

IHMSA NEWS

Official publication of the International Handgun Metallic Silhouette Association, Inc.

Volume 26 ~ Issue 10~ November/ December 2015

LEGENDS OF SILHOUETTE PART III: THE BEST, THE VERY BEST Lon Penninington by The Old Guy

With all the outstanding shooters who have shot handgun metallic silhouette in the history of IHMSA, one might think that there would be a number of people who the various folks who have shot silhouette would think were the best, that there would be groups of shooters who were partisans of this or that top shooter whom they thought was the best of all time. One would be wrong.

If you asked all the people who have shot silhouette for at least several years, gone to the Internationals, and seen the various excellent shooters perform, nearly all of these serious competitors would tell you one name, Lon Pennington. I certainly do not have any doubts in my mind, and nobody I know of does either.

When I was preparing to write about Lon, I interviewed him on the phone, and I began with the thought that if I asked him what achievement he had accomplished in his years as a silhouette shooter made him the most proud, what he thought was the best proof that he was the best, he would answer that the most outstanding thing he did was when he set the Iron Man eight gun aggregate at the 2010 Internationals. The record had been 585, and he had held part of that record. In 2010 he shot 607. He did not just beat the record. He stomped on it and did the equivalent of hitting 92 home runs in a season. I could not imagine a better proof that he is the best. He holds the most significant record we have, proof that he can shoot each gun well, and that he can do it all in one match.

The Small Bore part of this was 304x320 which is the record for Four Gun Aggregate Small Bore in an 80 round match. While Lon certainly agrees that this is an excellent performance, he pointed out that this is only one performance, one achievement at one match.

He said there was a better mark of his continuing status as the top performer in the history of IHMSA.

Please Welcome our New IHMSA Secretary/ Treasurer

Please Welcome Ray Utter of North Dakota as Our New secretary/ Treasurer. Thank you for taking over this badly needed Position!

Ray's Contact information can be found in the officer Directory on Page 2.

He said he had done some arithmetic which is like nothing else I ever have heard of anyone calculating about his history in IHMSA. Lon said that if you took all the entries he ever has shot at the Internationals, including the aggregates, when he entered whatever categories made up an aggregate, he has shot 82 entries, and he has won 44 championships from those 82 entries. This means that 54%, well over half, of the times he has entered some category at the Internationals, he has won. His percentage at the NRA Nationals is even higher.

How about some other interesting Lon facts? One of the most difficult perfect scores to shoot is 80x80 in Revolver. Between the IHMSA Internationals and the NRA Nationals Lon has shot seven 80x80 scores in Revolver. On top of that he has shot an 80x80 in Small Bore Revolver, a much harder feat than 80x80 in Big Bore Revolver. No one else even comes close. How about Half Size? Lon has not one, but three 80x80 scores in Half Size Iron Sights. One of the NRA aggregates is the Freestyle four gun aggregate, Unlimited, Production/ Conventional, Revolver, and Half Size. A perfect score is 320x320. It only has been done twice. One of these was by Lon.

What about 60 round Championship matches? Lon shot a Big Bore 233x240 at the West Coast Championship. This included a 54x60 Standing Big Bore.

These are both records in a 60 round match. He shot a 51x60 Standing on the way to a 229x240 Small Bore Aggregate, the record in a 60 round match. He also holds the Iron Man Eight Gun Aggregate record for a 60 round match, 458x480, also at the West Coast Championship.

Despite all this excellence, Lon is a quiet, shy fellow who does not brag about his achievements. He very graciously compliments others when they do well, and, in general, he is a nice guy, and almost everyone who knows him likes him. He is a true sportsman and example to all of us.

I do not know what else to say. Lon, You da man.

TO ALL MEMBERS:

On Page 6, First thing is that all Members need to read the Changes going into effect concerning membership renewals. Prices have been dropped and some changes when you Renew has changed.

Also On Page 3, You will see the finalized Rules for Practical Hunter which will be placed into the 2016 rule book.

And Last, On Page 4 You will find the rules for the New IHMSA Ultra 500 Meter silhouette.

President's Column

Presidents Report – DEC 2015 By Steve Martens

The board has approved the rules for the two year trial of Ultra 500 silhouette and finalized the Practical Hunter rules. They are available on the IHMSA.org website and will be printed in the newsletter. The rule book is being printed and should be up to date for 2016. The Ultra 500 rules were discussed with shooters and match directors for over 9 months. They are a combination of what the people who have been shooting it and common IHMSA rules. If you have any questions feel free to contact me.

On the Ultra 500 game, the lack of available ranges comes up often. We need to search for ranges that are able to host a match. The first place to look is at ranges that are currently or have hosted the NRA rifle silhouette game. There are still ranges that may have the targets, but no is shooting them. Contact those ranges and see if they will let you host a match. Also if anyone know of big bore targets that are not being used and might be for sale, let us know as we have ranges and clubs that are looking for targets. Ranges that are looking to offer the Ultra 500 will need targets as well.

On a plus note, Anschutz is producing a limited number of Exemplar pistols again available thru Champion Shooter Supply.

On a sad note, the widow of the late Jim Tolbert(past Region 8 director), Betty has passed away. She was a constant fixture at the world championship, putting in long hours in the stat house.

Installment Plan Life Memberships

The Installment Plan for Life Membership allows you to purchase a Life Membership by making four monthly payments of \$105.00 each (a total of \$420.00), or in the case of a spouse two \$50.00 each (a total of \$100.00). When your last payment is received, Headquarters will send your Life membership card, certificate, and

If you're in the middle of your membership year, you can purchase a Life Membership now and apply the unused portion of your current membership. Call IHMSA Headquarters at (801) 733-8423 to find out how much credit you'll received for your current membership.

