highest score in over five years, more or less confirming my comfort with the 200 yard sight picture over 100 yards. This also points out the benefit of keeping some sort of records to verify that what you are thinking is true (or debunking it if that is the case).

I expect the same positive result when I eventually return to shooting my Bushmaster AR at 200 yards in lieu of my 100 yards to date. The Bushmaster, being a tight target rifle will always outscore the rack grade Garand, but right now I'm having too much fun with the battle rifle. While the 30-06 uses considerably more powder and bullet weight than the 223, as long as I can get supply, it will remain fun.

I've had some time to play around with the new Hodgdon Reloading Data Center. I was so used to the mechanics and protocol of working the previous Data Center version that I grimaced to myself when things weren't the same. Well that changed quickly as I saw how to navigate the new site and get on screen comparisons of much more data than in the previous version, including the ability to get up to four different cartridges for comparison on tabs. I actually do a lot more "flat screen reloading" than I do at the bench. Besides satisfying my own curiosity, when I do go to the bench, it's with purpose and a plan as to exactly which of my components and recipe I will use. Despite my passion for the hobby, I find less and less time to stand at the bench so tools such as the Hodgdon Reloading Data Center pay off big-time for me.

Hodgdon recently announced its launch of three new professionally produced how-to videos on its Reloading Data Center. The videos cover rifle, pistol and shotshell reloading basics in an easy to understand step-by-step format. Recognizing the current vogue of using hand-held devices, the videos are compatible with smart phones and other devices. When I first went to the Reloading Data Center to view the videos, they did not jump out and hit me in the head. Although they were hiding in plain sight, I had to scroll down and pay attention until I saw them. It must be the male "Where's the milk?" syndrome as we stare into the refrigerator waiting to be berated as our spouses point to the container within inches of our face. Anyway, these

Competition Bullet Seating Die

"No seating die on the market is built to this level of precision!"

- Alignment and accuracy are enhanced by the cartridge case and bullet being completely supported and aligned in a close fitting, precision ground sleeve before the bullet seating begins.
- The bullet guide is so precise that a bullet can be demonstrated to "float" on a column of air.
- The seat stem is precision ground to exactly match bullet diameter.
- The micrometer is calibrated in .001" increments for precise seating depth and is infinitely adjustable (without clicks).

"The Redding Competition Seaters are, without question, the finest bullet seaters I have ever used! I am extremely impressed with the design and the quality of construction."

Looking for a New Silhouette Challenge? Try 500 Meters with a Handgun!

by Joe Frey

I can still remember vividly the first time I tried IHMSA silhouette shooting 8 years ago—those 200 meter rams looked so far away and so small. I would see people shooting 40's and would think how I could never get to that point with a scoped gun, and to think about hitting 40 with open sights didn't even register at that point.

So here I was years later, getting ready to try a new challenge—my first 500 meter match. The 2014 World Championship had just ended the day before, and I had decided to stay the extra day for the 500m match if I had enough ammo—which I did have 45 cartridges left in my open sight unlimited 6 TCU. I had no idea what to expect, I had never shot past 200 meters, but I had just enough ammunition left to run the course.

I had thought about doing a 500 meter match on a few occasions, but I always found a good excuse not to. It seemed pretty intimidating shooting at standard silhouette targets at those extreme distances, and since my range only goes out to 200 yards, there was never a way to even shoot paper at such lengthy distances.

Luckily for me, Gary Crews of Oklahoma generously brought a scoped XP-100 with ammo for me to try, conveniently chambered in 6 TCU, same as my unlimited gun. It was set up for shooting out of the flop with an 18x Nikon scope—I shoot my Small Bore UAS gun out of the flop,

but I had never shot a center fire gun in such a manner. Gary didn't have sight settings for it past 200 meters, but it was still much more comforting to shoot a scoped gun first rather than try it blindly with open sights.

With full size targets set up at 200, 300, 400, and 500 meters, shooters were given two 2-minute sight in periods instead of the standard one, so I figured I would at least get to use my sighters to get on the chickens quickly, and then hopefully make it out to the pigs and turkeys, and maybe the rams.

Well, chicken sighters didn't go so well. I missed the first 3, and just edged the last two, so by the end of that first sight-in period, I had barely gotten on the chickens—and those are supposed to be the "easy" ones! I was still figuring out the position and new gun, and wasn't doing a very good job of it. Needless to say, I never made it past the pigs on my sighters, so I wasn't feeling too confident going into the start of my first relay.

But now I was more familiar with the gun and trigger. I had never shot an XP-100 before (I'm a Contender guy), but things were starting to feel good, and I got all 10 chickens. Then came the pigs, and after the first one was missed, I cleared the next 9. I was happy with a 19 on the front half. Now came the guess work, though—no sight settings for those evil turkeys, and

unlike any other turkeys I had ever shot before, these were now ¼ mile away. This is when it got really exciting for me.

Two minutes went really fast on that first bank. Miss—sight adjustment. Miss again—another sight adjustment. Miss once again—another sight adjustment. That clock was running fast, and I hadn't hit a thing other than dirt and gravel. Shot #4—finally, a hit! Seeing that turkey fall from ¼ mile away was such a thrill! It wasn't a good hit, but it fell. #5 did the same. The second bank of turkeys was equally exciting, as I hit all 5, and I hit those turkeys in essentially every part except the main body. If I had been hunting, I wouldn't have been doing a very good job—aside from the one I hit in the head. But it didn't matter, I had cleared a bank of turkeys at ¼ mile. That was the biggest thrill I've had shooting silhouette in a long time.

Of course, that euphoria didn't last long, because then I was reminded I have to now shoot rams at 500 meters, once again with no sight settings. We gave the scope our best guess, and I'll be darned if I didn't clear that first bank of rams. Just like with the turkeys, my shots were all over the place, but they were hitting the target now well past ¼ of a mile. I probably got a little too giddy on the last bank as I only got three of the five, but that was still much better than I would have ever thought going into it—15/20 targets at a ¼ mile or more. What a satisfying experience!

I finished with a 34/40, which ended up being good enough for second place. It was the most fun shooting experience I have had in quite a while. The fact that I did it with a borrowed gun and no sight settings made it even better. Had Gary Crews and Sean Murray not been there to help me through the whole process, I would have been totally lost.

