The following was a famous story among silhouette shooters back in that day. John went to the Masters in Illinois in order to compete with the top shooters in the country. He figured all the shooters there would be like the Silhouette shooters he had known. It was hot that day, and he and Myrna left their things on a bench to get a cool drink. When they got back, they found that someone had stolen John’s shooting glasses, someone who wanted to eliminate from the competition the one he thought was most likely to win. We are all lucky to participate in a sport where that sort of thing just does not happen.
By Steve Martens

It’s been a great summer of shooting for me. Along with the local matches at our two great ranges in Minnesota I did a lot of traveling. June saw Kenny LaCroix and myself at the 1000 yd handgun bench rest match in Sundance, WY. A little different than silhouette, but shows what a handgun’s potential is.

In July we made the journey to California and was impressed with the match that Jerry Ray and his hard working crew put on. It was amazing to have such a beautiful quiet range in the foothills of mountains just north of LA. You can drive a half hour south and your in Hollywood and the hustle and bustle of a super large Metropolitan area.

Early August saw us in Tusco and East Coast Championships. Another great match put on dedicated members of IHMSA. Jim Kesler did a great job putting the match together.

Early Oct. saw the Richard’s clan and myself on the road again to OKC for the South Central Championship. We were treated to great weather and another super match. Jim Fields always puts on the best match you can imagine.

For those that missed the great match put on by LASC a few of the things discussed at the board meeting were, a review of the practical hunter rules (anyone who wishes to comment on the rules or possible changes we are taking suggestions), approval of a 2 year trial of Ultra 500 meter handgun silhouette, printing of the rule book in 2016, reduction of membership dues once we get a handle on the printing costs.

A huge cost savings to IHMSA is having Dan volunteering to publish the IHMSA news is very substantial and we all owe him a big thanks.

The BIG thing to remember is that there are no paid positions in IHMSA. Everyone is volunteering their time and effort to keep this sport going. No one likes getting bitched at, volunteers like it even less and if it gets too much they can always quit, as too many have.

A few things to look forward to next year, I will be pushing “competition”, we will have a new Revolver competition sponsored by Freedom Arms. The promotion of the Ultra 500 silhouette game. Also more recognition of the amazing shooters we have in the sport. I would also like to see someone volunteer to write a juniors column for the newsletters.

Next year marks the 40th Internationals/World Championships in Oklahoma City. We plan to make it a special event you do not want to miss.

Installment Plan
Life Memberships

The Installment Plan for Life Membership allows you to purchase a Life Membership by making four monthly payments of $100.00 each (a total of $400.00), or in the case of a spouse two $50.00 each (a total of $100.00). When your last payment is received, Headquarters will send you your Life membership card, certificate, and pin.

If you’re in the middle of your membership year, you can purchase a Life Membership and apply the unused portion of your current membership. Call IHMSA Headquarters at (901) 732-8423 to find out how much credit you’ll receive for your current membership.

Life Membership is a great way to enjoy IHMSA for years without the hassle of paying yearly dues and show your support of IHMSA at the same time — order yours today!!

2014 Rule Books

Dear IHMSA Members,

In an effort to keep costs down and with the only changes being the addition of the Practical Hunter category, Headquarters has been directed to not print the IHMSA Rule Book for 2014, but to send an addendum with these changes instead.

We understand that it is important for the membership to have access to the rules. Therefore, since the 2014 rule book is available on our website (go to http://www.ihmsa.org, then click on the RULES link), Headquarters is being directed to only send rule books with new Memberships and upon request for replacement. If you need a rule book, please contact headquarters.

Thank you for your patience and understanding in this matter.

Nancy LaCroix
IHMSA President

Rules Addendum:

Class Description:
All 3 classes are to be shot from any SAFEC freestyle position including prone, kneeling, sitting, or standing.

Practical Hunter Long Course will be shot on the 200 meter Big Bore range with the standard full size targets at their normal ranges.

The Practical Hunter Short Course will be shot on the 100 meter Field Pistol range with the standard targets at their normal ranges, using standard field pistol cartridges only.

The Practical Hunter .22 LR Course will be shot on the 100 yard BB range with the standard Small Bore targets at their normal ranges.

Class Rules:

- Any hunting style handgun with a maximum overall length of 21 inches.

- Optics are allowed up to a maximum of 6x power.

- Gun must be as manufactured with only cosmetic modifications.

- Ported barrels are allowed as long as they are shot from a safe position.

- A rear sight such as a bipod or a sandbag supporting the barrel in a prone position may be used by a new unclassified shooter and by shooters in classes A and AA.

