## LEGENDS OF SILHOUETTE #2 John Dunn by the Old Guy

The first episode of this series was about a feat that was done outside the scope of IHMSA. This one is what i consider the greatest single feat accomplished at an IHMSA match. No one I ever have talked to has disagreed with me about this being the most outstanding achievement at an IHMSA match. I refer to John Dunn's 157x160 big bore four gun aggregate score shot in 1990 at the Grass Valley Gun Club. A lot of really great shooters have shot handgun metallic silhouette. There have been a lot of good 150+ scores fired, but no one has come even really close to John's 157x160. There have been a handful, perhaps three or four 155s, but no 156. John's 157 stands out alone.

It just so happens that I personally was present at that match in Grass Valley, California. I even was shooting Standing next to John when he shot the first leg of this aggregate, the Standing leg. He only missed one target through the Chickens and Pigs, and I thought, "This may be the day he breaks 35," because I knew he had shot several 35s and felt stymied at that score which he did not feel able to beat. When he missed only one Turkey, I was really impressed at the possibilities opening up, but when he got the first five Rams, I knew this was it. He missed only the last Ram, and this added up to 37. I congratulated him, and he went to get another gun. He proceeded to shoot 40x40 both in Unlimited and Production, and then he started to pack up his things to leave. I asked him where he was going, and he said, "I didn't bring my revolver with me, so there's nothing left for me to do."

It is at this point that the true nature of Handgun Metallic Silhouette shooters came into play, something that makes this sport like no other, a sport where people really want others to do the best they can. All of us try to do the best we can, but all of us want others to do the best they can, and we are very much into helping each other. At this moment Yevonne Ball, the wife of then California State Director Pete Ball, came over and said, "John, you can't leave without shooting Revolver. This is too great an opportunity for you to let go by. I have my .357 super mag Dan Wesson in the car, and I want you to shoot it with the ammo I brought for it." I continue to believe this is one of the most gracious acts I have seen in any sport. John was deeply moved by this offer, and he accepted. What

happened next truly is amazing. John took a gun he never had shot before, had no sight settings for, and knew nothing about. He had only five sighters with which to familiarize himself with this revolver and only the settings Yevonne had used. With this limited information about a strange gun, he lay down and shot a 40x40 in Revolver, an outstanding accomplishment in any circumstances, but more than doubly so in this case.

I must add that John did have a very important thing going for him, something additional he had going for him at all our matches. He had one of the best spotters I ever have seen, his wife, Myrna. This is no small factor, especially sighting in a revolver he never had shot before. If you would like some idea of why I mention this, let me add the following. In the mid 1980s I was the Match Director of the San Jose Silhouette Club in San Jose, California. John and Myrna drove down from their home in Nevada several times to shoot with us in San Jose, and on one occasion I decided that the shoot off targets would be the then new half size chickens set at 200 meters. John shot a 40 in Unlimited and proceeded to the shoot off line. I was not a bad spotter in those days, and since the half size chickens were new, I decided to watch him shoot the shoot off to get some experience spotting these small targets which vanish quickly. These targets were only 1/2" thick so they were comparatively light for half size chickens which often are thicker. I sat just in back of Myrna where I could not be in her way. I watched as John hit target after target, and I watched as Myrna stuck pin after pin in their spotting board. I had no idea if she was right or not because I couldn't seen any of them, but she did it quickly and confidently. I waited while the target setter put them back on the stands, and sure enough, she had called them all correctly. Her spotting was John's secret weapon.

The following was a famous story among silhouette shooters back in that day. John went to the Masters in Illinois in order to compete with the top shooters in the country. He figured all the shooters there would be like the Silhouette shooters he had known. It was hot that day, and he and Myrna left their things on a bench to get a cool drink. When they got back, they found that someone had stolen Joh's shooting glasses, someone who wanted to eliminate from the competition the one he thought was most likely to win. We are all lucky to participate in a sport where that sort of thing just does not happen.

#### THANKS TO ALL FOR YOUR SUPPORT!

I am writing this as it is not said enough!

Thanks for all the Match Directors, Sponsoring clubs and to the target setters as without your time and support we would not have a place to shoot our sport. You are the shooters direct link to IHMSA.

Thanks to the Executive committee, board of Directors as you are the people who run the organization.

Thanks to the State and Regional Directors as you provide the support to our Match directors and the clubs.

Thanks to the Equipment manufacturers who have supported us over the years. Without you, we would not have equipment to shoot the sport!

And Last, To ALL members of IHMSA, without you we would not have an Organization!

#### **President's Column**

#### **Presidents Report – Sept 2015**

#### By Steve Martens

It's been a great summer of shooting for me. Along with the local matches at our two great ranges in Minnesota I did a lot of traveling. June saw Kenny LaCroix and myself at the 1000 yd handgun bench rest match in Sundance, WY. A little different than silhouette, but shows what a handgun's potential is.

In July we made the journey to California and was impressed with the match that Jerry Ray and his hard working crew put on. It was amazing to have such a beautiful quiet range in the foothills of mountains just north of LA. You can drive a half hour south and your in Hollywood and the hustle and bustle of a super large Metropolitan area.