Life Membership is a great way to enjoy IHMSA for years without the hassle of paying yearly dues and show your support of IHMSA at the same time . . . order yours today!!!

Please make every attempt to send in your Sanction Fees promptly as the Sanction Fees help us pay for the printing of the Match Results.

Infrequently we have a club(s) that does not remit sanction fees for a match held. We understand club officers are busy, so we just send a gentle reminder. Still failing to receive the fees, a second notice is forwarded.

A final notice is sent if fees are still delinquent. After the final notice, the match dates will be deleted from the match schedule and the club's sanction will be withdrawn until the fees are received.

Disclaimer Concerning Reloading Data Neither the IHMSA News, the contributing shooters or the writers or IHMSA, Inc. assumes any responsibility for the safety of any reloading data published in the IHMSA News. Neither IHMSA, Inc nor the writer has control over the firearms or components used, or the manner in which they are utilized. Therefore, no liability is assumed by either IHMSA, Inc, the writer, the contributors or the IHMSA News for any damages that result from any reloading information printed. Always consult standard reference manuals before duplicating loads or attempting any reloading procedures.

Match Publication Policy

As we continually have new match directors, following is the IHMSA News' policy on publication of state, regional, and "specialty" match notices and match results.

Any IHMSA sanctioned club in good standing may publish a notice of their club's state or regional championship match at no charge for three months. State match notices are limited to 2 1/4 "x5". Regional match notices are limited to 4 3/4"x5". If a club is holding a "specialty" match and that match does not replace one of these championships, the IHMSA News will publish a 2 1/4"x5" notice at no charge one time. These notices will run in Section B only. The club may publish additional notices of the same size for \$45 per issue. Ads must be prepaid before printing. All payments are to be sent to IHMSA HQ, P.O. Box 22356, Cheyenne, WY 82003. may specify whether the paid notice is published in Section A or B.

State match results can list both first and second place finishes. Regional match results can list first, second, and third place finishes. "Specialty" matches replacing a state championship may publish first and second place finishes. "Specialty" matches replacing a regional championship may publish first, second, and third place finishes. All other match results wherein the total number of handgun silhouette entries exceeds 11 (including all IHMSA, NRA & non-member guests) can list only the first place finish. Matches with less than 11 total handgun entries as defined above can list all IHMSA handgun entrants and their place. Regardless of the above, all 40's, 60's, and 80's (depending on the number of rounds fired at the match) can be published from ANY IHMSA match.

An IHMSA club holding a dual sanctioned (IHMSA/NRA) match may submit a match report for publication in the IHMSA News containing both IHMSA and NRA results. The number of published NRA results may not exceed the number of published IHMSA results. Publication is limited to IHMSA sanctioned handgun disciplines only.

Please address any questions concerning this policy to your Regional Director.

NOTICE

The IHMSA Board of Directors have voted to allow the printing of NRA match results in the IHMSA News, providing they are submitted by a club that is running dual (IHMSA/NRA) sanctioned events.

These results must be submitted by the established deadline présented in the previous edition of the IHMSA News, with the Dual Sanction Match Write-up and will be listed at the end of the IHMSA related report. No NRA reports will be printed without IHMSA reports/scores accompanying them. Please send all Match Reports to IHMSA, Inc., P.O. Box 22356, Cheyenne, WY. 82003 Phone - 801-733-8423, FAX: 801-733-8424

Practical Hunter rules as will be printed in 2016 rulebook. Class Rules:

Class Description:

The purpose of the class is to provide a course of fire that simulates the conditions and distances a handgun hunter would of higher variable power scopes will be allowed, But they encounter in the field.

The intent of the class is to have handguns on the firing line that are representative of what would be commonly used for hunting.

All three classes will be shot from any SAFE freestyle shooting position including prone, kneeling, sitting, or standing.

Practical Hunter Long Course. will be shot on the 200 Big Bore range with the standard full size targets at their normal ranges.

Practical Hunter Short Course will be shot on the 100 meter Field Pistol range with the standard targets at their normal ranges, using standard field pistol cartridges only.

Practical Hunter .22LR Course will be shot on the 100 yard Small Bore targets at their normal ranges.

- 1. Any hunting style handgun with a maximum length of 21 inches.
- 2. Optics are allowed up to a maximum of 6X power. The use must not be used over 6x during the course of fire. The use of fixed power scopes over 6x is not allowed.
- 3. Guns must be as manufactured with only cosmetic modifications.
- 4. Ported barrels are allowed as long as they are shot from a SAFE position.
- 5. A rest such as a bipod or a sandbag supporting the barrel in the prone position may be used by an unclassified shooter and by shooters in classes A and AA.

Classification Scores:

A 0-15

AA. 16-25

AAA. 26-38

INT. 39-40

IHMSA ULTRA 500 Meter Silhouette has been approved for a 2 year trial period.

IHMSA ULTRA 500 METER RULES

IHMSA rules for Ultra 500 meter shooting shall be identical to those for Big Bore 200 meter shooting except as follows.

Two categories will be added.

Unlimited Ultra 500.

Unlimited Any Sight Ultra 500.

The preferred distances are as follows: chickens are at 200 meters, pigs at 300 meters, turkeys at 385 meters, and rams at 500 meters.

The 500 meter preferred firing period shall be a 30 second load period followed by a 2 minute and 30 second firing period.

A revolver shooter will be allowed time to switch the front sight if he/she chooses to do so. No additional sighters will be allowed.

In 500 meter shooting there will be no limit to the number of sighter shots allowed, but once the record shots have begun, the

course of fire must be shot without additional sighters.

The rams shall be set so that it takes between 28 and 32 ounces to pull them over with a trigger pull scale or other scale. Any cartridge and bullet may be used to shoot the course of fire, but in the event of properly set rams not falling when hit, these targets will be scored as misses.

