Shooting results from Oklahoma, Kansas, Texas, Colorado, and Missouri convened at the Oklahoma City Gun Club on May 30th, 31st, and June 1st for the well-attended Oklahoma State Championship.

Scott Thompson was the big winner at this 60 round match, putting on an impressive display of shooting in taking the Ironman title as well as many individual events, including shooting the only perfect score in Big Bore unlimited.

David Briggs should have gotten an “Ironman” trophy as well for the day he put in on Saturday—he got up at 2:00am to drive to OKC from Fort Worth, TX and shot several guns during the day, then shot Air Pistol until about 10:30 that night. That’s dedication!

Another “Ironman” was Jim Fields’ grandson Ryan. Not only did he serve as one of the three hard-working target setters, he also got some fantastic shooting in as well. A 58x60 in SB UAS and a 51x60 in UASSF3 were a couple of his accomplishments. Good luck to Ryan at the World Championships, especially on the second day, which will be his birthday.

Other highlights included John Blue winning the hotly contested UAS Air championship. This was a great event to watch. With four contestants shooting 60x60’s, their shoot-offs involve moving the turkeys out to the ram distance, and then having to hit the turkey in the head to count as a hit. That’s not the head and neck, or just a significant part of the upper torso—it’s just the head! If you know how small those Air Gun silhouettes are, then you know what a tiny target the turkey head is! And John Blue hit 8 of them, besting Jim Fields by one.

There was only one shoot off on Sun-day, due to the fact that anybody that shot a perfect score during the shoot then shot 10 shoot off targets. This was a good change, in that not only did it eliminate the often lengthy shoot-offs, it also allowed the regular shooting to go longer on Sunday. Gary Drews and Jackie Brown shot it off for the small bore UAS title, with Gary being the victor.

In typical fashion, Jim Fields put on a very well-organized match. As many as 25 or 26 relays were put in on Saturday, and that was just with three target setters. Those guys really worked their tails off. A timely weather pattern also helped, as it wasn’t too hot and there was very little wind until Sunday.

Not only does Scott Thompson shoot great, he shows us in style.

IHMSA News Online:
The IHMSA News is now available online and it seems to have had a very popular response. With many people these days preferring to read their newspapers and such things electronically these days, we have had several people contact Headquarters to stop receiving the paper copy—which in turns saves IHMSA money on mailing of the IHMSA News. If the electronic version works for you, please let either Cindy or I know if you want to be taken off of the mailing list and help save IHMSA some money on postage.

Change of Address:
While we are on the subject of mailing, Cindy also has several members for which she does not have a current address for, as she has gotten “Return to Sender” on some items. If you have moved recently, please email or call her and update this information.

With IHMSA Headquarters and the Editor being separate positions now, let us address a couple of common clarifications and questions we have been getting. If you are a computer person, then match reports, schedule additions & changes, and anything desired to go into the IHMSA News can be sent straight to Joe. For people who send files electronically, Microsoft Word is the best format to use—this saves a lot of time in reformatting or retying things to be sent to the printer.

Match recaps, membership items, and basically everything else related to IHMSA most likely goes to Cindy.

IHMSA News from Headquarters & Editor
President's Column

I hope this month finds everyone healthy and enjoying the nice weather. I know I am. I just finished one big project around the house by painting our front porch with a pergola and the backyard deck. Now I can really enjoy them both.

Enough of that, back to IHMSA, first it appears that some members are confused as far as procedures for processing match results and sending in the funds. I have asked Cindy Smith our HQ person and Joe Frey our editor to reiterate the procedures for all of you. Cindy took over Lorene’s position with most of Lorene’s duties and Joe took over as editor. So the two work very close together in this process, so please ensure that you send the right documents and payments to the right person.

Another item I would like to address is the printed scorecards that we currently provide; again it is a costly item on the card stock, so we are looking into another cheaper paper. In addition, we are in the process of loading them on the IHMSA web site and each match director or any member can print them off for themselves. Let me know what you think about this process.