Early August saw us in Tusco and East Coast Championships. Another great match put on dedicated members of IHMSA. Jim Kesler did a great job putting the match together.

Early Oct. saw the Richard's clan and myself on the road again to OKC for the South Central Championship. We were treated to great weather and another super match. Jim Fields always puts on the best match you can imagine.

For those that missed the great match put on by LASC a few of the things discussed at the board meeting were, a review of the practical hunter rules (anyone who wishes to comment on the rules or possible changes we are taking suggestions), approval of a 2 year trial of Ultra 500 meter handgun silhouette, printing of the rule book in 2016, reduction of membership dues once we get a handle on the printing costs.

A huge cost savings to IHMSA is having Dan volunteering to publish the IHMSA news is very substantial and we all owe him a big thanks.

The BIG thing to remember is that there are no paid positions in IHMSA. Everyone is volunteering their time and effort to keep this sport going. No one likes getting bitched at, volunteers like it even less and if it gets too much they can always quit, as too many have.

A few things to look forward to next year, I will be pushing "competition", we will have a new Revolver competition sponsored by Freedom Arms. The promotion of the Ultra 500 silhouette game. Also more recognition of the amazing shooters we have in the sport. I would also like to see someone volunteer to write a juniors column for the newsletter.

Next year marks the 40th Internationals/World Championships in Oklahoma City. We plan to make it a special event you do not want to miss.

## IHMSA Bulletin Board

#### Installment Plan Life Memberships

The Installment Plan for Life Membership allows you to purchase a Life Membership by making four monthly payments of \$105.00 each (a total of \$420.00), or in the case of a spouse two \$50.00 each (a total of \$100.00). When your last payment is received, Headquarters will send your Life membership card, certificate, and pin.

If you're in the middle of your membership year, you can purchase a Life Membership now and apply the unused portion of your current membership. Call IHMSA Headquarters at (801) 733-8423 to find out how much credit you'll received for your current membership.

Life Membership is a great way to enjoy IHMSA for years without the hassle of paying yearly dues and show your support of IHMSA at the same time . . . order yours today!!!

#### 2014 Rule Books

Dear IHMSA Members,

In an effort to keep costs down and with the only changes being the addition of the Practical Hunter category, Headquarters has been directed to not print the IHMSA Rule Book for 2014, but to send an addendum with these changes instead.

Thank you for your patience and understanding in this matter.

Nancy LaCroix IHMSA President

#### **Rules Addendum: Practical Hunter**

<u>Class Description:</u> All 3 classes are to be shot from any SAFE freestyle position including prone, kneeling, sitting, or standing.

The <u>Practical Hunter Long Course</u> will be shot on the 200 meter Big Bore range with the standard full size targets at their normal ranges.

The <u>Practical Hunter Short Course</u> will be shot on the 100 meter Field Pistol range with the standard targets at their normal ranges, using standard field pistol cartridges only.

The <u>Practical Hunter .22LR Course</u> will be shot on the 100 yard SB range with the standard Small Bore targets at their normal ranges.

Class Rules:

· Any hunting style handgun with

a maximum overall length of 21 inches.

- Optics are allowed up to a maximum of 6x power.
- Gun must be as manufactured with only cosmetic modifications.
- Ported barrels are allowed as long as they are shot from a safe position
- A rest such as a bipod or a sandbag supporting the barrel in a prone position may be used by a new unclassified shooter and by shooters in classes A and AA.

#### **Classification Scores:**

A 0-15 AA 16-25 AAA 26-38 INT 39-40 ~NOTICE~
Please keep your
2013 rulebook
for the
2014 season.
You will
receive an
addendum
with your
membership
renewal

#### NOTICE

The IHMSA Board of Directors have voted to allow the printing of NRA match results in the *IHMSA News*, providing they are submitted by a club that is running dual (IHMSA/NRA) sanctioned events.

These results must be submitted by the established deadline présented in the previous edition of the *IHMSA News*, with the Dual Sanction Match Write-up and will be listed at the end of the IHMSA related report. No NRA reports will be printed without IHMSA reports/scores accompanying them. Please send all Match Reports to IHMSA, Inc., P.O. Box 22356, Cheyenne, WY. 82003

Phone - 801-733-8423, FAX: 801-733-8424

#### SANCTION FEE NOTICE

Please make every attempt to send in your Sanction Fees promptly as the Sanction Fees help us pay for the printing of the Match Results.

Infrequently we have a club(s) that does not remit sanction fees for a match held. We understand club officers are busy, so we just send a gentle reminder. Still failing to receive the fees, a second notice is forwarded.

A final notice is sent if fees are still delinquent. After the final notice, the match dates will be deleted from the match schedule and the club's sanction will be withdrawn until the fees are received.

Disclaimer Concerning Reloading Data
Neither the IHMSA News, the contributing shooters or the writers or IHMSA, Inc. assumes any responsibility for the safety of any reloading data published in the IHMSA News. Neither IHMSA, Inc nor the writer has control over the firearms or components used, or the manner in which they are utilized. Therefore, no liability is assumed by either IHMSA, Inc, the writer, the contributors or the IHMSA News for any damages that result from any reloading information printed. Always consult standard reference manuals before duplicating loads or attempting any reloading procedures.