If and when rams are hard set due to wind conditions, the bullet being shot on the rams must produce a momentum factor of 0.78 or greater at 500 meters for hits to be counted. Shooters will be on the honor system to know the momentum factor of the load they use on rams and to state that they know this to be over 0.78 when targets are hard set and hits counted. The momentum factor is computed by multiplying the bullet weight in grains times the remaining velocity at 500 meters and dividing the product by 225,200.

Ultra 500 Meter IHMSA Classifications

Unlimited Ultra 500 (Iron Sights):

INT: 34-40 AAA: 25-33 AA: 1-24

Unlimited Any Sight Ultra 500:

INT: 37-40 AAA: 30-37 AA: 1-29

Knocking the Targets down

By Daniel Hagerty

This article is mainly to explain the Equation used in the rules for the New 500 Meter Ultra silhouette. But I got carried away and covered some other items. Over the years, this became known as "Knockdown Factor"

First and Foremost, I am Far from an expert in Physics and Ballistics. Most of the information I provide is from Philip Briggs (from 1978), Ed Heers of Hornady Ballistics team (1979) and from an article by Todd Spotti in 2003. The Equations are from the Exterior Ballistics section of the Sierra Reloading Manual.

And First, I will go into **Target Construction.** As you know, Chickens and Pigs are made out of ½" thick steel Plate and Turkeys and Rams are made from 3/8" thick steel Plate. The following is the different types of steel we use in the making of the Targets. The Hardness is measured in Brinnel Hardness Number (BHN) and is the same as used in Cast bullets to measure their Hardness:

- **1. A36** (Hot Rolled Steel) has a BHN of 150-180. This steel is too soft for centerfire targets But is used in making rimfire and air pistol targets.
- **2. T1** Has a BHN of 310-360 and used to be the most common steel used in making Centerfire targets.
- **3. AR400** has a BHN of 380-450. Not used much as it is hard to find
- **4. AR500** has a BHN of 480-520. Most new targets are made out of this steel.

The Following is based on shipping weights provided by the Manufacturers of steel plate:

½" thick steel plate has a weight of 20.46 lbs. per square foot. 3/8" thick steel plate has a weight of 15.32 lbs. per square foot.

5/16" thick steel plate has a weight of 12.76 lbs. per square foot.

Now the reason for all this. The following is the surface area (Including the foot) and weights of each target: The surface area was determined using scale drawings. These are not exact numbers but approximations.

The **Chicken** has a surface area of .55 Square feet and has an average weight of 12 lbs.

The **Pig** has a surface area of 1.3 Square feet and has an average weight of 29 lbs.

The **Turkey** has a surface area of 1.7 Square feet and has an average weight of 25 lbs.

The **Ram** has a surface area of 3.5 Square feet and has an average weight of 53 lbs.

One thing that kept throwing me off is that they kept saying the Ram weighed 45 lbs. in the early days of the sport. After some research, I found that Rams made in the early 70's were actually made from 5/16" steel plate and 45 lbs. would be correct. Later they were made from 3/8" thick plate due to 5/16" plate is hard to find and the Targets just did not last long! Another item is the Turkey. Accounting for the ranges, the turkey actually has 10% less surface area to shoot at than any other target. The Reason that in Highpower rifle silhouette (and our new 500 Meter Ultra) the turkeys are set at 385 meters and not 400 meters is to compensate for this 10% difference. In Standard Big Bore (200 Meters) it is not compensated for. May explain why the turkey is one of the most missed targets. Another shooter excuse for missing the target! And now to the Equation. The equation is the momentum of a Bullet just before it impacts the target. Momentum is resistance to stopping. It's a kind of inertia for moving bodies.

The equation we give is:

$$Momentum = \frac{wv}{225200}$$

Where w is the weight of the bullet in grains and v is the velocity at the target.

The actual equations that it was derived from are the following:

$$m = \frac{w}{7000g}$$

And

Momemtum = mv

Where: \mathbf{m} is the mass of the bullet and \mathbf{v} is the velocity at any given range.

Is the acceleration due to gravity. We are using 32.1714 ft/sec^2

w is the weight of the bullet in grains and 7000 is the conversion to change the weight in grains to pounds.

Momentum is shown in **lb-secs**

For an example, I am going to use a 7BR load I use which is a Hornady 7mm 154gr SST bullet (with a B.C. of .525) at a muzzle velocity of 2009 fps.

A ballistics program shows this load to have 1709 fps at 200 meters and 1323 fps at 500 meters. With these, I come up with: At 200 meters, the load has a momentum of

1.168676731793961 lb-secs

At 500 meters, the load has a momentum of 0.9047158081705151 lb-secs

Over the years, Different numbers have been given for effective knockdown of the rams. Back in the 70's, an effective knockdown was between .6-.7 lb-secs But this was with rams weighing 45 lbs. Since then since Rams weigh around 53 lbs., we have raised it to .78 lb-secs for effective knockdown. As you can see, the 7BR load I gave has an effective knockdown factor.

In discussions, one thing that always comes up is that Gravitational acceleration is not the same depending on the Latitude and Altitude on your location on earth. Checking with the data known, The Poles of earth have a Gravitational acceleration of 32.26 ft/sec² and at the equator, has a gravitational acceleration of 32.09 ft/sec². Using my load above, here are examples using the extremes at 200 meters:

At the Poles, the load has a momentum of 1.165468071915685 lb-secs

At the equator, the load has a momentum of 1.171642256154565 lb-secs

As you can see, from the equator to the poles of earth, it only made a change in the momentum of 0.0061741842388803 lb-secs which is just too small of a difference for our use. If you want to be more precise, there are websites that will figure out the Gravitational acceleration for any given location on earth using the latitude and altitude of that location.