Now that I achieved a goal of mine, which was to be able to say I had hit a target at ¼ mile or more with a handgun, and it went really well, I immediately turned my attention to a new goal—to be able to say I have hit a target at ¼ mile or more with open sights! I got out my TC Contender chambered in 6 TCU, and with Jim Myers spotting for me, I was off again. Same deal—no sight settings, and this time, limited ammo for sighters; I would only have enough for 5 shots. Using my shoot off settings, I started out on chickens, and just like with the scoped gun, I couldn't get on them. So I never got past chickens on my sighters.

I got my first 4 chickens—great start. Then I only got one on the second bank. Same with the pigs—good start, bad finish. Four and two. But oh well, I was over half, so I was happy.

Guessing on sight settings, just using the minute of angle adjustments I had gotten from Gary's scoped gun earlier, up next were those despicable turkeys again. I must have been "trying" to hard, because I would look down range at the turkeys, and I could see them somewhat clearly—

as clear as I can see with the naked eye at ¼ mile. Then I would settle into the Creedmoor, put the front sight on them, and all of a sudden the once-clear turkey would look like a tiny speck of fuzz sitting on the front sight. I'd look down range again—clear. Put the sights on them—tiny black fuzz. I ended up with 3 turkeys and three rams, and just as with the scoped gun, I was ecstatic. I had hit 6 targets over ¼ mile away with open sights. Just a few years ago, I would have never imagined being able to do that. Finishing with a 17 seemed like a satisfying score to me on my first outing.

There are so many amazing shooters in IHMSA, I think sometimes we start to take things for granted and forget what an incredible accomplishment it is to be able to perform some of the things that so many of our shooters do virtually every time they go out and shoot. The biggest things that make these accomplishments possible for newer and younger shooters is the generous and outgoing people that make up this sport. The fact that Gary Crews, a person that I only see about once a year, thought to bring out a gun and ammunition for me to use, is a perfect example of that.

500 meter matches are not a sanctioned IHMSA event, so rules and the amount of time allowed per shooting session may vary from place to place. I know some may allow more time for sighters, or give more than 2 minutes to get your five shots off. But I actually really enjoyed that challenge of getting 5 shots off in 2 minutes, with all the sight adjustments and having to pay more attention to the wind than I normally do. I sometimes hear how silhouette shooting is a "slow" shooting sport. Well, try getting 5 shots off at 500 meter rams in 2 minutes, I promise you that it is like being in a time warp. The entire 40 rounds seemed like it was done in 10 minutes! In this particular match, ram hits were also counted if a hit could be determined on the target. Rams were full set, which with the gusting winds we had that day, was definitely a good call. And as match director Jim Fields said, the whole point was just to be out and have fun shooting, and since many of the people there may not have had a gun or load specifically for taking down rams at those extreme distances, this was a good decision for the time and place.

You may find different parameters if you try a 500 meter match someplace else. But no matter what the format, when you are at a range, it is "house rules" and as long as everybody is playing by the same ones, then there is nothing to complain about. Take the ball and run with it.

This certainly was one fantastic experience for me, and something I would encourage any IHMSA shooter to try if you haven't already. There aren't that many chances to shoot silhouette at 500 meters, so if you are at a shoot that offers that, I would encourage you to stay for that extra day and give it a try. There aren't many people out there in the general population that can say they have hit targets with a handgun over a ¼ mile away.

New Practical Hunter "Options" Implemented

At the annual board meeting, a new option was added to the Practical Hunter category.

Previous rules allowed a shooter to use a rest, such as sandbags or a bipod until reaching AAA status; then they would have to shoot out of the Creedmoor or other positions just like any other freestyle event. However, for many new or younger shooters (which is whom Practical Hunter is a desirable category for), they may reach AAA pretty quickly, but not yet be experienced enough behind the trigger to feel comfortable having the end of their barrel close to their leg. Or in the case of some younger shooters, they may not have the arm and wrist strength yet to hold the gun steady in that position.

So now the **shooter** has an option once entering AAA or INT class. They can then use a freestyle position and continue shooting on the full size targets, just as before. Or they can opt to continue using the sandbag or bipod—but if the **shooter chooses to continue using the sandbag or bipod once reaching AAA or INT status, they have to shoot the course on Fifth-Scale or Half-Scale targets.**

This option, chosen by the shooter, will aid those less experienced shooters in that they aren't forced to shoot in a position they really aren't comfortable with yet, and give them the benefit of focusing on key aspects of shooting, such as breathing, sight picture, trigger control, etc. They will also experience the great satisfaction of hitting those tiny targets—there is nothing cooler for a newer shooter than seeing that first Fifth-Scale chicken go flying.

On the other hand, for those ready to shoot out of a freestyle position, there is an advantage for them, in that they have the larger full-size targets to shoot at. This advantage will serve as an incentive for shooters to begin experimenting with freestyle positions as they become ready for it, which will then open up many other shooting categories for them.

This new option applies to 2 of the 3 Practical Hunter categories—the Long Range PH (shot on full-size Big Bore targets) and the .22 Practical Hunter (shot on standard SB targets). Thus, Long Range PH shooters would have the option to use support on ½ scale targets, and .22 PH shooters would have the option to use support on Fifth-Scale targets.

For the Short Course PH (shot on Field Pistol targets), there is no such option available, since IHMSA only has one size of Field Pistol targets. In addition, some ranges may not have Half-Scale or Fifth-Scale targets, so obviously this option wouldn't be available at those places.

For those who may not be familiar with Practical Hunter, the basic parameters are a such—maximum overall length is 21 inches, optics are allowed up to 6x, and guns are as manufactured with only cosmetic modifications. For more detail, see the Rules Addendum on the IHMSA Bulletin Board page of this month's edition of the *IHMSA News*.

New Silhouetter . . . Continued from Page 6

short few minute videos are a great way to explain the overall process to someone new to the hobby.

In addition to the new videos, the Reloading Data Center has a complete information section for beginners (and others) on safety procedures, frequently asked questions, tips and tricks and much more. This free web source is a credit to Hodgdon and I encourage you to take advantage of it. Take a quick peek and I'm sure you'll be impressed.