**Match Publication Policy** 

As we continually have new match directors, following is the IHMSA News' policy on publication of state, regional, and "specialty" match notices and match results.

Any IHMSA sanctioned club in good standing may publish a notice of their club's state or regional championship match at no charge for three months. State match notices are limited to 2 1/4 "x5". Regional match notices are limited to 4 3/4"x5". If a club is holding a "specialty" match and that match does not replace one of these championships, the *IHMSA News* will publish a 2 1/4"x5" notice at no charge one time. These notices will run in Section B only. The club may publish additional notices of the same size for \$45 per issue. Ads must be prepaid before printing. All payments are to be sent to IHMSA HQ, P.O. Box 22356, Cheyenne, WY 82003. The club may specify whether the paid notice is published in Section A or B.

State match results can list both first and second place finishes. Regional match results can list first, second, and third place finishes. "Specialty" matches replacing a state championship may publish first and second place finishes. "Specialty" matches replacing a regional championship may publish first, second, and third place finishes. All other match results wherein the total number of handgun silhouette entries exceeds 11 (including all IHMSA, NRA & non-member guests) can list only the first place finish. Matches with less than 11 total handgun entries as defined above can list all IHMSA handgun entrants and their place. Regardless of the above, all 40's, 60's, and 80's (depending on the number of rounds fired at the match) can be published from ANY IHMSA match.

An IHMSA club holding a dual sanctioned (IHMSA/NRA) match may submit a match report for publication in the *IHMSA News* containing both IHMSA and NRA results. The number of published NRA results may not exceed the number of published IHMSA results. **Publication is limited to IHMSA sanctioned handgun disciplines only.** 

Please address any questions concerning this policy to your Regional Director.

#### THE NEW SILHOUETTER

Save-It<sup>TM</sup> 12-Gauge Semi-Auto Shotgun Shell Catcher

So Close and Yet So Far

**Another Prediction True?** 

By Ken Horowitz

Sometimes it's the small things that make a big difference. In this case I'm referring to Birchwood Casey's Save-It<sup>TM</sup> 12-Gauge Semi-Auto Shotgun Shell Catcher. While I had been familiar with various cartridge shell catchers, including having observed homemade ones that looked like butterfly nets crudely anchored to a bench, the first time I became aware of shotgun shell catchers is when I got reprimanded by a shotgunner yelling that my casing were hitting his new \$8,000 wood (really, he said \$8,000 for just the wood! I can't even imagine how much his whole shotgun cost). He turned to the range officer and asked why shell catchers weren't required for semi-autos. I pictured a net or wire contraption hanging from the side of my Beretta.

Since that time I've learned that it's bad etiquette to use a semiauto on a trap line without a shell catcher and the idea of the catcher is to contain the shell casing inside the action where it can be easily removed by the shooter. The Save-It<sup>TM</sup> 12-Gauge Semi-Auto Shotgun Shell Catcher is clever in its simplicity, about the highest compliment an engineered contraption can garnish. A stamped sheet metal piece adheres to the action below the ejection port with double sided sticky tape. A bent wire hinges on the stamped sheet metal part in such a way as when engaged, it interferes with the full ejection of a shell more or less causing a stovepipe through the wire. At this point the shooter simply grabs the shell to remove it.

The purpose of hinging the wire is to be able to fold it down away from the ejection port for those situations, as for example hunting, where follow-up shots are taken and the shooter will want the shell to completely eject. Since Birchwood Casey's stock photos came out so much better than mine, I've used them with this article to show the two positions.

The device is simple and it works. I tried it on my Beretta semi-auto and am so pleased with it that I plan on getting two more for other semi-auto shotguns, a Remington Model 48A in 16 gauge and a Remington Model 1100 in 20 gauge. While designated for 12 gauge, I've read several blurbs on the internet that explain how adjusting the wire can easily adapt the device for 20 gauge semi-autos (so I figured it could handle the 16 gauge as well). As long as the sheet metal component clears the ejection port and forearm and does not interfere with the bolt carrier release button, all will be well. I'm confident I can make it work and if not, the investment is only \$20 at full retail (or less if you shop it; under \$14 on three sites I just Googled).

\* \* \*

I recently returned from a family vacation in Newport Coast, California which is maybe 1-1/4 - 1-1/2 hours from Los Angeles Silhouette Club where the Internationals took place (that's with no traffic, a very hit or miss thing in the Los Angeles Metropolitan area). Besides conflicting with family planned events, including Disneyland, California Adventure, Raging Waters and a trip to Catalina Island, I decided not to add my IHMSA guns to my baggage. Despite the very well written description of how to transport firearms published in IHMSA News, hitting airports twice in California and twice in New Jersey just seemed to play against the odds of having some kind of bureaucratic problem. Sure, I would be in full compliance with all the requirements, but experience tells me that some clerk or other, not knowing the correct procedure, would throw a monkey wrench into the transport, creating an inconvenience or worse. Here in New Jersey, our rights are more or less boxed into a right of legal defensive arguments, not rights to be free from chal-

lenges. Perhaps I'm overcautious, but just as you can't be too careful with the handling of firearms, there are certain states where being right doesn't mean you're going to have no troubles.