Another item that comes up in discussions is that we should be using **Impulse** which is the change in momentum from the bullet to the target. To figure out the impulse, you must know the change in velocity during impact and the time on the target of the bullet. These are very hard to figure out, so for our use, Momentum is better used.

Something that keeps coming up is the air resistance to the bullet and its length. We do not need to worry about this as the ballistic coefficient of any bullet takes these factors into account.

It was found in the early days of the sport that bullet design and construction made little difference in the effectiveness in knocking down a target. In other words, a hunting bullet or match bullet will make very little difference for you.

Now, we need to cover the proper setting of Targets. Per IHMSA Rules, All targets are to be set with the back of the foot even with the Back of the stand Except the Ram. The ram is to be moved to its topple point and then moved 1 inch forward for stability. In High power Rifle Silhouette, Rams are set full foot with the Back of the foot even with the back of the stand.

The next thing I will cover is the center of Mass of each target. On a chicken, this is almost dead center of the body. On a Pig, this is center of the body and about 2-3 inches toward the face. On a turkey, this about 2 inches above center of body and about 1-2 inches toward the chest. And the Ram, is almost dead center of body.

And now to sum it all up. The knockdown Factor of .78 lbsecs is the reliable momentum to knock down the ram with a center of mass hit. With a center of mass hit, the momentum of the bullet is transferred across the whole target and we need to move the Ram 1 inch to reach its topple point. With a full footed ram, you must move the target more than 2 inches to reach its topple point. This is why most High power rifle silhouette shooters use a momentum of 1.2 lb-secs or greater for effective knockdown. A hit high on the back of the Ram requires the least amount of momentum to knockdown the ram as you have transferred the force to only to part of the ram. The dangers to this is that the target must actually move farther to topple over and you increase your chances of missing the target. The same holds true for a hit closer to the legs of the ram BUT you must move that 1 foot more than 3 inches to get it moved off the stand. And last, is the Condition of the Ram will affect the reliability of knocking it down. Example is a Ram that has a 5 degree forward tilt needs to move almost an extra inch to be knocked down.

This took a lot of research and I hope I have not confused some of you.

Philip Briggs and Ed Heers articles can be found in the Book called "Shooting Steel" published in 1986 and Todd Spotti's article was printed in the July 2003 issue of the IHMSA News. You can find copies of all of Todd Spotti's articles at

www.lasc.us/ArticleIndex.htm

We would like to thank our industry friends for their continued support of our sport

CHANGES TO MEMBERSHIP RENEWAL IN 2016!

2016 IHMSA membership plan.

Switching to a calendar year IHMSA membership renewal. Every members renewal will be due Jan.1 of each year. To get everyone in sync we will need to do the following during the 2016 calendar year.

If you renewed your 2015 membership after July 1, 2015 you will get 2016's renewal for free. If you renewed before June 30, 2015 you will have to renew on Jan.1, 2016.

New members who join after the IHMSA World Championships will pay the full year membership dues but will get membership for the remaining months of the current year and membership for the following year. That way we won't have to deal with a partial year membership discount.

US Membership dues will be \$35 for members receiving the online newsletter and an annual printed copy of the newsletter. US Membership dues will be \$55 for printed copy's of the IHMSA News.

International postal rates will added to the International members dues.

There will be one annual printed copy of the IHMSA News that will be sent to all current paid members in the spring with match dates and range information in the early spring. Full time students will pay the junior rate of \$10 annual membership.

To make it a little clearer to those who have renewed within the past 6 months. If you became a member or renewed your membership between July 1, 2015 and December 31, 2015 you will not have to renew your membership until Januray 1, 2017. You will get your 2016 IHMSA card along with a new 2016 rule book and a printed copy of the newsletter in March, 2016. You will have gotten up to 18 months of membership for the old membership rate. The board thought that this was the fairest way to do it without getting involved with partial payments or refunds which would have increased the workload of head-quarters.

Continue to use your old scorecards until the new cards arrive in early March and transfer info onto the new cards. Match directors should be aware of this switchover and will allow shooters to compete with cards that have recently expired. The switchover will be complete on January 1, 2017 and at that point all memberships will need to be renewed on an annual basis.

Call for Nominations for Unfilled State Director Positions

The Following states Have unfilled State Director Positions and Have been Unfilled for more than a Year.

FLORIDA (Region 2)

INDIANA (Region 3)

NEVADA (Region 6)

HAWAII (Region 6)

ALASKA (Region 7) (not important as no sanctioned matches in Alaska)

Due to the length of the Vacancy, Normal Nomination procedures are being waived. If Anybody is Interested in Becoming a State Director, Please Contact your Region Director. He will make the determination On how to proceed for election.

Only Requirement to Fill these positions is You must have been a resident of that state for more than 6 Months.

I do not yet have the list of Region directors up for Re-election and when I get them, I will post nomination forms.

The Executive Committee is fully staffed and no nominations are required this next year.

While everything seems to cost more, Sierra's reloading advice is still free.

Monday through Friday 8 a.m. to 8 p.m. (CST), shooters and hunters with reloading questions turn to Sierra's Ballistics

Technicians. When you're looking for ways to maximize your shooting performance, email sierra@sierrabullets.com, post to Facebook or give us a call at 800-223-8799. The cost is free.

But the advice is priceless.

1400 West Henry Street • Sedalia, MO 65301 www.sierrabullets.com

THE NEW SILHOUETTER Kudos to our Manufacturers

By Ken Horowitz

The more I deal with defects and sloppy workmanship in non-shooting related items, the more I appreciate what a great industry serves us. Sure, we've all had issues with firearms, ammunition and related goodies, but in my experience, these have been few, minor and in most cases, the purveyors have made good on them. Not so with many non-shooting items.