Classification Scores:

- A 0-15
- AA 16-25
- AAA 26-38
- INT 39-40

SANCTION FEE NOTICE

Please make every attempt to send in your Sanction Fees promptly as the Sanction Fees help us pay for the printing of the Match Results.

If you have a club(c) that does not remit sanction fees for a match held, we understand club officer fees are busy, so we just send a gentle reminder. Still failing to receive the fees, a second notice is forwarded.

A final notice is sent if fees are still delinquent. After the final notice, the match data will be deleted from the match schedule and the club's sanction will be withdrawn until the fees are received.

Match Publication Policy

As we continually have new match directors, following is the IHMSA News' policy on publication of state, regional, and “specialty” match notices and match results.

Any IHMSA sanctioned club in good standing may publish a notice of their club’s state or regional championship match at no charge for three months. State match notices are limited to 2 1/4 x 5”. Regional match notices are limited to 4 3/4 x 5”. If a club is holding a “specialty” match and that match does not replace one of these championships, the IHMSA News will publish a 2 1/4 x 5” notice at no charge one time. These notices will run in Section B only. The club may publish additional notices of the same size for $45 per issue. Ads must be prepaid before printing. All payments are to be sent to IHMSA HQ, P.O. Box 22356, Cheyenne, WY 82003. The club may specify whether the paid notice is published in Section A or B.

State match results can list both first and second place finishes. Regional match results can list first, second, and third place finishes. “Specialty” matches replacing a state championship may publish first and second place finishes. “Specialty” matches replacing a regional championship may publish first, second, and third place finishes. All other match results wherein the total number of handgun silhouette entries exceeds 11 (including all IHMSA, NRA & non-member guests) can list only the first place finish. Matches with less than 11 total handgun entries as defined above can list all IHMSA handgun entrants and their place. Regardless of the above, all 40’s, 60’s, and 80’s (depending on the number of rounds fired at the match) can be published from ANY IHMSA match.

An IHMSA club holding a dual sanctioned (IHMSA/NRA) match may submit a match report for publication in the IHMSA News containing both IHMSA and NRA results. The number of published NRA results may not exceed the number of published IHMSA results. Publication is limited to IHMSA sanctioned handgun disciplines only.

Please address any questions concerning this policy to your Regional Director.

~NOTICE~

Please keep your 2013 rulebook for the 2014 season. You will receive an addendum with your membership renewal

Disclamer Concerning Reloading Data

Neither the IHMSA News, the contributing shooters or the writers of IHMSA, Inc. assumes any responsibility for the safety of any reloading data published in the IHMSA News. Neither IHMSA, Inc nor the writer has control over the firearms or components used, or the manner in which they are utilized. Therefore, no liability is assumed by either IHMSA, Inc, the writer, the contributor or the IHMSA News for any damages that result from any reloading information printed. Always consult standard reference manuals before duplicating loads or attempting any reloading procedures.

Save-It™ 12-Gauge Semi-Auto Shotgun Shell Catcher

So Close and Yet So Far

Another Prediction True?

By Ken Horowitz

Sometimes it’s the small things that make a big difference. In this case I’m referring to Birchwood Casey’s Save-It™ 12-Gauge Semi-Auto Shotgun Shell Catcher. While I had been familiar with various cartridge shell catchers, including having observed homemade ones that looked like butterfly nets crudely anchored to a bench, the first time I became aware of shotgun shell catchers is when I got reprimanded by a shotgunning yelling that my casing were hitting his new $8,000 wood (really, he said $8,000 for just the wood! I can’t even imagine how much his whole shotgun cost). He turned to the range officer and asked why shell catchers weren’t required for semi-autos. I pictured a net or wire contraption hanging from the side of my Beretta.

Since that time I’ve learned that it’s bad etiquette to use a semi-auto on a trap line without a shell catcher and the idea of the catcher is to contain the shell casing inside the action where it can be easily removed by the shooter. The Save-It™ 12-Gauge Semi-Auto Shotgun Shell Catcher is clever in its simplicity, about the highest compliment an engineered contraption can garnish. A stamped sheet metal piece adheres to the action below the ejection port with double sided sticky tape. A bent wire hinges on the stamped sheet metal part in such a way as when engaged, it interferes with the full ejection of a shell more or less causing a stovepipe through the wire. At this point the shooter simply grabs the shell to remove it.

The purpose of hinging the wire is to be able to fold it down away from the ejection port for those situations, as for example hunting, where follow-up shots are taken and the shooter will want the shell to completely eject. Since Birchwood Casey’s stock photos came out so much better than mine, I’ve used them with this article to show the two positions.