Further, our family was staying in a Marriott property (by the way, drop dead spectacular) and I've heard mixed comments about the unfriendly policies that have been invoked against having firearms on Marriott premises. Whether true or not, leaving firearms in the car is certainly not an option. Anyway, I'm glad that so many of our members were able to attend the Internationals.

\* \* \*

Lately, there has been a lot of press about the demise of the .40 caliber cartridge and firearms that shoot it. Okay, perhaps demise is a bit over the top. Let's just say that its popularity just took a huge hit by the FBI's apparent decision to go back to the 9mm platform. Just as so many law enforcement agencies followed the FBI into the .40 caliber platform, you can be sure they will follow the exodus as well.

From its inception, I saw no need for this cartridge. With the then controversy raging over the 9mm v. 45ACP, the avoidance of making a decision triggered a compromise that satisfied few but as in many such developments, voices in opposition remained mostly silent. Consensus has it that the seminal event driving the compromise was the infamous Miami Shootout, followed by the first attempt at a 'tween cartridge, the 10mm, which proved too potent. Shave a bit of brass off the case, tweak the load and voila, the .40 caliber is born.

At the time, mainstream gun rags fell over themselves with praise and led by the FBI, other LE jumped on the bandwagon along with sport shooters as well. It made no sense to me and I predicted an early fizzle. I've called some things right and many wrong and I came to believe, as time lapsed, that I had called this one incorrectly. However, my only error was the timing. At long last, there is a great retreat as realization takes hold that the .40 caliber has just as many disadvantages versus advantages when compared to either the 9mm or 45ACP. With new bullet technology, performance is only marginal over the 9mm, while maintaining almost the same recoil issues as the 45ACP.

Now don't get me wrong. If you love the .40 caliber or need it for some purpose, such as making power factor or the sort, fine. But when you compare it with classics that have been around over a hundred years and just keep getting better like the 9mm and 45 ACP, it's not going to make it. Sure, people will keep loading it because that's what we reloaders like to do. I have nostalgic attachments to my own list of "used to be" champion cartridges.

#### Manufacturer:

Birchwood Laboratories, Inc. 7900 Fuller Road
Eden Prairie, MN 55344
(800) 328-6156
Fax: (952) 937-7979
www.birchwoodcasey.com

Editors note: I missed this edition last issue, so it is included here.

#### **To All IHMSA Members:**

First, I am going to go over items discussed in our president's report. As Steve Martens has stated, we will be printing new rule books in 2016. After we have the practical hunter rules incorporated into the rules and also finalized the rules for 500 Meter silhouette, we will get these printed and included with your renewals.

The Board is considering a reduction in membership fees. This will be released when we have a final report on our expenses. Since the biggest expenses used to be printing of the News and HQ costs, both of these have been drastically reduced. When they have finalized this, I will let you know

And Last, I want your input for items to be printed in the IHMSA news! If you wish to see Load data for specific calibers, Equipment reviews, or anything Let me know! Also, if you wish to submit an article yourself, I greatly encourage it!

#### For All Match Directors:

First, you may notice your match reports missing from this issue. The Package containing mailed in reports came too late for printing in this issue from HQ. So, I am requesting that if you mail in your Match reports, to directly send them to me (your editor). While if you send them to HQ, it delays printing of your match results by 2-3 months. If you send them directly to me, it will get them printed 1-2 months earlier and also decrease the work load on Cindy Smith at HQ. I encourage though, if you can to send your match reports electronically to me as this saves me time in entering your match results. Just remember that the Match recap sheet and sanction Fees still go to HQ!

I will be sending out the 2016 Match schedule forms in the next 2 months to the match directors so you can submit your clubs schedules. Please make sure they have been approved by your state or regional director as this is a mandatory requirement for Sanctioning.

And last, as soon as I can get copies of all the Match forms, I will be updating these and attempting to make them easier for you. This includes the forms for the special awards.

And one final thing, I am hard to get hold of via Phone, but if you leave me a message, I will get back to you.

Also, mine and HQ's contact information is always located on Page 2 of the IHMSA news.

If you have any input or have questions, feel free to get hold of me.

# We would like to thank our industry friends for their continued support of our sport

#### THE NEW SILHOUETTER

#### **MOA**

#### By Ken Horowitz

I was speaking with a non-IHMSA shooter who, in a "friendly" manner, began to malign the size of our targets and the correlative non-necessity of "true accuracy" in toppling steel. The scene was a 200 yard range where MOA converted into about two inches at that distance. Going for sub-MOA with a target rifle, the shooter saw no big deal in hitting a ram that measured about a foot from belly to back, not counting the endowment that makes a ram a ram. The over thirty inch measurement that goes from butt to nose wasn't even mentioned.