I have been asked about the rising costs of registration for the World Championships, especially when we are not seeing the numbers of shooters participating in our sport. Let me remind you, first, we are not in this to make money, all positions on the IHMSA Board are volunteer unpaid positions. The cost of food, goods (shirts & trophies), insurance (required) and miscellaneous items needed just keeps going up and these are all things required to run the World Championships. That is why the IHMSA Board is looking to save costs in other areas of running our organization so we can keep on going. This is my last year as president and we are currently looking for a new President, step up and bring your ideas to the IHMSA Board.

As of this writing we have 406 entries and 48 as of 6-17-14 shooters for the World Championships in Oklahoma. Until next time, shoot safe and often!

REQUEST FOR NOMINATIONS
Office of Vice President of IHMSA, Inc.

Article VII, Section 1 of the IHMSA bylaws state the following: “The officers of the corporation shall consist of a President, and Secretary/Treasurer. Officers shall assume their official duties following the close of the annual meeting and shall serve for a term of three years or until the election and qualification of their successors. To ensure stability, the term of office of the officers shall be staggered.”

For 2014, the office of Vice President of IHMSA, Inc. is scheduled to be filled by election of the membership held prior to the 2014 annual meeting. The individual elected shall serve a three year term ending in the year 2017.

Candidates for the office of Vice President should use the nomination form provided below to declare their candidacy. The nomination must bear the signature and endorsement of the nominee and signatures of two other financial members of the corporation.

The Nominations Officer must receive nominations no later than the 31st of July 2014. Candidates will be declared in the September edition of the IHMSA News.

Each nominee may provide a statement of claims of not more than 500-words that states why he/she should be elected to the office for which he/she is being nominated. Said statement of claims will be published in the September edition of the IHMSA News. To be published in the IHMSA News, the statement of claims must be received by the publishing deadline for the September edition which is August 2, 2014. Therefore, candidates should submit the statement of claims with their nomination.

Nomination for the office of Vice President of IHMSA, Inc.

I, do hereby declare my intention to stand as a candidate for election to the office of Vice President of IHMSA, Inc. I hereby endorse that my name be placed in nomination for said office, and attest to being a member in good standing of IHMSA, Inc.

Signed:

IHMSA # 

We, the undersigned financial members of IHMSA, Inc. do hereby endorse this nomination of the above member for the office of Vice President of IHMSA Inc.

Signed:

IHMSA #

The bylaws of IHMSA, Inc. require nominations for this office be submitted on this form to Nominations Officer, Dell Taylor, 8699 Midvalley Drive, West Jordan, UT 84088. The Nominations Officer must receive nominations no later than the 31st of July 2014.
IHMSA is Growing

Because of . . .

People like Cindy and Dave Smith of Cheyenne, WY. It is no secret that the financial health of IHMSA over the past several years has become dire. For the past 6 years, IHMSA has had a net loss on the books. In two of those years (2010 & 2011), net losses exceeded $20,000.

“You don’t have to be a math major to know what this means to this organization. The single largest expense of IHMSA has been the salaried position of running Headquarters, which for so many years was performed admirably by Lorene Thomsen.”

In April, Cindy Smith volunteered to take over IHMSA Headquarters. Cindy is not retired, she is not at home mother. And Cindy is not a long-time IHMSA shooter, having just started to pull the trigger a couple of years ago. Cindy works a 40 hour week at a doctor’s office, yet she has volunteered to take over what once was a full-time paid position. Cindy has been involved on a local and regional level for several years, and continues to expand her role for what she believes is a good cause—that cause being this sport that we all love.

HPC and Dave shares that passion.

Dave has only been an IHMSA member for 7.8 years. Judging by his IHMSA number, he is a disciple of Region 8 director Jim Bobbitt and long-time IHMSA supporter Harry Jones. Dave became a fixture in assisting not only Wyoming shooters, but also with the South Dakota state match and the Region 8 shoot which he is still involved in, Pringle, SD. He obviously learned a lot from both Jim Bobbitt and Harry Jones. With their unflinching passing just months apart, he readily stepped up and took the reins as both the Wyoming State Director and Region 8 Director. He has followed through with range improvements to the Cheyenne Rifles Pistol Club silhouette range. He has coordinated with a new rifle silhouette group in Cheyenne—sure, that brings nothing directly into IHMSA, but it’s a good thing to do. It is getting more people out shooting, and that is the whole point. I bet some of those rifle folks will come over to the IHMSA side once they see what it is all about and they see all the good work that has been done to promote IHMSA in Cheyenne, WY.