The device is simple and it works. I tried it on my Beretta semi-auto and am so pleased with it that I plan on getting two more for other semi-auto shotguns, a Remington Model 48A in 16 gauge and a Remington Model 1100 in 20 gauge. While designated for 12 gauge, I’ve read several blurs on the internet that explain how adjusting the wire can easily adapt the device for 20 gauge semi-autos (so I figured it could handle the 16 gauge as well). As long as the sheet metal component clears the ejection port and forearm and does not interfere with the bolt carrier release button, all will be well. I’m confident I can make it work and if not, the investment is only $20 at full retail (or less if you shop it; under $14 on three sites I just Googled).

I recently returned from a family vacation in Newport Coast, California which is maybe 1-1/4 - 1-1/2 hours from Los Angeles Silhouette Club where the Internationals took place (that’s with no traffic, a very hit or miss thing in the Los Angeles Metropolitan area). Besides conflicting with family planned events, including Disneyland, California Adventure, Raging Waters and a trip to Catalina Island, I decided not to add my IHMSA guns to my baggage. Despite the very well written description of how to transport firearms published in IHMSA News, hitting airports twice in California and twice in New Jersey just seemed to play against the odds of having some kind of bureaucratic problem. Sure, I would be in full compliance with all the requirements, but experience tells me that some clerk or other, not knowing the correct procedure, would throw a monkey wrench into the transport, creating an inconvenience or worse. Here in New Jersey, our rights are more or less boxed into a right of legal defensive arguments, not rights to be free from challenges. Perhaps I’m overcautious, but just as you can’t be too careful with the handling of firearms, there are certain states where being right doesn’t mean you’re going to have no troubles.

Further, our family was staying in a Marriott property (by the way, drop dead spectacular) and I’ve heard mixed comments about the unfriendly policies that have been invoked against having firearms on Marriott premises. Whether true or not, leaving firearms in the car is certainly not an option. Anyway, I'm glad that so many of our members were able to attend the Internationals.

**Editors note:** I missed this edition last issue, so it is included here.

As long as the sheet metal component clears the ejection port and forearm and does not interfere with the bolt carrier release button, all will be well. I’m confident I can make it work and if not, the investment is only $20 at full retail (or less if you shop it; under $14 on three sites I just Googled).

Lately, there has been a lot of press about the demise of the .40 caliber cartridge and firearms that shoot it. Okay, perhaps demise is a bit over the top. Let’s just say that its popularity just took a huge hit by the FBI’s apparent decision to go back to the 9mm platform. Just as so many law enforcement agencies followed the FBI into the .40 caliber platform, you can be sure they will follow the exodus as well.

From its inception, I saw no need for this cartridge. With the then controversy raging over the 9mm v. .45ACP, the avoidance of making a decision triggered a compromise that satisfied few but as in many such developments, voices in opposition remained mostly silent. Consensus has it that the seminal event driving the compromise was the infamous Miami Shootout, followed by the first attempt at a ‘tween cartridge, the 10mm, which proved too potent. Shave a bit of brass off the case, tweak the load and voila, the .40 caliber is born.

At the time, mainstream gun rags fell over themselves with praise and led by the FBI, other LE jumped on the bandwagon along with sport shooters as well. It made no sense to me and I predicted an early fizzle. I’ve called some things right and many wrong and I came to believe, as time lapsed, that I had called this one incorrectly. However, my only error was the timing. At long last, there is a great retreat as realization takes hold that the .40 caliber has just as many disadvantages versus advantages when compared to either the 9mm or 45ACP. With new bullet technology, performance is only marginal over the 9mm, while maintaining almost the same recoil issues as the .45ACP.

Now don’t get me wrong. If you love the .40 caliber or need it for some purpose, such as making power factor or the sort, fine. But when you compare it with classics that have been around over a hundred years and just keep getting better like the 9mm and 45ACP, it’s not going to make it. Sure, people will keep loading it because that’s what we reloaders like to do. I have nostalgic attachments to my own list of “used to be” champion cartridges.

Editors note: I missed this edition last issue, so it is included here.
To All IHMSA Members:

First, I am going to go over items discussed in our president’s report. As Steve Martens has stated, we will be printing new rule books in 2016. After we have the practical hunter rules incorporated into the rules and also finalized the rules for 500 Meter silhouette, we will get these printed and included with your renewals.

The Board is considering a reduction in membership fees. This will be released when we have a final report on our expenses. Since the biggest expenses used to be printing of the News and HQ costs, both of these have been drastically reduced. When they have finalized this, I will let you know.