MARKSMANSHIP COMPETITIONS

The Burris Cup:

Scoped .22 Long Rifle caliber handguns only. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a Ransom Rest, vise, or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns set up for creedmoor to better compete.

The Weaver Trophy:

Scoped centerfire handguns. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a Ransom Rest, vise, or any other mechanical clamping device. Lying on your back in freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns set up for creedmoor to better compete.

The Merit Challenge:

Centerfire handguns with iron / open sights. Your best 5-shot group at 100 yards or

meters. Groups must be fired from an IHMSA legal freestyle position. No benchrest or artificial support allowed.

The Daisy Avanti Trophy:

AIR Production guns with Iron/Open sights. Your best 5-shot group at 18 yards. Groups must be fired from an IHMSA legal freestyle position. No benchrest or artificial support allowed.

General Rules: All entries must be shot with IHMSA legal guns. Production, Revolver, and Unlimited guns are allowed in the Burris, Weaver, and Merit classes.

Witness: Winning groups must be witnesses by an IHMSA or NRA member. Eligible winning targets must be signed and dated by the shooter and witness. Also, please include the shooter's IHMSA number and the witness's IHMSA or NRA number by their name. A witness is not required to enter but is required to win.

Targets: Targets submitted must contain no more and no less than 5 shots in each bull zone.

Marksmanship Program

Marksmanship Program:

No new scores submitted this month. Bob Smith is still holding on to that top spot with a sub-1/2 inch group out of his .22-250. We're starting to see components make their way back to the shelves a little more than for the past couple of years or so. Hopefully if you are like me and have some new toys to experiment with and have been held up due to the lack of access to certain bullets and/or powders, we'll all be back in business soon! Until next month, be safe.

Weaver Trophy Standings:

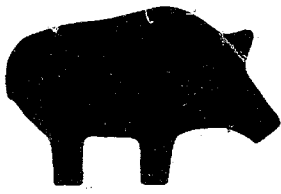

Name	Group	Gun/Caliber	Witness
Bob Smith (CO)	.471"	.22-250	Yes
Bob Smith (CO)	.697"	.223	Yes
Timothy Montgomery (UT)	.752"	.30 Carbine	No

Timothy Montgomery (UT)	.808"	22 K Hornet	No
Timothy Montgomery (UT)	.890"	.224 Montgomery	No
Timothy Montgomery (UT)	1.034"	7 TCU	No
Joe Frey (CO)	1.121	.300 Whisper	No

Targets can be sent to the address below. If you desire to have targets back, I can certainly return them to you. Be safe.

Joe Frey
2113 Glade Road
Loveland, CO 80538

Records Program

Big Bore Records

By Joe Cullison

Pretty slow this month but the scores that came in were excellent.

Steve Martens (MN) had an excellent match at the Region 8 Championship. Steve shot a S-28, P-40, U-40, and a R-40 for a 3-gun 108 and a 4-gun 148. Nice shooting Steve. This also adds 2 entries toward the state race for MN.

Eric King (CA) shot a great match at the Internationals scoring a S-55, P-79, U-78 and a R-74. These scores convert to a 3-gun 106 and a 4-gun 143. This raises Eric's 3 gun and gives him an entry into the 4-gun category. This also gives California the lead in the state race.

There may be a few more scores from the World Championships. Please send your scores to me and I will get them posted.

State totals for 2014 are: CA-6, OR-5, MN-4, OH 3, SC-2, TX-2, WA-1

Please bring at least one friend or acquaintance to every match. Together, we can keep IHMSA growing.

Please forgive me if I have left anyone out or made any other errors. Send me the information and I will make it right as soon as I can.

Thank you for your support of the BBRP.

Field Pistol Records

By Al Kuenn

We had a bit of a slow month with only one shooter to report. Joe Lipp shot a 29 Prod, then a 34 Pas to post a 63. He also posted the same aggregate during a June 14 match with a Prod 32 and a Pas 31.

Nice shooting Joe!
Shoot well and often.

Half-Scale and Fifth-Scale Records

By Jim Harris

We've got the latest results including the top shooters from the IHMSA Internationals!

Congrats to the following outstanding shooters at the 80-round championship in Oklahoma.

Half-Scale
80x80 UASHS: John Weaver (Champ), Steve Martens, Scott Thompson, Bob Doherty, Joe Cullison and Gary Crews.

80-round match Agg: Gary Crews (158 - Champ), Steve Martens (156) and Joe Cullison (155)

Fifth-Scale
80x80 UASFS: Jerry "JR" Ray (Champ), Chris Dunlap, Woody Liddell and Steve Martens.

80-round match Agg: Woody Liddell (159 - Champ) and Russell Plakke (155).

Honorable mention to Woody Liddell for his outstanding 79x80 in Fifth-Scale open sights!

Please let me know of any corrections

or additions to these records. I made a number of corrections to existing records listing, notably Woody Liddell did not have a Half-Scale Open Sight 40x40 - it was actually a Fifth-Scale Open Sight perfect score, the first of the year. Thanks!

Send your records reports to me at harisgrp@earthlink.net, or my home address: 1567 Bridget Ave., Simi Valley, CA 93065. Or give me a call at (805) 581-0009.

FLORIDA

ARCADIA, FLORIDA
DeSota Co. Gun Club
June 22, 2014

by Charles Nickolson

There was no Big Bore Match due to too many people being sick.

June 28, 2014

We had a very nice turnout for this match. The weather was low 90's, sunny and calm. We had 6 shooters—2 non-IHMSA members and 4 IHMSA members. The non-IHMSA members were Louie shooting a 38 in UAS SB, and Jack shooting a 37 in UAS SB.

Dan was shooting tight groups then let a turkey get away. I was doing good until the last 5 rams. This cancer was tiring me out, as I missed 2 of the last 3 rams.

The old man Bill (79) hung in there for a 40x40+3 shoot-off targets.

The highlight for me was Dylan Gruber, my grandson, who shot his first 40x40. He is only 13 and has shot less than 12 matches, the first one being a 22x40 We were signed up to go the World Championship but my health will keep us away. We were going to shoot 8 guns each and spot for each other.