Elgin Gates was such a motivating force for this organization, and his efforts will never be forgotten. But the times have changed. Mr. Gates sold one of his houses to John Wayne—I don’t think any of us can compete with that! I travel around and hear all these great stories from the 1980’s, and those are truly great stories. But probably would compile a book about them, because there is a great history to this sport. But things have changed. Mr. Gates is no longer there to financially support what was a great passion and hobby of his.

But there are still a lot of stories out there, like that of Cindy and Dave. Common working-class folks that spend a ton of their “free” time promoting this sport which we all enjoy. We want to hear those stories, because they are out there. There are a lot of dedicated people in every section of this country doing great things for IHMSA.

I hope people think of that the next time they go to a shoot. That match director who is calling the line, he/she got into this because they like to shoot silhouette. Of- fer to call the line for a few relays. Help set up and tear down. At the World Champions- hip this year, offer to relieve somebody who is checking guns. All-volunteer organizations and now it truly has gotten back to all-volunteer, is heading in the right direction.

Cindy and Dave Smith have certainly demonstrated those traits. With Cindy taking over Headquarters on a volunteer basis, she has been making the difference between IHMSA losing around $15,000– $20,000 a year to IHMSA profiting about that much. That is very powerful. She alone will make IHMSA profitable for the first time in several years. It is something I hope she is incredibly proud of, and that others are unbelievably appreciative of. Dave continues to make an already strong Region 8 even better. IHMSA is definitely growing because of Cindy and Dave Smith from Cheyenne, Wyoming.

Wildcat Corner

by Tom Acheson

Handloading can be a fascinating and sometimes frustrating endeavor. There can be just a few steps to reloading a cartridge or a collection of many small steps to more precisly handload your ammunition.

One of those small steps looks at neck tension or bullet pull. This is not the overall length of the loaded round but the amount of “interference fit” between the outside of the bullet and inside the case mouth or neck.

In my Remington XP-100 I had been shooting a .30 PFC for 7 match seasons of CBA benchrest competition. The case is a Lapua 6 PFC and it is opened up to use a .30 caliber cast bullet. In my situation all of the bullets used were cast bullets from an LB7 mould, sized at .311” diameter, weighing 185-grains. The muzzle velocity is in the 1900-2100 fps neighborhood.

The first season I really struggled to develop an accurate load. Here are some collected stats:

Season 1 (2005)

16 (10)-round groups @ 100-yards.

The average group size was 1.689”, with the smallest one at 0.785”.

That would have been a new CBA National Record at the time but the range where it was shot did not have a moving backer system, which is a requirement to submit a target for National Record consideration. The NR at that time was 0.984”.

(4)-5-round groups @ 200-yards

The average group size was 1.320”.

(4)-10-round groups @ 200-yards

The average group size was 4.226”.

(4)-5-round groups @ 200-yards

The average group size was 3.209”.

Then in season two things got better.

Season 2 (2006)

(14)-10-round groups @ 100-yards.

The average group size was 1.496”, with the smallest one at 0.669”.

(4)-5-round groups @ 100-yards

The average group size was 0.6785”

4 (10)-round groups @ 200-yards

The average group size was 2.011”.

5 (4)-round groups @ 200-yards

The average group size was 2.040”.

5 (4)-round groups @ 200-yards

The average group size was 1.778”.

10 (10)-round groups @ 200-yards

The average group size was 2.260”.