And Last, I want your input for items to be printed in the IHMSA news! If you wish to see Load data for specific calibers, Equipment reviews, or anything Let me know! Also, if you wish to submit an article yourself, I greatly encourage it!

For All Match Directors:

First, you may notice your match reports missing from this issue. The Package containing mailed in reports came too late for printing in this issue from HQ. So, I am requesting that if you mail in your Match reports, to directly send them to me (your editor). While if you send them to HQ, it delays printing of your match results by 2-3 months. If you send them directly to me, it will get them printed 1-2 months earlier and also decrease the work load on Cindy Smith at HQ. I encourage though, if you can to send your match reports electronically to me as this saves me time in entering your match results. Just remember that the Match recap sheet and sanction Fees still go to HQ!

I will be sending out the 2016 Match schedule forms in the next 2 months to the match directors so you can submit your clubs schedules. Please make sure they have been approved by your state or regional director as this is a mandatory requirement for Sanctioning.

And last, as soon as I can get copies of all the Match forms, I will be updating these and attempting to make them easier for you. This includes the forms for the special awards.

And one final thing, I am hard to get hold of via Phone, but if you leave me a message, I will get back to you.

Also, mine and HQ’s contact information is always located on Page 2 of the IHMSA news.

If you have any input or have questions, feel free to get hold of me.
THE NEW SILHOUETTER

MOA
By Ken Horowitz

I was speaking with a non-IHMSA shooter who, in a "friendly" manner, began to malign the size of our targets and the correlative non-necessity of "true accuracy" in toppling steel. The scene was a 200 yard range where MOA converted into about two inches at that distance. Going for sub-MOA with a target rifle, the shooter saw no big deal in hitting a ram that measured about a foot from belly to back, not counting the endowment that makes a ram a ram. The over thirty inch measurement that goes from butt to nose wasn't even mentioned.

You know how it is. The reactive target folks (that includes us) make fun of the paper punchers (I'm one of those as well). The benchresters poke fun at anyone with a group over 1-1/2 times bullet diameter. The 1000 yard shooters belittle the benchresters. Single projectile shooters can't understand what's so difficult about hitting a clay target with a whole swarm of pellets while the shotguns see no sense in taking so long to hit a stationary target. Since I shoot IHMSA, CMP, 22LR rifle matches and Sporting Clays, I hear it all.

To be sure, accuracy standards are tied to the discipline at hand. But there is more to it than hardware and target size. Each discipline has both common and unique elements that can divide success from failure. While that 200 yard shooter is correct with respect to using a ruler, there is no guaranty that a successful 200 yard shooter will be any good at IHMSA. For all the years I've been shooting, I'd give myself a B grade for rifle match skills that I shoot (okay, maybe a B-), a C for IHMSA and, only by being generous, a D for Sporting Clays.

Back to IHMSA, how accurate is accurate? With so much being published regularly on MOA this and MOA that, what is an acceptable MOA for knocking down steels? In this context, the first step is to determine a number that would incorporate the inherent accuracy of the firearm and ammunition, ignoring the shooter's skills. For that, let's look at the target dimensions and the ranges at which they are shot.

First, a word on MOA. The quick rule of thumb for minute of angle (MOA) is that one MOA equals 1' at 100 yards. Double that to 200 yards and MOA equals 2'; halve it to 50 yards and MOA equals 1/2'; and so forth. This is a great rule of thumb and it works quite well at the "short" distances at which most of us shoot. The actual derivation comes to slightly over an inch for 100 yards with corresponding changes at any distance. For what it's worth, the following paragraph may be helpful (or skip it if you don't care).

(a) There are 360 degrees in a circle; each degree has 60 minutes; therefore a circle has 21,600 degrees (360 x 60). (b) 100 yards has 3600 inches (100 x 36). If the shooter is standing in the middle of the circle, the 100 yard distance to the target is the radius of that circle. (c) The circumference of that circle is 2πR (where R = Radius) or as some of you might have learned it, πD (where D = Diameter or 2 times the radius). Either way, using 3.14159 as a constant, the circumference of the circle, in inches, is 22.619" (3 x 3.14159 x 3600, or 3.14159 x 7200). (d) Taking the circumference in inches and dividing by the number of degrees in the circumference gives 1.047" (22.619 ÷ 21,600) as the real measurement of MOA. As you can see, at close distances, 1" is good enough.

As mentioned previously, the center of a Big Bore ram is about 12" top to bottom. If a properly sighted gun were held dead on at that point at 200 yards, 6 MOA would be good enough to hit the target. If your range has the rams set in meters, you would need a bit less than 5.5 MOA. The required MOA for the other animals is equal or less stringent than necessary for the rams. The chickens and pigs are both considerably less, while the turkeys are just about the same. However, the turkeys create a unique problem in determining center of mass. Some shooters I know aim at a top to bottom center point directly above the center of the leg, but the true center of mass of the turkeys is about two to three inches into the chest from that point.