Small Bore Results:

UAS-INT	Bill Shade.....	40+3
UAS-AAA	Dylan Gruber.....	40+2

GEORGIA

GONZALES, GEORGIA
Ascension Silhouette
May 4, 2014

by Charlie Braud

We were able to get in our second match of the year, Sunday May the 4th. Husband and wife team Will and Brenda Kirste made the long drive to be with us today. Brenda had not really intended to shoot but after finding out that Will had secreted her gun into the Suburban in case she changed her mind, she did in fact fire a very respectable 36X40. Not bad considering she had not prepared to shoot and it was good enough to best Will by two targets.

I somehow overcame "old eyes" and got a 40X40 in Unlimited. This is the first time I've been able to do this in over two years. My brother Philip was able to notch yet another 40X40 in UAS with his flop Ruger Charger in spite of the fact that he was walking wounded (allergies).

Today I attempted to sight in my PAS 22 Hornet as I went. This was a new cast bullet load which had bench tested very good. The problem

was that the sight settings were very far off from my jacketed loads. I did manage to salvage a 20X40 hitting 7X10 rams (finally found the zero).

Thanks go out once again to Bob Stevens for staying after to match to help me load all the targets and stands. He can always be counted on to go the extra mile. Will and Brenda pitched in as well. Plus I cannot say thank you enough to my wife Carolyn who set targets all day and stayed to help load up at the end of the day. We could simply not do it without her.

July 6, 2014

We had a better than usual turnout for our July Match. Region 2 Director Allen Gaskin joined us today and recorded some good scores with his Freedom Arms revolver in three separate categories. Philip Braud continued to shine with his "Flop" Ruger Charger firing a 40X40 in both UAS and UASFS. Richard West and Jay Clark each drove over from the Lafayette area to join us today. David Heintz and Robert Stevens also shared the range with us. Notably absent for most of this match was my lovely wife, Carolyn, who normally sets all the targets which forced Philip and I to complete that task. Boy, did we miss her! She did finally show up late in the day to rescue us for the last few entries. There were also several NRA Cowboy Lever Action shooters to help fill the line. Only two monthly matches remain before the Louisiana State Championship Match scheduled for October. Y'all come see us!

August 3, 2014

Our August match was lightly attended with only 4 handgun shooters. We did have an additional 6 Cowboy Lever Action rifle shooters to help keep the line full today. Philip Braud continued his domination of UAS with his Ruger Charger, scoring yet another 40X40. I was able to lead the pack in UASFS with a 38X40 using my High Standard Volquartsen. Jay Clark had the measure of the field today in Unlimited with a 34X40 and also in UAS-AAA with a 38X40. In addition today was David Heintz with a couple of solid scores. The rifle shooters kept busy all day on their side of the range but I don't have those scores. Thanks to all who stayed and helped pick up the targets and stands. We hope to see you all in September.

GAINESVILLE, GEORGIA
Cherokee Gun Club
July 5, 2014
by Ron Dixon

This month our match was held on July 5th. And I don't know whether the close proximity to the 4th helped or hurt our numbers. The weather was perfect, a slight breezy perhaps, mild temperatures with just a few wispy clouds, and low

humidity. Fifteen shooters came out to play and all had a good time.

Our world traveler, Mikkel Broas, returned and managed a 40x40 just to show us he had not forgotten how to shoot. Behind Mikkel in UAS was a cluster of 39x40 scores. David, Anna, Ed, and Kenneth all let one slip away. Clay Mashburn was back to play with the Club Gun and shot a 28x40. This gives his Grandpa Larry Davis something to shoot for.

While we were having our match there was a fly in at the Gainesville Airport. And the show the guy in the Cobra put on kept us all entertained. There were several different kinds of aircraft over the range, but when the cobra put his skids perpendicular to the dirt he was sure giving someone a good ride.

Next month we will try it again, and we would love to have you come out and try our game. If you don't have a gun that you think would be suitable, come on out anyway and we will put the Club Gun in your hands and let you give her a try. Heck you might even win the thing after we shoot 100 entries with it.

LINCOLNTON, GEORGIA
Little River Gun Club
July 26, 2014
by Robert Walker

Another fine day for a Silhouetter Match in Georgia; the weather was warm, but some of the shooters were HOT !!!!

Ken Hale managed to pull out another Production Match win this month before having to "bow out" to attend to other duties, congrats Ken. We were also graced by the presence of Larry Elrod and Henry Auman from Black Creek Gun Club (Patrick, South Carolina) again this month; great to have you return guys. Not last or least was the return of Andrew Kerlin from his initial IHMSA match last month... we think he maybe hocked.

As always, we appreciate the efforts of my two Amigos, Melvin and Ken in getting the range ready for this match and running it.

We have only one regular match left for this year and then our State Big Bore and Half-Scale Championship match Sept. 26-28, which will be our last match for this 2014 season.

Until we meet again,
Mrs. Norman, Ken, Melvin and Robert

Thanks to the many people who have cancelled their paper copies of the *IHMSA News* now that it is available electronically on the ihmsa.org website. With the always increasing cost of postage, every little bit helps. So if you are satisfied with the electronic copy and no longer want/need the paper copy mailed to your door, please email Cindy Smith at Headquarters—it will save a few trees and a few bucks for IHMSA.

What a great time! Good shooting, good company, good weather, and let's not forget the great food. Thank you Nelli for doing lunches, and Greg for the banquet. Special thanks to Jan for manning the state house. We had two 80's shot—Steve Soya in UASHS and Randy Lober in .22 UAS. Great shooting!

Thanks to everyone for making it out to shoot and thanks to all for helping. Hope to see you next month.

INDIANA

WEST LAFAYETTE, INDIANA
Wildcat Valley Rifle & Pistol Club
June 22, 2014
by Jim Heath and Perry Brown

It was an excellent day for a silhouette match. Scores were better than May, but I don't see any 40's. In Aggregates, Dave made the Field Pistol 60 Club with a 61, and Mike Slusher made the Standing 60 Club with a 61.

I am happy to see Donald Bonk shot some cards. I am also happy that Keith Adams and Corey Rohl came back. I hope you will all come back again.