You know how it is. The reactive target folks (that includes us) make fun of the paper punchers (I'm one of those as well). The benchresters poke fun at anyone with a group over 1-1/2 times bullet diameter. The 1000 yard shooters belittle the benchresters. Single projectile shooters can't understand what's so difficult about hitting a clay target with a whole swarm of pellets while the shotgunners see no sense in taking so long to hit a stationary target. Since I shoot IHMSA, CMP, 22LR rifle matches and Sporting Clays, I hear it all.

To be sure, accuracy standards are tied to the discipline at hand. But there is more to it than hardware and target size. Each discipline has both common and unique elements that can divide success from failure. While that 200 yard shooter is correct with respect to using a ruler, there is no guaranty that a successful 200 yard shooter will be any good at IHMSA. For all the years I've been shooting, I'd give myself a B grade for rifle match skills that I shoot (okay, maybe a B-), a C for IHMSA and, only by being generous, a D for Sporting Clays.

Back to IHMSA, how accurate is accurate? With so much being published regularly on MOA this and MOA that, what is an acceptable MOA for knocking down steels? In this context, the first step is to determine a number that would incorporate the inherent accuracy of the firearm and ammunition, ignoring the shooter's skills. For that, let's look at the target dimensions and the rages at which they are shot.

First, a word on MOA. The quick rule of thumb for minute of angle (MOA) is that one MOA equals 1" at 100 yards. Double that to 200 yards and MOA equals 2"; halve it to 50 yards and MOA equals 1/2"; and so forth. This is a great rule of thumb and it works quite well at the "short" distances at which most of us shoot. The actual derivation comes to slightly over an inch for 100 yards with corresponding changes at any distance. For what it's worth, the following paragraph may be helpful (or skip it if you don't care).

(a) There are 360 degrees in a circle; each degree has 60 minutes; therefore a circle has 21,600 degrees (360 x 60). (b) 100 yards has 3600 inches (100 x 36). If the shooter is standing in the middle of the circle, the 100 yards distance to the target is the radius of that circle. (c) The circumference of that circle is  $2\pi R$  (where R = Radius) or as some of you might have learned it,  $\pi D$  (where D = Diameter or 2 times the radius). Either way, using 3.14159 as  $\pi$ , the circumference of the circle, in inches, is 22,619" (2 x 3.14159 x 3600, or 3.14159 x 7200). (d) Taking the circumference in inches and dividing by the number of degrees in the circumference gives 1.047" (22,619 ÷ 21,600) as the real measurement of MOA. As you can see, at close distances, 1" is good enough.

As mentioned previously, the center of a Big Bore ram is about 12" top to bottom. If a properly sighted gun were held dead on at that point at 200 yards, 6 MOA would be good enough to hit the target. If your range has the rams set in meters, you would need a bit less than 5.5 MOA. The required MOA for the other animals is equal or less stringent than necessary for the rams. The chickens and pigs are both considerably less, while the turkeys are just about the same. However, the turkeys create a unique problem in determining center of mass. Some shooters I know aim at a top to bottom center point directly above the center of the leg, but the true center of mass of the turkeys is about two to three inches into the chest from that point.

Field Pistol targets, being set at 25 to 100 yards, are half-scale at half the distance of Big Bore targets set at yards (not meters). Accordingly, the minimum MOA requirement for Field Pistol is also no better than 6 MOA. (For Big Bore Half-Scale, the minimum requirement would be twice as great or half the MOA: i.e., 3 MOA for ranges that set in yards and 2-3/4 MOA for ranges that set in meters). Small Bore targets, being only 3/8" scale, require better (less) MOA than their Big Bore and Field Pistol Brethren. 4.5 MOA will do throughout the course of fire.

For a little cushion, let's say a 4 MOA gun/ammo combination is adequate for shooting across any course. Realistically, I don't think anyone ever walks into a gun shop and asks to see a 4 MOA gun. On the other hand, many shooters already possess 4 MOA or better firearms (of course, with the proper ammunition for the combo), but look to increasing their performance by throwing money at hardware. There is so much more to be gained by honing skills than by decreasing inherent MOA.

Setting the 4 MOA on the side, assume a more capable setup; for example 2 MOA. If you can benchrest your combo and consistently get 2" groups at 100 yards but still miss a lot of animals during matches, the problem is not likely solved by getting a 1 MOA outfit. Better results can be had by working on sight picture, trigger control and steadiness of position. The equipment versus skills issue that is endemic to many sports is easily answered for us. A good shooter can get better results with a mediocre outfit than a poor shooter can achieve with a tack driver.

Now don't get me wrong. I'm not suggesting that anyone uses a shot-out barrel that performs like a smoothbore. I've shot those and the only way a target falls is on hope. On the other hand, as a proponent of the shoot what you have school of thought, I encourage everyone to pay attention to things that can be controlled and not write-off missed targets to gun and ammo capabilities.