Field Pistol targets, being set at 25 to 100 yards, are half-scale at half the distance of Big Bore targets set at yards (not meters). Accordingly, the minimum MOA requirement for Field Pistol is also no better than 6 MOA. (For Big Bore Half-Scale, the minimum requirement would be twice as great or half the MOA: i.e., 3 MOA for ranges that set in yards and 2-3/4 MOA for ranges that set in meters). Small Bore targets, being only 3/8" scale, require better (less) MOA than their Big Bore and Field Pistol brethren. 4.5 MOA will do throughout the course of fire.

For a little cushion, let's say a 4 MOA gun/ammo combination is adequate for shooting across any course. Realistically, I don't think anyone ever walks into a gun shop and asks to see a 4 MOA gun. On the other hand, many shooters already possess 4 MOA or better firearms (of course, with the proper ammunition for the combo), but look to increasing their performance by throwing money at hardware. There is so much more to be gained by honing skills than by decreasing inherent MOA.

Setting the 4 MOA on the side, assume a more capable setup; for example 2 MOA. If you can benchrest your combo and consistently get 2" groups at 100 yards but still miss a lot of animals during matches, the problem is not likely solved by getting a 1 MOA outfit. Better results can be had by working on sight picture, trigger control and steadiness of position. The equipment versus skills issue that is endemic to many sports is easily answered for us. A good shooter can get better results with a mediocre outfit than a poor shooter can achieve with a tack driver.

Now don't get me wrong. I'm not suggesting that anyone uses a shot-out barrel that performs like a smoothbore. I've shot those and the only way a target falls is on hope. On the other hand, as a proponent of the shoot what you have school of thought, I encourage everyone to pay attention to things that can be controlled and not write-off missed targets to gun and ammo capabilities.

Just for fun, if nothing else, benchrest one of your non-IHMSA guns, like maybe a 4" barreled revolver. If you can print groups within a 6" or smaller circle at 100 yards and the point of impact is properly aligned with the point of aim, you're good to go and should try it for Field Pistol. I used the 4" revolver illustration because I own two contrasting 4" barrel examples. One, a S&W Model 686 (357 Magnum or 38 Special), is up to the task with a number of loads. For the other, a Ruger Blackhawk, I've yet to discover a load that can do it, whether using 357 Magnum, 38 Special or even 9mm Luger in the extra interchangeable cylinder. (I do keep trying the Blackhawk occasionally, since it's a fun gun to shoot, but any falling targets are the result of the hope factor that I previously mentioned.)

By the way, this is certainly not a general indictment of the Blackhawk Model. I bought this gun used several years ago because I happened to be buying something else at the time when I spotted the gun in the dealer's case at an attractive price and I had a soon to expire purchase permit in my pocket along with enough cash. I have no idea of the history before me but this is certainly one of those shot-out barrel examples. While my specimen is perhaps the least accurate handgun I own, I know of many people who are quite pleased with the inherent accuracy of the design.

While not "IHMSA-esque," my Blackhawk is a fun gun for short range plinking, has an incredibly fantastic trigger and while I made it somewhat homely with Hogue rubber grips (they just don't look right on this gun), it's a pleasure to shoot even with the stiffer 357 Magnum loads. The Hogue grips took it all the way from painful (i.e., bloody pinky) to excellent recoil management. I keep telling myself that I should spring for a new 4-1/2" barrel to make things right with this revolver but it has never risen to a priority level. Maybe one day (which phrase usually converts to never).
IHMSA NEWS-SECTION B
MARKSMANSHIP COMPETITIONS

The Burris cup:
Scoped .22 Long rifle caliber Handguns only. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a ransom rest, vise or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns setup for Creedmoor to better compete.

The Weaver Trophy:
Scoped centerfire handguns. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a ransom rest, vise or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns setup for Creedmoor to better compete.

The Merit Challenge:
Centerfire handguns with iron/open sights. Your best 5-shot group at 100 Yards or Meters. Groups must be fired from an IHMSA legal position. No benchrest or artificial support allowed.

The Daisy Avanti Trophy:
Air production guns with iron/open sights. Your best 5-shot group at 18 Yards. Groups must be fired from an IHMSA legal position. No benchrest or artificial support allowed.