We took time out for Charmaine to scatter Daniel's ashes on the Field Pistol pig bank. We appreciate everyone who showed up for the ceremony.

I want to thank everyone who dropped a little or a lot in Hunter's tip can. Good help is hard to find. I hope you will all come back for our next match.

Match Publication Policy

As we continually have new match directors, following is the IHMSA News' policy on publication of state, regional, and "specialty" match notices and match results.

Any IHMSA sanctioned club in good standing may publish a notice of their club's state or regional championship match at no charge for three months. State match notices are limited to 2 1/4"x5". Regional match notices are limited to 4 3/4"x5". If a club is holding a "specialty" match and that match does not replace one of these championships, the *IHMSA News* will publish a 2 1/4"x5" notice at no charge one time. These notices will run in Section B only. The club may publish additional notices of the same size for \$45 per issue. Ads must be prepaid before printing. All payments are to be sent to IHMSA HQ, P.O. Box 22356, Cheyenne, WY 82003. The club may specify whether the paid notice is published in Section A or B.

State match results can list both first and second place finishes. Regional match results can list first, second, and third place finishes. "Specialty" matches replacing a state championship may publish first and second place finishes. "Specialty" matches replacing a regional championship may publish first, second, and third place finishes. All other match results wherein the total number of handgun silhouette entries exceeds 11 (including all IHMSA, NRA & non-member guests) can list only the first place finish. Matches with less than 11 total handgun entries as defined above can list all IHMSA handgun entrants and their place. Regardless of the above, all 40's, 60's, and 80's (depending on the number of rounds fired at the match) can be published from ANY IHMSA match.

An IHMSA club holding a dual sanctioned (IHMSA/NRA) match may submit a match report for publication in the *IHMSA News* containing both IHMSA and NRA results. The number of published NRA results may not exceed the number of published IHMSA results. **Publication is limited to IHMSA sanctioned handgun disciplines only.**

Please address any questions concerning this policy to your Regional Director.

OHIO

BELLEFONTAINE, OHIO Logan Handgun Association June 28, 2014 by Steve Powell

The weather was great for our June match, with temps in the low 80's and a light breeze all day making for great shooting conditions.

Former Ohio shooter Jerry Scott and friend Tim Daniels were visiting Ohio from Florida and stopped in to shoot with us at this match—it was good to see you guys.

Long time LHA member (that means OLD) Lynn Shultz's daughter Sami joined her dad at the match to shoot some steel for the first time. It was great to see her there shooting with her father. Gordon Lash kept the Small Bore line busy most of the day until he beat it with a 40x40 in UAS. Lynn Shultz edged out Craig Eagle in Big Bore UAS by one shoot-off target, so it looks like the glass eyes ruled the day.

Overall it was a good match. Thanks to all who came to shoot and a big thanks to all who helped out at the match. See you next time Until then, safe shooting.

KANSAS

LINWOOD, KANSAS Tri County Rod and Gun Club July 13, 2014 by Bob Curry

Nice weather for a July match, but I predict we'll get the real Kansas back before too long. I sure miss those 100 degree days with 80% humidity. I'll bet you do, too.

I'd like to welcome Dale Terhune to our place. He wins the prize for the longest commute.

We are getting some interest in the Field Pistol Practical Hunter event. Fred Hornbaker and Bob Doherty both shot it this month, with Bob shooting a 50 to win. He shot the Half-Scale pigs as shoot-off targets. It is tailor-made for the Hornet.

This was our first outdoor match of the year; the weather was not bad at all with temperatures in the mid-to-low 50's and the wind was not much of a factor most of the day. This was a make-up match as we had to cancel the scheduled match.

We had eight 40x40's shot in this match: Jim Fields (UAS-SB), Jackie Brown (Fifth-Scale and UAS-SB), John Anderson (U-SB), Sean Murray (UAS-SB), Scott Thompson (U-BB), Larry Curtis (UAS-SB), and John Blue (UAS-SB).

That's about it for now, so shoot safe, shoot straight, and I'll see you at the next match.

April 6, 2014

Our April match was about right weather-wise; a little windy but all-in-all a good day to shoot steel. We had a good turnout for our second match of the year, with 40 total entries. As usual, our target setters did a great job, and thanks to everyone who helped with the match.

Only ten 40x40's were shot in this match. Jackie Brown (SB UAS), Jack Tesson (SB UAS and BB UAS), Jim Fields (SB UAS), Larry

Curts (SB UAS), Dave Stone (SB UAS), John Blue (SB UAS), Scott Thompson (UASHS), Gary Crews (UHS), and John Anderson (Fifth-Scale). Great shooting guys.

Bring a friend to the next match, and introduce him or her to the most exciting handgun competition in the world. You will be doing that new person a great favor as well as yourself.

Well that's about it for now, so shoot straight and shoot safe. See you at the next match, inside or out.

April 15, 2014

Our May match was greeted with mild temperatures and good wind conditions, and some very good scores were shot. A total of twelve 40x40's were fired during the course of this match.

In Small Bore UAS-INT, perfect scores were fired by Jim Fields, Larry Curtis, Jackie Brown, Jack Tesson, and John Blue. Jackie Brown won the shoot-off with 9x10. John Anderson shot a 40x40 in Small Bore Unlimited. Gary Crews and Scott Thompson shot 40's in Big Bore Half-Scale. Great shooting, guys. No 40x40's were shot in Small Bore Fifth-Scale, which was a bit unusual.

We appreciate all the out of state shooters who came to our match, you are welcome at OKC Gun Club anytime. Thanks for coming.

Check out the AIR scores accompanying this article. See you at the next match. Shoot straight and shoot safe.

Second match of the year with a great turn out. Jim and Chris Bung came down from Stratford to shoot with us. Chris shot a leg into Big Bore Unlimited-AAA with a great 37. Bob Burton joined us from Elkhorn and also shot a leg into Big Bore UAS-AAA with a 38 using his EA Brown .375. There is something to be said about shooting pop guns at the targets. All the 7mm's and .30's run and hide when that can-

non comes to the line. Joe Lipp never left the Big Bore line, shooting four guns in P, U, UAS, and Standing with a 3-Gun Aggregate of 98 and a 4-Gun Aggregate of 130. Jack Peterson and Dennis Pyan also showed up for the match, with Jack trying some new things. We also welcome Jim and James Foti, who shot .22 and Big Bore as non-members. We appreciate the support from all who participated.