Just for fun, if nothing else, benchrest one of your non-IHMSA guns, like maybe a 4" barreled revolver. If you can print groups within a 6" or smaller circle at 100 yards and the point of impact is properly aligned with the point of aim, you're good to go and should try it for Field Pistol. I used the 4" revolver illustration because I own two contrasting 4" barreled examples. One, a S&W Model 686 (357 Magnum or 38 Special), is up to the task with a number of loads. For the other, a Ruger Blackhawk, I've yet to discover a load that can do it, whether using 357 Magnum, 38 Special or even 9mm Luger in the extra interchangeable cylinder. (I do keep trying the Blackhawk occasionally, since it's a fun gun to shoot, but any falling targets are the result of the hope factor that I previously mentioned.)

By the way, this is certainly not a general indictment of the Blackhawk Model. I bought this gun used several years ago because I happened to be buying something else at the time when I spotted the gun in the dealer's case at an attractive price and I had a soon to expire purchase permit in my pocket along with enough cash. I have no idea of the history before me but this is certainly one of those shot-out barrel examples. While my specimen is perhaps the least accurate handgun I own, I know of many people who are quite pleased with the inherent accuracy of the design.

While not "IHMSA-esque," my Blackhawk is a fun gun for short range plinking, has an incredibly fantastic trigger and while I made it somewhat homely with Hogue rubber grips (they just don't look right on this gun), it's a pleasure to shoot even with the stiffest 357 Magnum loads. The Hogue grips took it all the way from painful (i.e., bloody pinky) to excellent recoil management. I keep telling myself that I should spring for a new 6-1/2" barrel to make things right with this revolver but it has never risen to a priority level. Maybe one day (which phrase usually converts to never).

## IHMSA NEWS-SECTION B

#### **MARKSMANSHIP COMPETITIONS**

#### The Burris cup:

Scoped .22 Long rifle caliber Handguns only. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a ransom rest, vise or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns setup for Creedmoor to better compete.

#### **The Weaver Trophy:**

Scoped centerfire handguns. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a ransom rest, vise or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns setup for Creedmoor to better compete.

#### The Merit Challenge:

Centerfire handguns with iron/open sights. Your best 5-shot group at 100 Yards or Meters. Groups must be fired from an IHMSA legal position. No benchrest or artificial support allowed.

#### The Daisy Avanti Trophy:

AIR production guns with iron/open sights. Your best 5-shot group at 18 Yards. Groups must be fired from an IHMSA legal position. No benchrest or artificial support allowed.

#### **General Rules:**

All entries must be shot with IHMSA legal guns. Production, Revolver, and Unlimited guns are allowed in the Burris, Weaver and Merit classes.

#### Witness:

Winning groups must be witnessed by an IHMSA or NRA member. Eligible winning targets must be signed and dated by the shooter and witness. Also, please include the shooters IHMSA number and the witness's IHMSA or NRA number by their name. A witness is not required to enter but is required to win.

#### **Targets:**

Targets submitted must contain no more and no less than 5 shots in each bull zone.

#### RECORDS PROGRAM

#### Marksmanship program

#### **Burris Cup:**

This is Dave Edney, I have taken over the marksmanship program. Being new to IHMSA I didn't know much about the program. I have done some research and this is a pretty cool way to make the range trips a little more interesting. If I could just get good at shooting I may have a few entries my own.

I have received my 1<sup>st</sup> target in the mail for the marksmanship program. The target is a Burris cup entry from Glenn Tullius out of Minnesota. Glenn is shooting an Anschutz exemplar converted to center grip with a Burris 3-12 power scope. Ammo is SK pistol match. Weather conditions were 73 degrees, high humidity with dead calm wind. Glenn's 5 shot group at 100 yards measures an impressive 0.712" center to center.

Glenn shoots silhouette at the Holmen rod and gun club in Holmen, WI. Keep up the good shooting Glenn and those 1/5<sup>th</sup> scale critters need to be afraid.

My log sheet is pretty bare so send those targets in. Safe shooting.

Dave Edney 14 Ridgewood Way New Castle, PA 16105

Editors note: we are trying to restart these programs, so please send your entries in!

## Big Bore Records Program (BBRP) By Joe Cullison

The year is starting to wind down and cool off but some super scores came in.

Jim Kesser (OH) shot a S-34, P-39 and a U-40 to post an excellent 3-gun 113. This puts Jim in a tie for first in the Standing category and lands him on top of the heap for the 3-gun high score. Jim also shot a Standing agg of 60 with both entries being open sights. Excellent shooting Jim.

Doug Edney (OH) made his first entry into the BBRP with some fine shooting. Doug shot a S-28 and a US-33 to make a Standing agg of 61. Doug also moves OH into a state total tie for 2nd. Welcome to the program Doug, I expect to see a lot of you around here.

State totals for 2015 are: CA-6, OR-5, OH-5, MN-2

Please bring at least one friend or acquaintance to every match. Together, we can keep IHMSA growing.

Please forgive me if I have left anyone out or made any other errors. Send me the information and I will make it right as soon as I can. Thank you for your support of the BBRP.

Send entries to:

Joe Cullison, 28988 Berlin Road, Sweet Home, OR 97386 or to jcunclejoe@aol.com. 541-317-8801 evenings
Thank you.