General Rules:
All entries must be shot with IHMSA legal guns. Production, Revolver, and Unlimited guns are allowed in the Burris, Weaver and Merit classes. Winning groups must be witnessed by an IHMSA or NRA member. Eligible winning targets must be signed and dated by the shooter and witness. Also, please include the shooters IHMSA number and the witness’s IHMSA or NRA number by their name. A witness is not required to enter but is required to win.

Targets:
Targets submitted must contain no more and no less than 5 shots in each bull zone.

Records program

**Marksmanship program**

**Burris Cup:**
This is Dave Edney, I have taken over the marksmanship program. Being new to IHMSA I didn’t know much about the program. I have done some research and this is a pretty cool way to make the range trips a little more interesting. If I could just get good at shooting I may have a few entries my own.

I have received my 1st target in the mail for the marksmanship program. The target is a Burris cup entry from Glenn Tullius out of Minnesota. Glenn is shooting an Anschutz exemplar converted to center grip with a Burris 3-12 power scope. Ammo is SK pistol match. Weather conditions were 73 degrees, high humidity with dead calm wind. Glenn’s 5 shot group at 100 yards measures an impressive 0.712” center to center.

**Big Bore Records Program (BBRP)**
**By Joe Cullison**

The year is starting to wind down and cool off but some super scores came in.

Jim Kesser (OH) shot a S-34, P-39 and a U-40 to post an excellent 3-gun 113. This puts Jim in a tie for first in the Standing category and lands him on top of the heap for the 3-gun high score. Jim also shot a Standing agg of 60 with both entries being open sights. Excellent shooting Jim.

Doug Edney (OH) made his first entry into the BBRP with some fine shooting. Doug shot a S-28 and a US-33 to make a Standing agg of 61. Doug also moves OH into a state total tie for 2nd. Welcome to the program Doug, I expect to see a lot of you around here.

State totals for 2015 are: CA-6, OR-5, OH-5, MN-2

Please bring at least one friend or acquaintance to every match. Together, we can keep IHMSA growing.

Please forgive me if I have left anyone out or made any other errors. Send me the information and I will make it right as soon as I can.

Thank you for your support of the BBRP.

Send entries to:
Joe Cullison, 28988 Berlin Road, Sweet Home, OR 97386 or to jcuncliejo@aol.com. 541-317-8801 evenings

Thank you.

Glenn shoots silhouette at the Holmen rod and gun club in Holmen, WI. Keep up the good shooting Glenn and those 1/5th scale critters need to be afraid.

My log sheet is pretty bare so send those targets in. Safe shooting.

Dave Edney

SmallBore Records program
By Dan Hagerty
Joe Kennedy of Nevada shot a standing aggregate of 63 to take the top spot (S:27,US:36)
Paul Habig of Nevada continues to keep me busy. Since my Last report Paul shot a 110 3-gun and a 149 40 gun aggregate. Also a standing aggregate of 61 (S:30,R:40,P:40,U:39,US:31). He also shot 2 more revolver 40’s!

The following I found while going through match reports. I am only guessing on the persons stepping down as the coordinator for this program in January. If anybody is interested in taking over, please let us know.

Send your records notices to me at harris-grp@earthlink.net, or my home address: 1567 Bridget Ave., Simi Valley, CA 93065. Or give me a call at (805) 581-0009.

By: Charlie Braud

ASCENSION SILHOUETTE
GONZALES, LA
SEPTEMBER 12, 2015

We had a light turnout for our September match. A hearty welcome goes out to a new shooter, Sal Molea. Sal started with a bang posting a 39X40 in 22 LR Practical Hunter using a borrowed Ruger Charger with a bipod. By doing so he jumped straight into International class. So he fired another entry in UAS without the bipod and scored another 39X40, missing the last ram. His spotter was calling out the remaining time and he fired his 39th shot with only 15 seconds remaining forcing him to rush that last shot. I feel confident Sal with get his 40 very soon. We have only one remaining match which is our State Championship scheduled for the first weekend in October.

Best attendance at one of our matches for a long time, but I need a way of getting the new shooters to join IHMSA but there really is no incentive! For the first time ever we had six perfect scores posted, two each for Lorenna, Rich and Pete each shooter getting one in BB-UAS and one in SB-UAS. Murray had a great time setting up the shoot offs to break the three way ties, Pete took the Big Bore honours and Howard took the Small Bore ones. It was good to see Ric Olsen on the line again, no cowboy matches scheduled! Last match for 2015 scheduled for 18th October.

CAMBRIDGE, ONTARIO CANADA

GALT SPORTSMEN’S CLUB

Reasonable attendance for our last match of 2015, moose season and a local Cowboy match thinned our ranks a bit and hockey games for the boys meant a lot of running around by old guys to set targets for the first part of the match. Only had one perfect score posted and that was by Lorenna in BB-UAS, beat her Dad by one animal!