We had a beautiful day, no wind or rain, and a great match. We had 17 guns go through the line. I want to welcome Rusty Jackson and Rex Jensen. They said they had fun and will be back.
We had 5 entries in Field Pistol, and 7 in Small Bore. Thanks to Steve Manigault for his help at the match. Thanks to Steve Quast for helping with the stats. See ya next month.
My regular target setter called me the morning of the match and said his truck had broken down on the way home and couldn't make it. One of my shooters, Mike McGuire, volunteered to set targets for us as well. I want to thank all my shooters for pitching in and helping, and we had a good match. Much obliged, guys.

It was an auspicious day as we (1) had a new shooter, and (2) one of our "sometimes" shooters has now relocated permanently to Grants Pass and is a regular. We welcomed Doug Hockinson

IDAHO

Final Farewell - LEFT THE RANGE
Larry Allenbaugh
Lawrence Ray Allenbaugh, 65, died peacefully in his home, surrounded by his family on April 10, 2014. Larry was born on August 6, 1948 in Marysville, CA and grew up and attended schools in Sutter, CA. After high school, he enrolled in the U.S. Army and served in Vietnam and Germany. After his discharge from the Army, he went to school at Yuba College in Marysville, and then began his career in Radiology at Redding Memorial Hospital, Redding CA and the University of California at Davis Medical Center, Sacramento, CA where he met his wife and the love of his life, Diane Fontan. His love of fishing and the great outdoors eventually brought him to Pocatello where he worked at Pocatello Regional Medical Center as the Coordinator of the Cardiac Cath and Special Procedures Lab. After his retirement, he continued to work for Inter-mountain Health Care as a radiation safety consultant.
Larry enjoyed fishing, hunting, sport shooting, and anything to do with the outdoors. His pride and joy were his children Derek and Kristi, and his granddaughter, Cora.
Larry was a leader in the creation of Pocatello's first shooting range open to the public, Oregon Trail Shooting Range, and the establishment of the Gate City Sport Shooting Association, serving as President for many years.
Larry was an avid supporter of IHMSA. He never missed a match in Jerome or Idaho Falls, ID.
Larry was dearly loved by his family, friends, and co-workers. He will be missed by all who knew him. Condolences may be sent to the family online at www.colonialfuneralhome.com.

Only two shooters for the Sin City Silhouette shooters this month, but they both did well—Debi with her UAS gun and Gary with his thumb-busting .308.
Val will be back next month and hopefully I will heal. Take care and shoot well.
Big Bore Results:
U-AAA Gary DeCoster. TC308WIN. 35
UAS-AAA Debi Wright. XP100:7BR. 37
June 22, 2014
Debi Wright shot her second 37 this month—one in Big Bore UAS and one in Small Bore UAS. Don Wright turned his sight the wrong way going into pigs and handed Debi a win there. For the rest of the Sin City Silhouette Shooters it was a "yeah, right" kind of day.
Pete Hofmann did no cheatin' this month and figured he could still shoot a 40—yeah, right! I caught Mel Douglas cheatin' a few times this month so he could finally do better with his scoped gun than open sights—yeah, right! Joe Kennedy showed up with factory cast bullet loads for his 32 H&R, figured point of impact should be close enough—yeah, right! Wally Pinjuv seems to think he can still sand bag even though he is in INT class now—yeah, right! Last, but not least, with Val, Robert, and Gene all gone, I thought I would catch a little less flak—yeah, right!
Art Cheshire fits in there somehow but it is too confusing to put on paper. Shoot well and take care.

from Roseburg, an IHMSA shooter who has been inactive for a while, as our new shooter and are looking forward to seeing more of Rick Redd now that he has moved back to the area.
Rick marked his return with a remarkable display of marksmanship. He was our champion in Field Pistol PAS, Production, and Unlimited as well as 2/3 of the High Senior award.
Dave Whitman was our Field Pistol Production champion as well as the Small Bore Unlimited Any Sight champion. His 40 in UAS earned him 1/3 of the High Senior award.
Rich Burket was back with us with his Remington rifle, and we always look forward to seeing him.
Doug Hockinson was hard at work getting sight settings. After watching him, I know his scores will be on the rise as he becomes accustomed to our range.
Charlie Dean was our Revolver champion for the day, and Paul Hoadley took the Unlimited Standing title.
Thanks to Dave, Rick, Paul, and Charlie for helping to set up and tear down the range.

July 26, 2014
Our indoor range is back up and running and so were we! It was great to be back "home" again. Team Medford was on its usual roll with Ron Sprafkin shooting our only 40. That earned him both the UAS title and High Senior.
There was a mathematical error in addition on one UAS scorecard resulting in a tie between Mike Aber and Ron Silveira. However, Mike took that title on reverse animal count. The results were unchanged regardless of the error.
Oliver is getting darned close to his first 40. One of these days it will happen!
Thanks to Oliver, Ron, and Paul for helping to set up and tear down the range and to Mike for taking our damaged targets home to repair! . . .

WYOMING

CHEYENNE, WYOMING
Cheyenne Rifle and Pistol Club
July 12, 2014
by Dave Smith

We had a nice match today with 24 entries crossing the line, and a lot of good shooting being done as some of our Region 8 members are putting in their final preparations for the World Championship.

Russell Plakke had a fine shooting day, getting in 6 entries, including firing a 28 in Field Pistol, a 40x40 in Big Bore Unlimited, a Small Bore 38 in Production, and a 36 in Unlimited Fifth-Scale.

Troy Frey jumped into INT class in Small Bore Revolver, shooting a 38 with his Freedom Arms. He also had a 37 in Small Bore Unlimited, another solid score.

Joe Butler continues to knock on the door of perfection—leaving a turkey to get a 39 in

Small Bore UAS. His previous 39 left the 10th ram standing, so at least this one didn't hurt as bad as that. The way Joe has been shooting, that 40x40 isn't far away—keep it up, Joe.