Comparing the above entries of Sea- son 1 and Season 2 line for line, the Sea- son 2 entries are better than Season 1 (with one exception) but the single differ- ence is neck tension based on the smaller ID of the neck sizing bushing, so yes I’m a believer in the influences of neck ten- sion. In Season 1 the Redding neck siz- ing bushing was 0.325” and 0.326”. Doing some experimenting at the start of Season 2, an even smaller bushing helped the ac- curacy improve. That neck sizing bushing was 0.324” and that was the only thing that changed (except me). The same powder/ charge weight (VV 113) and primers (R-7 1/2’s) were used. The Lapua cases had been neck turned to develop 0.0005” clearance on each side of the bullet when a round was chambered. The JP-100 weights 7-pounds and has a Weaver 24x scope.

OK, so the small population of the 4-group examples aren’t statistically meaningful. But (3) of the (5) 2006 NR were shot at 200-yards. Our local club shoots mostly 100-yard events so my 200- yard opportunities are somewhat limited. The cases present shot at 200-yard 223 Silhouette (223 case with .30 caliber bul- lets) but maybe I should go back to the 30 PFC regardless though. It is still fun!

Excitement mounts as IHMSA once again continues to grow.

Competition Bullet Seating Die

No seating die on the market is built to this level of precision!

Ensures proper seating pressure by the cartridge case and bullet being completely supported and aligned in a seating die during the seating process. Ensures the bullet seating begins in the lands and grooves. Ensures bullet seating is not cramped. Bases ideally sized so that a bullet can be demonstrated in “full" diameter, seating process produces a bullet seating in which the bullet is seated to the case, case is 100% aligned, bullet can be removed and inserted into a finished cartridge is undamaged.

˝The Redding Competition Seating dies are, without question, the greatest bullet seating dies I have ever used! I am extremely impressed with the design and the quality of construction.˝

Installment Plan Life Memberships

The Installment Plan for Life Memberships allows you to purchase a Life Membership by making four monthly payments of $105.00 each (a total of $420.00), or in the case of a spouse two $50.00 each (a total of $100.00). When your last payment is received, Headquarters will send your Life membership card, certificate, and pin.

If you’re in the middle of your membership year, you can purchase a Life Membership now and apply the unused portion of your current membership. Call IHMSA Headquarters at (813) 733-8423 to find out how much credit you’ll receive for your current membership.

Life Membership is a great way to enjoy IHMSA for years without the hassle of paying yearly dues and show your support of IHMSA at the same time... order yours today!!!
Not Gunsmithing. Just Tinkering
By Ken Horowitz

f 7 one’s hobby, according to www.thefreedictionary.com include, among others: (a) “One who enjoys exper-
ing the various aspects of a particular subject”, (b) “a tinkerer, one whose trade is repairing and altering small pieces”, (c) “A clumsy repairer or worker; a muddled”, and (d) “To make unskilled or ex-

www.airgunsofarizona.com

Not bad, and since I already had the Naval Rifle on hand, the entire cost, other than the warrantee, was the couple of bucks for the paint.

For the weak hammer. I drove out a pin and two and removed all the interiors. Anything that didn’t look right was ordered from the then named Gun Parts Corpora-
tion (currently Numrich Gun Parts Corpo-
ration). As a long discontinued model, all that was available were used parts. As it turned out, some of the parts that I re-
ceived were in worse shape than the ones I received. Upon complaint, they were re-
placed with other parts.

So where was the tinkering failure? Well, if I were born on Jupiter with a third and fourth set of hands plus special tools, maybe I would have been able to reassem-
ble everything into the receiver. As it was, I was not able to compress the mainspring without misalignment of everything else.

One stock project that I recall was lots of fun was a shortened wood stock for a Ruger 10-22. For a few dollars, I managed to find a stock for sale that had a rather long chip off the heel. Since I was cutting off the trigger guard, I didn’t matter to me and the defect came with an appropriate reduc-
tion in price. Lopping off the excess wood was not tough, being careful that there was more than enough wood remaining to use and due to the length of the barrel, the legal.