Thanks to all who participated and made this a great season, next match will be in April 2016 and hopefully we will have as good a year as this one.

targets to Steve Martens' 7 targets. For Unlimited
the shoot-off targets were moved to the turkey line.

Steve Martens and Rick Schrader both shot Unlim-
ited 60X60 and Steve won first place with 8 targets
to Rick's 5. For UAS the shoot-off targets were
moved to the rum line. Steve won UAS with 9 of 10
shoot-off targets, Ken was second with 6 targets, and
Rick, using his Unlimited gun for UAS got 4 targets.

We had three competitors that shot all six classes
and Steve won the Iron Man with 329 of 360 posi-
tible targets. Steve also won the 3 Gun Aggregate
with 169 targets. John and A. J. won all of the stand-
ing classes, with John impressing an 155 of a possi-
ble 180 targets. John won the Standing Aggre-
gate with 107 of a possible 120 targets.

What a match to honor the memory of Larry Allen-
baugh by having the Larry Allenbaugh Memorial
Lava Bed Shootout. 97 guns shot in three days with
two shooters shooting 10 guns each (Roger Wood
and Michael Sussman) and two more with 9 guns
each (Bob Jeffery drove down from Montana as a-
always) and Bill Pendleton Sr. I don’t usually dis-
cuss the weather, but the WIND was absolutely hor-
rible with 15 mph all the time and gusts to 25 on
Friday and Saturday, and then calm on Sunday.

Even with the wind, some good scores were shot,
but no 40’s until Sunday and then only 1, that by
Tom Tressell in BB UAS. We had one shoot-off,
that in Small Bore UAS, the chance to participate (Sorry again Bill), but
Michael Sussman and Tom Tressell shot it off with Mi-
chael coming out on top. The targets were pretty
small, but the guys really shot well on them – Good
Shooting. For once, Dave Harmer didn’t win 3 and
4 gun aggregates because he wasn’t here to do it. I
got lucky to win 3 and 4 gun aggregates in Big Bore
(one only to shoot standing), and Michael Sussman
won them in Small Bore. Michael also took top
honors in 1/5 scale – he was really shooting well. I
would like to thank some of the people that don’t get
mentioned very often for their support of our sport
(Fred Adams, Jerry Perks, Steve Mosher, Jim Miller,
Keith Archibald, Ned Rockwell, Bill Richens, Jesse
Bennet and Skip Jones). These people come out on
a routine basis and shoot and have fun - THANKS.
Jesse Bennet, our Club Secretary, got herself a new
TC barrel in 7 TCU and will be giving us all a run
for our money when she gets it going. She also
managed to win Field Pistol C with her TC 30 Car-
bine – good shooting. Our last match is in Septem-
ber, hopefully not as windy. See everyone then.

LASC Match Report
June 13 & 14, 2015
By Jim Harris

Thanks again to our target setters, and Ramon and Joe, from the Young Marines!
Excitement continued to mount toward the upcoming IHMSA World Championships to be held here July 10-17. Lots of people coming out for qualifying entries and just to sharpen up their skills.

Topping the list of who’s who attending was none other than fan-favorite and all-around good guy, Scott Mann! Scott did some great shooting despite the time he’s taken off to work on his surfing.

Tough Break Department:
Karen Bailey wrote, “Yes, 7!” on her .22 rifle card for the difficult 1/5 Size category, well below her average.

Highly Sharp missed his last ram on ½ Scale open sight for a perfect 39. (Been there, done that, Harry!)

Looking forward to seeing great attendance to the July IHMSA Championships!

**2015 LASC Extravaganza**

**Labor Day Weekend, September 5-7, 2015**

By Jim Harris

The 2015 Extravaganza is in the record books!

Thanks to the Young Marines, Ramon and Joe, for their target setting and line-calling. The match was run quickly and safely. We couldn’t do this without your help!

Weather was a little warm, but not near the terrible heat sometimes experienced in the past. Wind was mild overall. So what explains the generally lower scores this year? It will likely be a topic for some time to come as shooters try to puzzle out better scores.

Special thanks to our traveling competitors out of Utah and Idaho: Dell Taylor and Bill Pendleton. Steve Peck drove down from Nevada, and Dave Whitman from Oregon.

It was interesting to see Ted Matthies shooting so many standing events, including rifles. This earned Ted the top honors in the rifle competition with a 35x40.

Dennis didn’t go home empty-handed—he took the Big Bore Revolver title with a 39 using his 40+2.