Anthony Butler was down with his girlfriend Melissa. Anthony got several solid entries in, both in freestyle and standing categories, and continues to improve into becoming a very good all-around shooter.

A big thanks goes out to Neil Allen and Sherri Johnson as they were able to stop and get a couple of guns in as they travelled through on the way to Denver for the weekend. It is great to see people include IHMSA into their travel and family plans.

Thanks to everyone for help with set up and take down—we beat the afternoon rain this time! Good luck and safe travels to everybody heading to OKC for the World Championship.

IHMSA

Creates People
of integrity

The Big Matches Are Far From Over

For many sports, the "playoffs" or "championship" signifies the end of that sport's season. People take a break, rest up, and then start planning for next year. Fortunately for us in IHMSA, that is not the case.

Whether you were able to attend the World Championship or not, the bulk of the IHMSA shooting year is far from over. This fall's IHMSA schedule has many championship matches on the slate.

The month of September is loaded with many state championship events, in areas scattered all around the country. These championship matches include:

- Los Angeles Extravaganza—August 30-Sept. 1
- Georgia—Sept. 26-28
- Kansas (Small Bore & Field Pistol)—Sept. 6 & 7
- Minnesota (State Half Scale on Sept. 13, State Small Bore & Fifth-Scale on Sept. 19-21)
- Nebraska—Sept. 18-21
- South Carolina (Small Bore & Fifth-Scale)—Sept. 13 & 14

- South Dakota over Labor Day weekend—August 28-31
- Virginia—Sept. 6 & 7

Then hunting season starts to roll around for many of us, and we are out scouting, glassing, and tromping through the outdoors. That doesn't mean there still isn't some major silhouette shooting to be had. October features a couple of state matches, as well as the Region 4 Championship.

- Louisiana—Oct. 4 & 5
- South Carolina (Big Bore & Half-Scale)—Oct. 11 & 12
- Region 4 in Oklahoma City—Oct. 3-5

Attending a championship match is a great way to put a "stamp" on your personal shooting season. As you can see, there are still great matches to come from virtually every part of the United States—west coast, east coast, south, north, Midwest. Give a new place a thought if you have time this fall. There are a lot of good opportunities out there still to be taken in.

240 Entries is Top Regional/State Shoot So Far—Will It Hold?

by Joe Frey

There have certainly been some significantly attended matches this year. Aside from the World Championship, which by my count had 566 entries, there have been several events which have had triple-digit entry counts. If my memory serves me correctly, here are the top-attended IHMSA Region/State matches thus far.

1. Region 8 in Pringle, South Dakota—240 entries
2. East Coast Championship, Lawrenceburg, Kentucky 223 entries
3. West Coast Championship, Grants Pass, Oregon—215 entries
4. Oklahoma State Championship, Oklahoma City—158 entries

Well, there are a few shoots left which may break into these ranks, with a couple that are almost certain to. The LA Extravaganza is an event which I have not attended (as of yet, at least!), but it sounds like it is a crazy good time. The South Dakota State Championship is usually in the 150+ entry range, and located in one of the most scenic areas of the country. Both of these matches are held over the Labor Day weekend, making for a good "end of summer" experience.

But the one event that probably has the best chance of possibly taking the

"bragging rights" for the year and knocking the Region 8 Championship out of that top spot of 240 entries may be the Region 4 Championship, held on October 3-5 at the Oklahoma City Gun Club. Site of two of the past three World Championships, this is one of the premier silhouette ranges in the United States.

If you were somebody who wasn't able to attend the World Championship, but would like to experience a shoot with world-class competition at a much more affordable price than the World Championship, the Region 4 Championship is the place to be. A mere \$95 gets you all the shooting you can handle for three days. All categories of IHMSA shooting can be had here, including indoor air pistol and a 500 meter match. Many of this year's world champions will be in attendance at this match, and it is open to any shooter whether you live in Region 4 or not, so it provides one last opportunity in 2014 to see how you stack up with some of the top IHMSA shooters.

It has been an exciting year of silhouette shooting thus far. Hopefully your personal schedule allows for one more chance to attend one of the many state or regional matches left on the 2014 schedule.

A Huge Thanks to Our Industry Supporters

In addition to all of the individuals who help make our organization operate on an annual basis, as well as making events such as the World Championship possible, we have a lot of friends out there in the industry who are critical to our success. Please keep these fine folks and businesses in mind if you have a chance to thank them.

Memories of

The amount of time and effort Jim Fields put into making the World Championship a success is unparalleled.

Ken LaCroix put in countless hours, both in advance and during, the World Championship.

Gary Crews of Oklahoma showed how outgoing IHMSA shooters are. Gary loaned Joe Frey a 6 TCU and ammo, as well as helped guide Joe through his first 500 meter match, to take second in the scoped division. Steve Martens shot a 40/40--wow!

The Sierra Sportsmanship Award went to a very deserving Cindy Smith of Cheyenne, WY. Cindy took over IHMSA Headquarters this year on a volunteer basis.

The Australian National Team poses with the unofficial "Alabama National Team".

Kevin Murata and Bert Chikazawa made the trip again from our 50th state.

World Championship

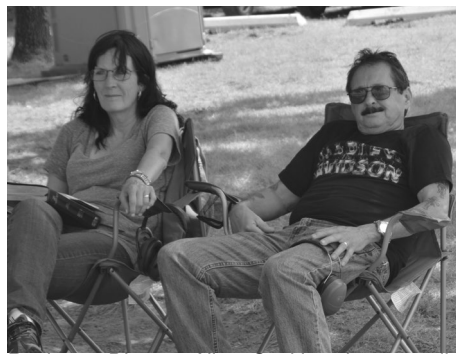

Paraguay's attendance at the IHMSA World Championships has been greatly appreciated the past few years. Luis Britz (left) and Sebastian Gorostiaga (center) share a moment with Joe Frey of Colorado.

Carroll Pilant of Sierra Bullets was on hand to get in some good shooting.

He shoots! He cooks! He puts out fires! Is there anything John Richards of Minnesota cannot do?

Region 2 Director Allen Gaskin takes a well-deserved break with his wife.