Just yesterday as I write this, I was dealing with defective plating on an item I ordered, scheduled a service visit for a recall on my car and called my lawn service (lazy?) to complain about the gasoline spills that make those round spots on the grass. Don't even ask about cell phone service. Three defect hits in a day is more than I have in firearm related quality control issues in some years. As for post-defect service, two of the above three are okay and the other is less so. The car is scheduled and they'll do what they should have done when it was manufactured. The lawn service will be here within the next day or so to assess the damage and fix things.

On the plating item, I'm on my fifth back and forth e-mail with anemic response so far. It's a small item, an accessory piece that was supposed to be solid nickel, and it is not very expensive. The piece sent was chrome plated base metal, not what I wanted, but I could have lived with it. However, the plating was defective, with a significant gap and several other imperfections. You would think that if someone decided to substitute a part that it would have been checked to make sure it was good. So, someone made the piece wrong, someone else packaged it without kicking it, someone else chose it to send and it has now resulted in all those e-mails as well as a phone call. In my last e-mail I just told them to do what they want; I'll buy the piece locally and if they ever do send me a good one, I'll just give it to someone who can use it because I only need one.

I have never had that kind of poor customer service in our industry. Nor I have had many defective products. The only time I ever had a factory cartridge missing a primer was in 1997. It was a 45ACP from one of our major manufacturers. It was such an odd event that I remember the circumstance, including clearing the grains of spilled powder that came out through the empty primer flash hole after the misfire.

Years ago, when some cartridge cases from a lot that I purchased from a major online retailer collapsed under the slightest press pressure due to poor annealing, the supplier immediately refunded my full payment and told me to keep whatever cases were okay. When a new AR-15 was short stroking, the manufacturer fixed the problem pronto; that same AR-15 later "doubled," but was again quickly fixed by the manufacturer who also sent back two spare magazines for my inconvenience. I have not had a problem in the many years since it was made right. A detached reticle on a scope? No hassle, replaced. A binocular turret gone awry? A new unit was sent promptly.

Is our industry perfect? Not at all. But the number of defects compared with just about anything else that I use is extremely small and the response is far superior to other products.

So many other industries take an attitude of putting products out there whether ready or not, paying inadequate attention to quality control and waiting for customers to discover defects and report them back to the company. Then, once that happens, some companies will make things right while others will balk.

I've been led to believe that at one time or another products were better made in general, but the evidence of that is anecdotal at best. Automobiles seem to be much more reliable than my first vehicles, although some of that may be because my earliest vehicles were whatever my skimpy part time jobs could get me. But beyond that, by the time I was in my twenties I was able to buy brand new showroom cars, none of which was as reliable as current production. The downside is that while I used to be able to remove an air filter and wedge a stick in the butterfly

of a carburetor to get things started on a cold morning, today I have little clue as to what all that stuff is under the hood. The evolutionary trail which has been converting mechanicals to electronics keeps narrowing the number of journeymen who really know their way with a set of wheels.

Don't even get me started on electronics! Well, I guess I'm here. How did we come to a point where we accept the process of pulling the plug, waiting 10-30 seconds and replugging a device to get it to go. Would we accept such ridiculousness with a car? Would we buy a rifle where the instructions are to empty the chamber and magazine, wait a period of time, then reload? I find it incredible as to our tolerance for products that perform so poorly. Sure, they do wonders in processing information when they are working but the reliability is well short of satisfactory. I just got rid of a box full of neutralized hard drives that I lifted out of personal desktops and laptops over the last decade and a half.

Perhaps the worst culprit is the cell phone. I'm not going to address the myriad of tasks that this microprocessor now does, but at its basic purpose, making calls and not losing them, it's shameful that the technology has been around for so many years but dropping a call is still de rigueur. The last time I loaded an upgrade for my so called smart phone, it just got slower. How smart is that? My "stupidometer" just hit a bell on that one.

Now let's look at our industry. The guns, ammunition and optics, dollar for dollar, are more accurate and reliable than they used to be. Out of the box 1 MOA is not unusual for a rifle and many shooters who once had to reload for accuracy are finding factory fodder to be top notch. Related to adjusted prices, the average working stiff can get more gun for the same or less money than in the "good old days." For us, the good old days are now.

In some cases, function has replaced form, but when all you're looking for is a reliable tool to harvest your favorite game, you may not really care about real wood versus synthetic stock or cut checkering versus pressed checkering or stippling or even a smooth stock. You or I can go into a big box store or the local gun shop and walk out with a tool at a fraction of our weekly pay compared to accomplishing the same purchase years ago.

Also improved is the breadth of offerings ranging from barely adequate to high end custom. Junk is junk, and we have some of that too, but I would daresay not for the most part. That entry level rifle that I mentioned in the last paragraph may have high wood or no wood, but it will chamber the right cartridge, bear the pressure of its designated chambering and fire a decent group if you do your work. I don't know of any other industry that is so responsive to customer needs and so quality driven unless you're talking megabucks ventures such as aerospace or nuclear power plants.

I would speculate that if more people were involved with shooting sports on a level somewhat above the annual deer hunt just to hang with your buddies that the appreciation of manufacturing quality would heighten their standards as to what is acceptable from non-shooting industries. Those who do not enjoy the level of quality that we get are probably more apt to accept lower levels of quality from others. After all, they have no high standard as a basis for comparison. Unfortunately, the youngest generation, raised so much on electronics, are suffering the worst. They accept poor performance and think it is normal to be goaded into the next model as a solution.

I give a loud big thank you to our manufacturers that so greatly contribute to the enjoyment of shooting. And, since my pocketbook often speaks more clearly than my words, I continue to do what I can to keep things going. Kind of makes me feel like I'm contributing to the betterment of humanity (not that I ever needed an excuse to buy shooting related stuff).