The stock is short enough that it is fitted with a cheek hold only; accordingly, there was no reason to affix a butt pad. Finishing and smoothing were a breeze on my bench sander, with the final sanding and smoothing being done by hand with ever increasingly finer grit. Next, I stripped the remaining finish down to bare wood and prepped it for new stain and a tung oil finish. Once again, not bad for a tinkerer.

By the way, as much as I liked this proj-
ec and the result, the carving performs poorly with this setup. It’s a hoot to fire but even more inaccurate than with its stan-
dard stock. This particular Mini-14 was never known for tack driving but it is fun nevertheless. Luckily my project was just for an alternative stock and I retained the original as well. Even though the altered stock is perfectly legal, it may not appeal so to some people.

I don’t even think of such mundane tasks as scope mounting and sight chang-
ges as tinkering, but some may think so. There are similar tasks that would also fall into more of routine maintenance. When it comes to special projects, I just like to ap-
ply my limited talents as much as possible within a safe relative range. I don’t push the envelope and will never cut corners on safety. Also, when I’m unsure or finding myself in over my head such as with my bag-o-pants, I know to throw in the towel and seek the talents of professionals.

One gunsmith told me years ago with a big grin on his face when he brought me a failed experiment: “It’s guys like you who keep me in business!”

There’s still time to register
for a wonderful weekend,
Attend the World Championships.

July 2014
IHMSA News
MARKSMANSHIP COMPETITIONS

The Bullseye Cup:
Scoped 22 Long Rifle caliber handguns only. Your best 5-shot group at 100 yards or meters. Groups must be fired from an IHMSA legal freestyle position. No benchrest or artificial support allowed.

The Daisy Da Vinci Trophy:
Open production guns with iron page views. Your best 5-shot group at 18 yards. Groups must be fired from an IHMSA legal freestyle position. No benchrest or artificial support allowed.

General Rules:
All entries must be shot with IHMSA legal guns. Production, Revolver, and Unlimited guns are allowed in the Bullseye, Weaver, and Merit classes. Winners must be witnesses for all IHMSA or NRA member. Eligible winning targets must be signed and dated for the shooter and witness. Also, please include the shooter's IHMSA number and the witness's IHMSA or NRA number by name. A witness is not required to enter but is required to win.

Targets:
Targets submitted must include a minimum of 3,000 dollars in each bull zone.

Marksmanship Program

No new entries to report this month—Bob is still leading with a fantastic sub-12 inch group. We are starting to see a lot of double columns out there, so hopefully the supply will catch up with demand soon. Best of luck to those gearing up for the World Championships.

Field Pistol Records

By Al Kuenzi
We are starting to get some scores in and we have a pretty high bar already. Joe Cullison had a great day and shot a 50 in both Prod and PAS to set the mark for this year. Joe used some home swaged jackets lead tip bullets that weigh in at 65g. That load doesn't ring many animals. Carl Skidmore shot a PAS 32 and a

Prod 33 for a combined 65. That's Carl's second entry this year. Carl used a TCC 22 Hornet and shot his match at the Circleville Pickaway Co. Sportsman's Club. Jeffrey Hunt had a really nice round and shot a 37 PAS and a 32 Prod for a combined 69 — just missing the top spot. Jeffrey shot his match at the South Kent Sportsmans Club in Michigan with TCC 22 Hornet loads.
I am hoping to get more scores in now that summer is around the corner. Shoot well.

Half-Scale and Fifth-Scale Records

By Jim Harris

Congratulations to Gary Bridges for shooting his first Half-Scale UHS 50 of the year, winning the Texas State Championship and beating the prone positions shattered with higher power scopes. Gary used the traditional Creedmoor power. Nice shooting, Gary!

Mike Abel of Oregon shot his second Fifth-Scale UAS 40 of the year and joined the Fifth-Scale Agg with a nice 77.

Gary Crevic of Oklahoma added a few more feathers to his cap. Gary added a Half-Scale UAS 40 which contributed to his second year in the Fifth-Scale Agg in Half-Scale.

Looking forward to more entries as we get into full swing for the shooting season!