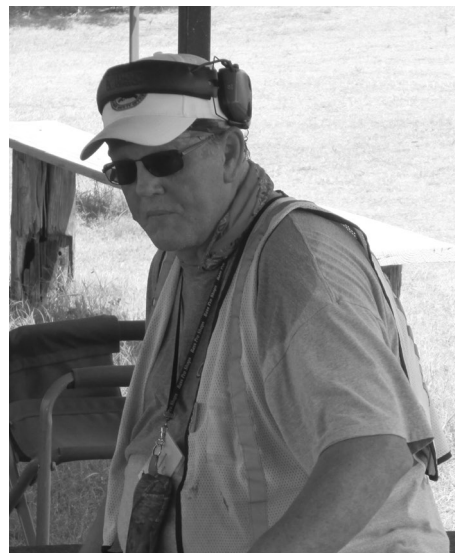

Jackie Brown was able to take an occasional break from running the line to get a little shooting in.

A great view of the expansive OKC silhouette range.

Ryan Schuff was able to celebrate more than just fantastic shooting. He officially became a teenager during this match!

The volunteer help from OKC Gun Club members was tremendous.

Sean Murray (shown shooting) won his first World Championship this year. John Blue is shown spotting for him.

Members of the Bad Monkeys, as well as "honorary" members, certainly felt the presence of long-time IHMSA great Ted Zysk.

Thanks goodness for air conditioning! Many people worked very hard in the stat house throughout the week to keep the match running smoothly, including Nancy LaCroix and Cindy Smith.

IHMSA is Growing, Because of ...

by Joe Lipp

Hello Silhouette Shooters, my name is Joe Lipp and I am the Wisconsin IHMSA State Director. Last week I called Joe Frey, our IHMSA paper editor to request some score cards for a new club we are getting started here in Wisconsin and he suggested I write an article on the club to use in the "IHMSA is Growing Because of"

section in the monthly paper. Well, I am not a writer but I will do my best. The official name of this club is "Town of Washington, Cecil Game & Fish Club". The club was formed about 50 years ago and I have been a member for about 10 years. In recent years the club was declining in to rather poor condition with much needed work to the club house and

the grounds. I offered to try to get the club going in the right direction and was given the support of the few remaining members. First, we cleaned up the facilities and finished the club house that was never completed. Second, with the help of my sons, nephew and a couple club members, we built a cover over the shooting line. Then, Paul Frank, a good friend and long time Silhouette shooter offered the club a set of .22 and Field Pistol re-settable targets. Last month we held our first unsanctioned match just to try out the targets and facilities. Everything went pretty good and now we are ready to start hosting sanctioned matches on September 13th and

October 11th. Due to a lot of hard work and the help of several people we now have another club here in Wisconsin to enjoy Silhouette shooting. We now have four (4) established clubs hosting IHMSA matches here in Wisconsin. So, I think Silhouette shooting is secure for years to come. *Editor's Note: This is the second month in a row the IHMSA News has been able to report on a new range shooting IHMSA sanctioned matches! A huge congratulations goes out to Joe Lipp and all of the people who made this new range come together. The efforts put forth by so many of our IHMSA membership truly is admirable.*

World Championships - this what makes world championships - - people working together, sharing stories, caring for each other, having fun.

World Championship Funnies

As with any event in which you get good folks and friends together, there are always humorous things that happen or are talked about. I would like to invite anyone who had an interesting item from the World Championship to please share it with me, thus I can put it in the next issue and share it with all of our members.

I'll start us off with the top 3 things I overheard at this year's World Championship. Knowing the good nature of all three of these people, I don't think they will mind me sharing these tid-bits.

1. Richard Slaton of Alabama mentions this in his article, but I'll throw it in here as well. Richard had just finished a less-than-satisfying standing event, and he added up his final score and wrote it on his card. Another shooter glanced at his card and asked something to the effect of, "Oh, are we supposed to convert our scores to a 40 round equivalent?" The ever-affable Richard could only smile and say, "No, that's my actual score!"
2. Russell Plakke of Colorado was looking at his hits through the spotting scope, when he mentioned to the shooter next to him, "You've got some nice tight groups on your targets—all my targets look like Dalmatians!"
3. And finally, Carroll Pilant of Missouri was shooting at the rams in Bordello, which anyone who has shot Bordello knows what a task that is. I was shooting field pistol next to him, squeezing the trigger and anticipating the gun to go off at any moment. Right then, I heard his spotter say, "You hit a tree!" Needless to say, I missed my shot too!

Email me at ihmsaeditorjoe@gmail.com or give me a call at home (970-667-4968) if you have anything you would like to share and think would be of interest to others. Knowing the great time I had at that 8-day event, I'm sure there are a lot of other great stories out there.

OKC Gun Club member Jim Myers is not a silhouette shooter, yet he was there every day serving as a line officer, coordinating the volunteer help, and chipping in whenever somebody needed a hand.

Anyone who has been at a shoot at OKC the past few years knows how much time and work Larry Curts puts into the organization.

Dave Stone (left) and Jackie Brown called the line each and every day, including the 500 meter match which followed the day after the World Championship.

Precise Case Trimming Without Measuring.

The E-ZEE Trim™ Case Trimmer

NEW!

Trim-To-Length Pilot Your Shellholder Case Locking Device

Factory pre-set, trim-to-length pilots assure precise case length with any popular shellholder. Installed on the system's hand operated cutter head, the pilots stop the cutting action at the correct overall cartridge length. In addition, a power adapter is included for use in a standard electric drill to speed case trimming.

- Rifle 5 Pilot Multi-Pack Set: .223, .243, .270, .308 & .30/06.
- Pistol 6 Pilot Multi-Pack Set: 9mm, .38 Spec., .357 Mag, .40 S&W, .44 Mag, .45 ACP.
- Pilotless Universal System can use: .204 Ruger, .223, .22-250, .243, .270 Win, .30/30, .308, .30/06, .300 Win. Mag, 7mm Rem. Mag, .45/70, .338 Win. Mag, and .338 Lapua. Pistol pilots cover: 9mm, .38 Spec., .357 Mag, .40 S&W, .44 Mag, .45 ACP. Pilots sold separately.

Power Adapter Included