On an even more important level, we all have things for which we are thankful and as we approach the end of the calendar and the birth of a New Year, no matter what your beliefs or how you celebrate this time of the year, I wish everyone the best during this Holiday Season and for all of you to enjoy a Healthy and Prosperous New Year.

IHMSA NEWS-SECTION B

MARKSMANSHIP COMPETITIONS

The Burris cup:

Scoped .22 Long rifle caliber Handguns only. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a ransom rest, vise or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns setup for Creedmoor to better compete.

The Weaver Trophy:

Scoped centerfire handguns. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a ransom rest, vise or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns setup for Creedmoor to better compete.

The Merit Challenge:

Centerfire handguns with iron/open sights. Your best 5-shot group at 100 Yards or Meters. Groups must be fired from an IHMSA legal position. No benchrest or artificial support allowed.

The Daisy Avanti Trophy:

AIR production guns with iron/open sights. Your best 5-shot group at 18 Yards. Groups must be fired from an IHMSA legal position. No benchrest or artificial support allowed.

General Rules:

All entries must be shot with IHMSA legal guns. Production, Revolver, and Unlimited guns are allowed in the Burris, Weaver and Merit classes.

Witness:

Winning groups must be witnessed by an IHMSA or NRA member. Eligible winning targets must be signed and dated by the shooter and witness. Also, please include the shooters IHMSA number and the witness's IHMSA or NRA number by their name. A witness is not required to enter but is required to win.

Targets:

Targets submitted must contain no more and no less than 5 shots in each bull zone.

RECORDS PROGRAM

Marksmanship program

Burris Cup:

My second target has arrived and it is also a Burris Cup entry with an even tighter 5 shot group. This is from Stephen Soya who shoots at the Barry county conservation club in Michigan. No weather report with this one. Stephen is shooting an Anschutz exemplar. This is topped with a 3-10 mil-dot weaver scope and he is sending SK standard plus down the tube. I am coming up with a group of 0.696" center to center.

Stephen said he shot this from his normal freestyle position he uses for 1/5 scale targets. Very nice shooting Stephen.

My log sheet is pretty bare so send those targets in. Safe shooting. Dave Edney

½ and 1/5 Scale Records

November 2015

By Jim Harris

Well, the end of the year is approaching, and for many areas the end of the season is already done and in the records.

Special note should be taken of Steve Soya of Michigan, who is now at 15 perfect 1/5 UAS scores this year. I don't believe anyone has placed so many in one year. Congrats Steve! (Steve is also leading the 1/5 UAS category with 8 perfect 40x40s.)

Congrats to Paul Habig of Nevada for his perfect 80x80 Agg in 1/5 Scale – that means he shot a 40x40 with open sights as part of the package.

I've been out of state for over a month and trying to tally the incoming records manually (by hand) from email reports off my phone, without reference to my computer reports. Needless to say, the chance of me making errors or omissions increases dramatically.

Still, I think I've got the majority of reports tallied and up to date. Please contact me if I've left out any records or made any errors.

Send your records notices to me at harrisgrp@earthlink.net, or my home address: 1567 Bridget Ave., Simi Valley, CA 93065. Or give me a call at (805) 581-0009.

Field Pistol Records Program By Al Kuenn

Robert Walker and Melvin Calliham were thinking alike in November. Each shot a very nice 34 Prod and both with BF Pistols and both in 32-20. Their match was shot at the Cherokee Gun Club in Gainsville, GA. No mention of a shoot off. Great shooting gents. That gives us a three way tie for the lead in Prod this year.

Shoot well and shoot often.

Send your scores to Al Kuenn, 5725 E Peak View Rd, Cave Creek, Arizona 85331 or e-mail to:

allank@cox.net.

By Dan Hagerty

I only received 1 new score this issue and that was Paul Habig of NV shot another Revolver 40!. That makes 5 this year! At this rate, he is going to beat me with 9 total 40's since 1992!

Next month, I will take the 60 and 80 round scores an add them for the yearly review.

Scores next in parentheses are the converted scores to a 40 round match.

Please send your reports to:

TOP SHOT SILHOUETTE QUITMAN, LA October 24, 2015 BY: CHARLIE BRAUD

After several years with no available matches, IHMSA Big Bore silhouette has returned to Louisiana. The inaugural match for Top Shot Silhouette took place October 24, 2015. I've been trying to get a match going for our state for a couple of years now. This is the fourth location we considered and

after several false starts here and there we finally
got it done. In a coordinated effort with some NRA
Cowboy Lever Action rifle silhouette shooters we
are now up and running. Three of us arrived at the
range late on the eve of the match to make final
preparations and we had to put in quite an effort to
get everything ready. Thanks go out to Will Kirste
and Bruce Finley for their hard work. On match day
the weather did not cooperate. Rain started soon
after placing out all the targets and did not let up all
day. State Director Philip Braud made the long
drive to be with us and fired the very first entry.
Using his 30-221 XP100 in UAS he proceeded to
christen the range in fine fashion with a 40X40. I
was up next shooting a Half Scale entry using my
XP100 7 TCU with cast bullets. Two rams evaded
me and I settled for a 38X40. Will Kirste was next
up with a UAS entry. A 221 Fireball XP100 was his
choice and he hit all 40 but suffered one stubborn
ram for an excellent 39X40. The rifle shooters fired
several entries also but I'm afraid I don't have their
scores to share. As soon as I can get a 2016 sched-
ule finalized I will publish it but I think we are aim-
ing for March through August on the third Saturday
of each month.