LINCOLNTON, GEORGIA
Little River Gun Club
May 24, 2014
by Robert E. Walker

Great Match Day, thanks to your hosts from Alabama, Richard Stanford, Bruce and Stuart Bar- rett, and the assist by Stuart Loo and a shortened 15.5 inch scope. The return of Bruce and Carol Barnett to Little River has added an extended absence was truly a highlight of this match—Welcome Back!!!

Ron Kirk and Mark Thrall teamed up again, after “hooking up” for ECC/Region 2 match, and both turned in some really good scores.

Ron Kirk on the Production Match cat- egory, leading a couple of ’99 with 10 Rams. Richard Stanford turned in a UAS in 40 for the 40/40 of the match and was this first 40/40. Congratulations Ron and Richard.

GEORGIA
GAINESVILLE, GEORGIA
GEORGIA AIR PISTOL, FIELD PISTOL, FIFTH-SCALE AND SMALL BORE STATE CHAMPIONSHIPS
Cherokee Gun Club
April 19, 2014
by Ron Dixon

We held the IHMSA Georgia State match at Cherokee Gun Club on May 1st, 24th, and 25th.

On May 1st and 24th, we had our Small Bore match where 23 shooters competed. On May 25th, we had our Half-Scale match where 18 shooters competed.

The weather turned out great, and the participants enjoyed unlimited shooting opportunities. The conditions must have given those five shooters who ended the match with the best score.

At the end of the match, all three disciplines were second place finishers for the match. The GA State match was won by Richard Stanford, who shot 542 points.

On May 25th, we had our Half-Scale match where 23 shooters competed. On May 25th, we had our Half-Scale match where 18 shooters competed.

At the end of the match, all three disciplines were second place finishers for the match. The GA State match was won by Richard Stanford, who shot 542 points.

On May 25th, we had our Half-Scale match where 23 shooters competed. On May 25th, we had our Half-Scale match where 18 shooters competed.

The weather turned out great, and the participants enjoyed unlimited shooting opportunities. The conditions must have given those five shooters who ended the match with the best score.

Sierra Bullets are used by handgun and rifle silhouette champions around the world because it’s the right choice.

Whether you prefer MatchKings, GameKings, Pro-Hunters, Sports Masters or Tournament Masters, Sierra bullets have that extra margin of ballistic performance shooters need at any range. Sierra’s exacting tolerances assure record-breaking accuracy box after box, and many Sierra bullets are now available bulk packaged in boxes of 500. So when you line up your next shot, you’ll be in championship company when you’re using the right bullets… Sierra Bullets.
The River Walk is a great way to see downtown OKC, either by foot or in a boat.

The Huffer Walk is a great way to see downtown OKC, either by foot or in a boat.

Directions to the Range:
From exit 141 on I-35, which is the Edmond/Arcadia exit where the hotels listed on the last page of the IHMSA News are located:

- Go east on Route 66 for 6.1 miles. You will go through the small town of Arcadia. You will go 3.0 miles.
- Turn east on 234/Sorghum Hill Road. Go about 1/10th of a mile and the gate to enter the range will be at the top of the hill on the left.
- Stay to your right on the gravel road until you see a bunch of steel silhouette targets on your left—that’s where you’ll want to be!

JULY 18 thru 25th

OK State Match
Continued from Front Page

There were many door prize giveaways and raffle drawings, which are always fun. The biggest items were a gun safe, a spotting scope, and 50% off a new Shilen barrel. Dave Stone seemed to have good luck on the drawings throughout the shoot, and that continued as he won the gun safe.

Just like at last month’s ECC, attendance was up for this year’s OK shoot. That is an encouraging sign, and hopefully that continues throughout the entire summer at all of our IHMSA matches. With this match occurring right at the IHMSA News deadline, the full match report will be in the next issue.

On to the World Championship:
With the state match done, this doesn’t mean there will be much down time for the folks down in Oklahoma, with the World Championship just around the corner on July 18th-25th. This is the second time Oklahoma City has put on this event. OKC hosted its first World Championship in 2012, and this was a very well attended match, with 700 entries almost doubling last year’s total from Fort Stockton.