Steve Hannawacker was entered in a lot of different handgun categories, resulting in Match Winner in Smallbore with his strong Production score, 40x40 plus 2 shoot-off targets.

Jerry Ray must be reaping good karma from being the club’s match director—JR took the Big Bore Match Winner with a terrific Unlimited score of 40x40 plus three shoot-offs, blocking Dennis “Moose” Edwards from the win with his 40+2.

Dennis didn’t go home empty-handed—he took the Big Bore Revolver title with a 39 using his own homemade cast bullets!

Dan Hagerty had a bit of an up-and-down match, but managed to win the BB Production category with a 39, missing a chicken! He placed well in many categories, but I noticed he missed chickens a few times on other entries—a bit out of practice, Dan? Dan gets the “Guts Award” for shooting his Production gun in open sight ½ Scale.

A great time was had by all, and we hope to see you all next year, and at our regular monthly matches.

COMMENTS
_We will hopefully be signing up a new member, Frank Kodl. He shot UAS with us today and shot well for his first time out._

_Things were close in UAS with Gordy taking the title by 1 target and earning High Senior as well._

_Ron retained his position at the top of the heap in US and Tom took USIS._

_Thanks to Gordy, Tom, Ron & Frank for helping to set up and tear down the range._

COMMENTS
_Sorry that this report is so late. It took me a while to get caught up from six days in Oxnard. Thanks to Paul for running the match and to all who helped him set up and tear down the range._

_We had Mike Abel and Doug Hockinson shooting Standard Handgun in FP-P with Doug taking the honors. Dave Whitman took the FP-PAS title by one target from Paul Hoadley. Dave also took the SB-P title from Rick Redd by 1 target. I’m thinking those two will be looking for a rematch next month._

_The Fifth Scale folks had a close one with Mike Abel taking the title with reverse animal count from Rick Redd._

_The Rifle shooters are growing. Rich Burket brought 2 rifles and Waldy Pergott brought a new shooter._

_Rick Redd was our SB-U champion with the only perfect score of the day. That also earned him High Senior._

_Thanks to Gordy for setting up the range & Paul & Ron for helping to tear it down. Congratulations to Ron for shooting into the 30% in US and to Gordy for being High Senior. Not all of us were as pleased with our scores!_
Thanks to all who stayed to help pick up targets after AAA, 36. Vince Leete posted a nice P was back this month and managed a UASHS another entry into it a try. Mike shot an entry in smallbore P and posted a very respectable 23 using his Ruger MKII. He then shot a FP P Unc 9 using a Ruger redhawk, Nice shooting Mike. Derek shot two entries with his Browning buckmark. The first in UAS-Unc posting a 21 and then in FP PAS-Unc posting a 19. Not bad for a first out. Hope all new shooter come back and shoot with us on a regular basis. No 40’s this month. In UAS-UAA, Steve Bishop shot a 39 missing a one ram. In U-Int, I managed another entry into the Last Ram Club with a 39 and missing of course the last ram. Guess I got a little complacent and took it for granted. Steve Cozort was back this month and managed a UASHS-UAS 31. Joe Stumpf got a respectable R-AA, 30.

Until next time shoot straight and be safe.

NEBRASKA STATE CHAMPIONSHIP MATCH: September 17-20

We had a great State Championship Match, with more entries than ever before. There were 103 to be exact making it 10 more than last year. It started out HOT the first day, then cool and rainy, in fact so cool one could see there breath but that all changed for Saturday and Sunday, turning out to be great weather for the last two days. ‘Any
day one can shoot is a good day just some days are better than others.‘ Ed Mundorff put in a lot of time getting our range and the self-setting Big Bore target setters installed and working. Ed, Ron Teselle, and Mike Kunkee ran the Match while Jami Knief kept the scores up to date on the computer and a “BIG THANKS” to all who helped get the range ready for the match. There were shooters from Canada, Kansas and cities throughout the State. From Lincoln Jeff Shults shot (for the first time) a 40 in UAS … “Good Shooting” Jeff. Chuck Pfitzer also shot a 40 in UAS moving him up to 40th. Daryl Growcock and Chuck Pfitzer in BB standing got a “Leg’ up. There were 6-40’s and other good scores throughout the match. (Listed below are the Aggregate winners and the Match scores). BB 3 Gun Aggregates

October, was a small turn out but as always a fun Match. We had my son in-law from North Dakota for a guest. He has never tried Silhouette shooting before and was thrilled when he hit 4 out 5 Rams the first time he tried them. We will be moving indoors for the next few months shooting pellet guns for the winter Silhouette Matches with outdoor Matches starting back up in March or April. Remember keep your primers and powder dry.