Jackson Purchase Rifle and Pistol Club Paducah, KY By Lee Jackson 9/20/2015

We shot our fourth match of the year today and it could not have been a better day for it! We had very pleasant temperatures and bright skies throughout the day. The range was in great shape as well. Thanks to the maintenance crew for taking such good care of the facilities for us. With Everything in Place, The stage was set for some good scores and our shooters took advantage of it.

Editors note: due to problems reading the match report, I am unable to print the results. If the Match director could please submit a more readable copy, I will get them printed.

Barry County Conservation club Hastings, MI. By Larry Clark 8/22-23/2015

Steve Soya shot a 40+9 and another refire 40 in UASFS-INT. He also fired a refire 40 in UASHS-

INT. Larry Clark shot a 40 in UAS-INT. Chris Ronfeldt shot a leg up in AP US-AA with a 30. Dave Krysiak fired a leg up with a 34 refire in BB R-AA. Denny Nelson Fired 2 nice scores in UASFS-AA - a 39 and a 37(refire). Denny also got a leg up shooting a nice 38 in BB R-AAA Thank you Denny and Julie Nelson and Randy Lober For helping us pick up the range Sunday and Beating the Big Rain storm.

Steve Soya shot an Amazing "five" 40's, I in UASHS and 1 refire, and 1 in UASFS and 2 refires. Steve has had 15 UASFS 40's this year! Denny Nelson fired a 37 then a 38 refire in BB R-AAA. He is now in R-INT for next year! Ray Homrich fired a 33 in .22 R-AA which might be his 2nd leg up into AAA! Jeff Hunt shot a very nice 36 in BB US-INT.

A BIG thank-you to Denny and Julie Nelson for all of the carpets you donated to us and also for the sloppy joes, potato chips, cookies and cupcakes that you brought on Saturday.

OHIO

Logan Handgun Association Bellefontaine, OH By Steve Powell 7/25/2015

We finally had a match with great weather and shooting conditions after a long wet and cool spring in Ohio. Our turn out was a little better than normal with just over 40 entries.

Doug and Dave Edney made the trip over from western Pennsylvania to shoot some good scores with us. The illusive 40 was hard to find this match as Dave Calloway showed us with 2 great 39's, one in UASHS and one in smallbore UAS. Bruce Smith had the same tuff luck with an iron sight 39 in BB unlimited. It has been fun watching Rich Baird trying to sneak up on a 40 in Half size with a 22 hornet and the way he is shooting it I think he will get there one of these matches. Of course there was the monthly dog fight in BB UAS where Jeff Webb knocked out a fine 40 after some close scores in the past and as always the shootffs sorted the pack out.

We had perfect weather for our August match with lots of sunshine, good temps and a light wind just to mess with the standing and 22 shooters.

Even Though we had a small turnout we had several great scores. Bruce Smaith shot the only iron sight 40 in BB UNL and Jim Kesser shot a 40+9 shoot offs in UASHS. Jim must be relaxed now after he and the Tusco team hosted the East coast championships last month and done an outstanding job. Then we have the Big Bored scoped class or as I call it "The Glass eye Senior class" where only a shoot off or two seperates the whole class and the competition is tight to make it fun.

Thanks to Brian Gildea for Introducing new shooter Mark Schultz to IHMSA shooting this match. Mark was able to turn in a couple of impressive scores for his first time and we hope to see him back next month.

KANSAS

WOWCC Williamsburg, KS Bt Chris Dunlap 8/2/2015

We had a pretty good match this month with 32 guns. There were only 2 40's today. Sam fields was shooting his rifle for his third match and shot his first 40. Bob Doherty got 40+10 in Practical hunter short course. We were happy to have Bill and Mike Kraft up from Peck, KS again.

2015 Kansas-Missouri State championship 9/5-6/2015

We had a very good turnout for the hot KS-MO state championship. There were only 5 40's this weekend, 3 in UAS and 2 in PHSC. Bob Doherty was our champion in PHSC with the only 40+10. Brett Dunlap was champ in UAS with 40+9. Bob Curry took all of the standing classes.

Oklahoma City Gun Club Oklahoma City, OK By Jim Fields 7/5/2015

Our July 5th match was ushered in with temps in the low 90's and very little wind, which made for a hot day at the silhouette range, however we had a fairly good turnout despite the heat with 43 entries. There were 14 40's shot in this match.

Our new Practical Hunter category is a great way to introduce a new shooter to our sport, so think who you might want to introduce to the most exciting shooting sport in the world.

Thanks to our target setters who, as usual, did a great job as well as those who helped in the stat house with our noon meal.

NEVADA

DSRPC Las Vegas, NV By Paul Habig 8/16/2015

The Sin City Silhouette shooters have got to get healthy. Small turn out - AGAIN and Val was trying new bullets and new powder trying to get ready for the extravaganza. Maybe I can get him out to "cheat" a little before he goes. He needs work. Debi just keeps shooting 36-38 in UAS but I think she'll hit that 40 soon.

Big Bore:

UHS-INT	Val Shaver	XP6BR	34

8/23/2015

I don't know if there was an X up on the calendar or what, but the Sin City silhouette shooters could not find the range today. Where were you guys?

On the one Bright spot we did pick up a new shooter today. She may not be Annie Oakley but Susan Redhead did shoot a very nice S-15 her first time out. Debi W. struggled in UAS and Val Shaver was a touch below his norm, But a UFS-36 is still pretty darn good.

Val Also shot a P-22 in FP which surprised us all. He says he cant shoot standing but on the rare occasions he does shoot it He does quite well.