There are a couple of range improvements since many of you may have shot in OKC last. Field Target is now on automatic reset just like the Big Bore targets. Also, they have some portable wooden barriers which can be placed next to shooters with muzzle brakes, which helps cut down on some of the blast those guns send out.

Another very nice thing about this match is that under normal circumstances, each region has certain work days in which they are in charge of running the match. At OKC, the club is running the entire thing, which gives everybody else more time to shoot, which we all appreciate. Keeping this in mind, if you have spare time while you are there, please consider pitching in and helping as a line officer or relieving somebody of their duties for a break—eight days is a long time to run a match of this caliber.

In addition to the regular match, there will also be a 500 meter match on July 26th (the day after the World Championship concludes) which may be fun to stick around for. Shooting full size Big Bore targets at 200, 300, 400, and 500 meters seems absurd with a handgun when you first see it. But there have been several 39’s shot at OKC, and last year in the Region 4 Championship, Steve Martens from Minnesota shot a perfect score.

Camping is available right there at the range, which is very convenient for those who may be staying for the entire match. Water and electric is available, and there is a dump station on site.

If you haven’t sent in your registration form yet, the clock is ticking. If for some reason you aren’t planning to attend but then change your mind at the last minute, there will most likely be spots open for walk-ins (just keep in mind, that is NOT guaranteed), but with OKC’s expansive firing line and the speed at which they get through relays, it is likely that you would be able to find a spot to shoot if you are able to get away at the last minute.

The World Championship is always a great time just because you get to see shooters you may only see once a year, and the international shooters are always a blast to be around. A huge thanks to Jim Fields and the Oklahoma City Gun Club for volunteering to put this on again, for it takes a ton of work on the part of a lot of people.

The OKC Firing Line
OKC got more relays in than ever before, thanks to the target setters.

OKC Firing Line
that he will have to wait another day to stand on the top slop of the podium. Very fine shooting from the very beginning of the seeding was quite show you put on for us, and we’re looking forward to a second next time. The ladies were very impressive today as well—good job Judy and Kathy! Bill Penney had a good day with his Single taking first and Trigger raked in a row but the last one slip away from him. Good shootin’ BR, that is real neat improvement. Keep it up!

Thanks for all the help picking up the targets after the match. Thanks to Jerry for calling the line so I could eat my lunch. I ap-

The page is not fully visible, but the text appears to be a collection of articles or news items from various sources. The content includes mentions of shooting competitions, shooting equipment, and shooting challenges. One article seems to be about a shooting match in Canada, with mentions of various shooters and their results. Another article is about a shooting match in Kansas, involving another match and a small field. There is also a mention of a Shooting World record in Texas. The text is too fragmented to provide a coherent summary.

Region 8

REGION 8 DIRECTOR

ORGEON

GRANTS PASS, OREGON JCSA Pistol Silhouette Club May 11, 2014 by 19 Turks This is one of our biggest matches of the year as we always try to bump up to next month's West Coast Championship. Many thanks to those who joined us-Dave, Joe, John, and Tina, and Team Medford.

Mike Abell had a great match. He was our Fifth Scale and Fifth Scale Any Sight, Small Bore Unlimited and Unlimited Sight, and Regional Match. His revolver with his new AGC aggregate scores gave him an entrant into the Fifth Scale Match of the season and it was great to have everyone out. Some darned good scores were shot, however, Paul and I were taken by turkeys. We just couldn’t hit the bloody things today!

Dave Healy and his team Medford took some bragging rights home by taking the Unlimited High Silhouette with a nice 40 plus 10 score 50 target. Our…. Ouch, whatever right was behind him with a 40 dropping him down to the first leg of the third place challenge.

Good job, Joe! Good job, Paul! Good job, Dave and for helping to set up and tear down the range.

WASHINGTON

PUYALLUP, WASHINGTON Paul Bunyan Rifle Club May 11, 2014 by Brut Stuntbecke We had 7 shooters this month putting 17 rounds across the line. Weather was pretty decent. Got to the range to start setting up and usual for this time of year, a little wood eating gun was needed to be done to present a undocumented target per se. We had one new shooter this month—Chris Buttero came out to try his hand at shooting some targets. He got some really good results to the match of the results.