#### **SmallBore Records program**

#### By Dan Hagerty

Joe Kennedy of Nevada shot a standing aggregate of 100 club 63 to take the top spot (S:27,US:36)

Paul Habig of Nevada continues to keep me busy. Since my Last report Paul shot a 110 3-gun and a 149 40 gun aggregate. Also a standing aggregate of 61.(S:30,R:40,P:40,U:39,US:31). He also shot 2 more revolver 40's!

The following I found while going through match reports. I am only guessing on the persons state based on where they shot. Steve Martens of MN shot a nice 31 standing. Doug Edney shot a nice S 30 standing and Wayne Bolston of PA also shot a nice 30 standing!

Scores next in parentheses are the converted scores to a 40 round match.

#### LOUISIANA

#### ASCENSION SILHOUETTE **GONZALES, LA SEPTEMBER 12, 2015 BY: CHARLIE BRAUD**

We had a light turnout for our September match. A hearty welcome goes out to a new shooter, Sal Molea. Sal started with a bang posting a 39X40 in 22 LR Practical Hunter using a borrowed Ruger Charger with a bipod. By doing so he jumped straight into International class. So he fired another entry in UAS without the bipod and scored another 39X40, missing the last ram. His spotter was calling out the remaining time and he fired his 39<sup>th</sup> shot with only 15 seconds remaining forcing him to rush that last shot. I feel confident Sal with get his 40 very soon. We have only one remaining match which is our State Championship scheduled for the first weekend in October.

#### **GONZALES, LA OCTOBER 3-4, 2015 BY: CHARLIE BRAUD**

Another shooting season has drawn to a close at Ascension Silhouette with the completion of our State Championship Match Oct 3-4. Shooters were in attendance from two other coastal states as well as our home state of Louisiana. Harry Stover and Steve Broxson came from Florida to share the range with us and Region 2 Director Allen Gaskin came down from Mississippi. A total of 30 entries were fired over the two day event. Heavily overcast skies and gusty winds kept most of the scores down but there were some exceptions. Jay Clark and I each shot a 40X40 in UAS but Jay could not stay for the shoot-off. There was however a shoot-off in UAS/AAA between Robert Stevens and David Heintz. It was very close and came down to the last shot before it was decided. David came out on top with 6X10 vs Robert's 5X10. Harry Stover put in a solid Field Pistol performance with a 55 aggregate score. We had several non-IHMSA members shoot with us and even though they did not shoot for official score I have their results included below. Thanks to Robert and David for remaining after the match to help with picking up the targets and rails.

In other news, and barring any unforeseen problems, we will see a return of Big Bore silhouette to Louisiana later this month. I plan to host a match at a new facility in Hodge, LA on October 24. A March to August schedule is being planned for 2016. Additional details will be made available as soon as I know them.

#### OHIO

#### Pickaway County Sportsmen Club Circleville, Oh Jim Kesser, Match Director 10/10/2015

Our last match of the season and it was treme ndous! Excellent scores with many new high s cores! This was the inaugural test of the new res et targets and they worked pretty good. Next y ear we hope to have the full set 1/5 scale, small bore and field pistol all on rope pull auto resets. It will really speed things up, especially if we dont paint every single time.

Now on to the good scores, Thankyou to our region 3 director Brian Gildea for bringing out another new shooter,

Bill Williams. Bill says he loves shooting sil houettes and will be back. Brian has singlehan dedly brought out more new shooters in the past year than all the rest of Ohio s

hooters combined. We all need to look inward and follow his lead and bring a friend to a mat

On the Field Pistol side, Carl Skidmore accu mulated one more 60 club with a 60 agg 29/3 1 . Just squeeked that one in. There were some great PAS scores. Bob Ochs shot his iron sigh t gun in a re-entry in PAS and turned in a fantas-

tic 33 with 3 shootoffs. Brothers Dave and Dou g Ednety came over from Pa. to shoot with us and Dave turned in a 33 but was edged by br other Doug who had a 34 and 1. John Maple proceeded to beat all with a 34 and 4 shootof fs but Rich Baird showed up and tied John with the same score. Rich shot another round of shootoffs but John had to leave and technic ally Rich won the tie breaker by countback wi th more rams. It was good to see Jim Lejman b ack with us and he made a leg up in FP -P.

On the small bore side I was excited to see how my reset targets were going to function a nd some people seemed to real-

ly like them becasue they knocked a bunch of

them down. Bob Ochs had a perfect 40 and missed just one of the shootoffs. Rich Baird fi Small Bore Results: nally got his 2nd 40 in 1/5 scale UASFS and is now International class. Congratulations Rich ,I think you are the only Ohio shooter to obtai n this distinction. Isiah Herron finally got his new gun and proceeded to shoot a 40/3 the ve ry first time out with it. It was Isiah's ver y first 40 and gave him a leg into Int. in SB UAS. BTW he had to shoot an alibi on the last ram for the 40 which made it that muc h more memorable. Brother Jeremiah cant wait to get his hands on it so he can shoot his ow n 40. Doug Edney shot an amazing 32 in SB standing which by the way makes him INTERN ATIONAL.! With his 29 in US this gave him a 61 agg for the 60 club. Good shooting Doug. Thanks for all who came out and helped set u p and tear down. See you next year and keep u p the good scores!