The big news for the Sin City Silhouette Shooters this month is Debi Wright finally shooting a 40 in SB-UAS. Nice shooting Debi and now you have 11 months to shoot another. You know you want Int'l class. Mel Douglas shot a UAS-37. What we need t do is get them both in Int'l class and get the shootoffs going again. Val Shaver had one shot slip over the back of a turkey and finished with a 39 in UASFS. Susie Redhead(that's her name, not a description), our British import, was doing very well Standing but wasn't happy with her sights at long range so she came out with a Ruger Charger with b pod and shot a 33 in Practical hunter. Now she can't use the bi-pod. Stay tuned for further adventure.

California State Directors report By Daniel Hagerty

Due to the Long time without a state director for our state, I have taken the job. Most of you know me and I hope you are happy with me taking over the reigns. My first order of Business will be getting the Match schedules for the Clubs taken Care of.

My next order of Business is to attempt to Get a New IHMSA club in Northern California. We need a club in Northern California as we still have a lot of shooters up here. My last order of business is to Get the New 500 Meter Silhouette setup. At present, Avenal gun Club will be the main club running these matches.

As you know I am Also the IHMSA news editor, so you will occasionally see my reports.

Frank Kodl shot his first IHMSA sanctioned match as a member and ended up taking the UAS title as well as High Senior. Congratulations Frank!

Those of us that shot Standing weren't all that excited about our scores except for Ron who took the US title with a nice 30.

Thanks to Frank & Ron for helping to set up/tear down the range. It was great to have Boomer Aber shooting so soon after a knee replacement!

We seem to be adding to our rifle entries, and that is a good thing. We have more participation & IHMSA is getting an extra buck sanction fee. All are welcome to shoot steel! We are always happy to see Walt & Rich.

Dave Whitman & Mike Abel decided to have a 40 Shorty duel in Field Pistol & Mike ended up on top by two targets. This sport is certainly a "shoot what you brung" event. Paul Hoadley shot a nice 29 to take the PAS title. However, Dave did not go home empty handed as he took the Fifth Scale title.

Mike Abel wanted to sort out his scoped FA revolver for a hog hunt in Texas & shot a nice 40 in Practical Hunter Short Course. Mike also took the UAS title in Small Bore.

Over on the Small Bore side, Paul Hoadley took the Production title. Charlie Dean shot the only iron sighted 40 taking the Unlimited title and High Senior. He also was our Revolver champion.

Thanks to Dave, Mike, Paul, Walt, and Charlie for helping to set up and tear down the range.

I'm not sure where all our shooters were today. Honestly, this was the smallest Big Bore match I can remember in my 31 years in the game! The one advantage of it was that everyone won something!

No 40's today, but Charlie took High Senior with his 39. Dave came close to a 40 in Half Scale but the rams didn't cooperate. Rich came close to his goal of shooting in the 30's with his Winchester. Paul made it a "shoot Standing day".

Thanks to Dave, Charlie, Rich & Paul for helping to set up and tear down the range.

WASHINGTON

Paul Bunyan Rifle Club Puyallup, Washington Bret Stuntebeck, Match Director 11/7/2015

We had 4 shooters this month put 11 guns across the line. Had several regulars that were not able to make it this month due to Weddings, Funerals and a couple out of town on business trips. Weather this month was...lets just say WET. It rained most of the match with only a few breaks in the weather. At least it was not raining during set up and take down of the targets. We had a visitor this month Al Richardson, our clubs editor for the bullsheet came down

to check things out. He said he would like to take some pictures and do an article on silhouette. I suggested it might be better when we have more of our regular shooters in attendance. He agreed to do this at a future match. We all tried to get him to shoot with us. He did try his hand on some of the swingers and said he would come back once obtaining some sight settings. We are going to hold him to

that!! On to the results of the match.

No 40's this month. Joe Stumpf posted an UAS-Int 39 missing one turkey. I posted a UHSAS-Int 39 also missing a turkey. In U-AAA, Joe Stumpf posted a 35 with Richard Nicol right behind with a 33. Richard had a U-AAA re-entry and posted a nice 38. Nice shooting guys. I manage to miss a couple of turkeys in U-Int and ended up with a 38. Richard Nicol also posted a P-AAA, 30.

On the Smallbore side Joe Stumpf posted a UAS-AAA, 35. And Dave Chalfant posted a S-AAA, 21.

Our target setters did a fantastic job setting targets in the rain, don't know what we would do without them. Thanks to all who stayed to help pick up targets after the match. Until next time shoot straight and be safe.

12/5/2015							

We had 4 shooters this month put 14 guns across the line. It was another wet one this month with rain for most of the match. These are the time we really appreciate our target setters.

On to the results of the match.

We had a couple of 40's this month. Joe Stumpf posted an UAS-Int 40 and I posted a U-Int 40. In U-AAA, Richard Nicol posted a 36 with Joe Stumpf close behind with a 31. Richard had a U-AAA reentry and posted a nice 37. Nice shooting guys. I managed a US-AAA, 28. I started off well missing only 2 targets through Pigs, then I fell apart. Vince Leete edged out Richard Nicol in P-AAA, 34 to

On the Smallbore side Joe Stumpf posted a UAS-AAA, 31 this month switching back to his Browning Buckmark. He was trying some different ammo which may have accounted for the lower than normal score. Vince Leete posted a nice P-AAA, 32.

In Field Pistol Vince Leete posted a PAS-AAA, 17 and I posted a P-AAA, 13.

All in all, other that the two 40's shot, scores were down by just about all shooters. Light conditions were very poor so that is the excuse we are all using.

Our target setters did a fantastic job setting targets in the rain, don't know what we would do without them. Thanks to all who stayed to help pick up targets after the match. This raps up our 2015 season. Hope everyone has a Merry Christmas and a Happy new year. We will kick off the 2016 season on January 2, hope to see everyone there. Can't

think of a better way to start the new year than busting some steel. Until next time shoot straight and be safe.