Only one 40 this month shot by myself in Unl. Joe Smith posted a 43-42-85. In Unl.-limit High Silhouette, Vince Leete posted a UAA-3. Nice shooting, the Silhouette with a couple nice UAA scores, the first in UAA-int, the second one, a 35, than in UAA, with a 35. Joe had recently purchased a new scope for this gun and it looks like it is doing pretty well in production. Vince Leete posted on his target with a P-300. Joe, Steve Shively now owns his target with a P-300. Steve Shively is a very nice PAA, 38. Looks like he is back on track

NOMINATIONS FOR THE OFFICE OF NORTH DAKOTA STATE DIRECTOR FOR IHMSA, INC.

By Brut Stuntbecke

REQUEST FOR NOMINATIONS FOR NORTH DAKOTA STATE DIRECTOR FOR IHMSA, INC.

This is a request for nominations for individuals to serve as the North Dakota State Director. If there is more than one nomination, a ballot will be placed in the June IHMSA News.

Any member in good standing, who is a bona fide resident of the State for which they nominate, is eligible to stand for election. A bona fide resident is someone who has resided in the particular State for a period of not less than six months immediately prior to the election.

Members that have been residents of North Dakota for at least 6 months and who are interested in serving as North Dakota State Director are encouraged to nominate themselves.

A nominee requires the endorsement of 2 other IHMSA members. Use the following form to submit an application.

The Secretary/Treasurer must receive nominations no later than the 31st of July 2014. Candidates will be declared in the August edition of the IHMSA News and a ballot will appear in that edition if more than one nomination is received.

Each nominee may provide a statement of claims of not more than 500 words that cites why they should be elected to the office for which they have been nominated. Such statements of claims will be published in the IHMSA News if an election is required. To be published in the IHMSA News, the statement of claims must be received by the publishing deadline of July 1st, 2014. Therefore, candidates should submit the statement of claims with their nomination.

### Things to Do in OKC

While eight days of doing nothing but shooting might appeal to many of us, there are also those spouses and kids who think about tours to the shopping centers, shopping, movies, and restaurants that virtually every city has. Oklahoma City has some unique offerings as well. Here are some things you may want to try to check out if time allows:

- **Arcadia** (this is in Arcadia, just a few miles from the gun range—kids love it!) They also have huge ice cream sundae!
- Science Museum Oklahoma (I’m not just suggesting this one because I’m a science teacher—it’s pretty cool!)
- Bricktown Water Taxi (take a ride downtown through a river walk on a boat—see the whole downtown and then boat back to the gun range)
- National Cowboy & Western Heritage Museum
- Bass Pro Shops
- Oklahoma City Zoo & Botanical Gardens
- Amusement parks—Frontier City has lots of rides, White Water Bay to cool off in the heat of those hot days.
- Remington Park Horse Racetrack and Casino
- 45th Infantry Division Museum
- Ardmore Lake
- Oklahoma City National Memorial honoring the 1995 bombing victims, survivors, and rescuers.

### Meet your friends at the World Championships

The 2014 IHMSA Banquet & Delegates Meeting will be held Wednesday, July 23rd at 7:00 pm and the delegates meeting will be held Thursday, July 24th at 7:00 pm.

Both of these will be at the Oklahoma City Gun Club.
REGISTRATION FORM
2014 IHMSA World Championship

July 18th – July 25th, 2014
OKLAHOMA CITY, OK

PLEASE PRINT CLEARLY:

Hand Priming

Just Got Faster & Easier

With Lyman’s E-ZEE Prime™

The E-ZEE Prime’s quick-change collar, unitized primer trays and the use of standard shellholder makes priming and change over process a “snap”. With ergonomic design and optimized leverage, the E-ZEE Prime offers the comfortable, controlled feel needed for precisely seating primers during extended priming sessions.

Includes large and small primer trays