#### CAMBRIDGE, ONTARIO CANADA **GALT SPORTSMEN'S CLUB** 13<sup>th</sup> September, 2015 By Pete Durrant

I know Steve Ware does not like weather reports but I can't help it! We were promised rain all morning but all we got was a stiff northerly breeze and cool temperatures so it made for a good and interesting match!

Not too many half scale shooters, seems the small critturs put some folk off.

Closest competition came in small bore UAS again where both Howard and Pete posted 40's, Pete managed to get the edge on Howard with the shoot offs.

#### CAMBRIDGE, ONTARIO CANADA **GALT SPORTSMEN'S CLUB**

27<sup>th</sup> September, 2015 **By Pete Durrant** 

Best attendance at one of our matches for a long time, but I need a way of getting the new shooters to join IHMSA but there really is no incentive! For the first time ever we had six perfect scores posted, two each for Lorena, Howard and Pete each shooter getting one in BB-UAS and one in SB-UAS. Murray had a great time setting up the shoot offs to break the three way ties, Pete took the Big Bore honours and Howard took the Small Bore ones. It was good to see Ric Olsen on the line again, no cowboy matches scheduled!

Last match for 2015 scheduled for 18<sup>th</sup> October.

#### CAMBRIDGE, ONTARIO CANADA **GALT SPORTSMEN'S CLUB** 18<sup>th</sup> October, 2015

Reasonable attendance for our last match of 2015, moose season and a local Cowboy match thinned our ranks a bit and hockey games for the boys meant a lot of running around by old guys to set targets for the first part of the match.

**By Pete Durrant** 

Only had one perfect score posted and that was by Lorena in BB-UAS, beat her Dad by one animal!

Thanks to all who participated and made this a great season, next match will be in April 2016 and hope-3 fully we will have as good a year as this one.

#### Minnesota Winter Air League Ramsey, MN Dan Harder, Match Director 3/7/2015

This was our annual fun match. Due to various commitments several of our regular shooters were unable to attend, but those of us that did had fun. Because it was a "fun match" there were challenges that weren't sanctioned competition. The one that was the biggest challenge was a gopher silhouette field target set at approximately 26 yards. The target was about 5" high and 2" wide with a 1/2" hole in it. Shooters had to shoot through the hole to hit the trigger that dropped the target. The challenge was to see who could drop the target with the fewest shots. Ken LaCroix was the first to try with his UAS gun, a Morini, and scored the first hit with 8 shots. Rick Schrader was the second shooter with his Unlimited gun, an IZH 46M, and scored a hit on the 9<sup>th</sup> shot. Steve Martins was up next with his UAS gun, an MG-1, and scored a hit on the second shot. Dan Harder was next up with his Production gun, a Crossman 1701P, and also scored a hit on the second shot.

#### Dan Harder, Match Director 3/21/2015

This was the Region 5 Airgun Championship for 2014. It was a great way to finish off the airgun competition for the 2014/2015 winter. We had three shoot-offs. There would have been a forth between John Richards and his son A.J., but they had to leave early. They both had Unlimited Standing scores of 55X60. I guess they will halve to decide how to share the 1<sup>st</sup> place trophy. The shoot-off targets were three ½ scale and two ¼ scale chickens in each string of five targets and were set at different distances for the different classes. They were set at the pig line for Production and Dan Harder won with 9

targets to Steve Marten's 7 targets. For Unlimited the shoot-off targets were moved to the turkey line. Steve Martens and Rick Schrader both shot Unlimited 60X60 and Steve won first place with 8 targets to Rick's 5. For UAS the shoot-off targets were moved to the ram line. Steve won UAS with 9 of 10 shoot-off targets, Ken was second with 6 targets, and Rick, using his Unlimited gun for UAS got 4 targets. We had three competitors that shot all six classes and Steve won the Iron Man with 329 of 360 possible targets. Steve also won the 3 Gun Aggregate with 169 targets. John and A.J. won all of the standing classes, with John posting an impressive 159 of a possible 180 targets. John won the Standing Aggregate with 107 of a possible 120 targets.

What a match to honor the memory of Larry Allenbaugh by having the Larry Allenbaugh Memorial Lava Bed Shootout. 97 guns shot in three days with two shooters shooting 10 guns each (Roger Wood and Michael Sussman) and two more with 9 guns each (Bob Jeffery (drove down from Montana as always) and Bill Pendleton Sr.). I don't usually discuss the weather, but the WIND was absolutely horrible with 15 mph all the time and gusts to 25 on Friday and Saturday, and then calm on Sunday. Even with the wind, some good scores were shot, but no 40's until Sunday and then only 1, that by Tom Tressell in BB UAS. We had one shoot-off, that in Small Bore UAS. My mistake cost Bill Sr. the chance to participate (Sorry again Bill), but Michael Sussman and Tom Tressell shot it off with Michael coming out on top. The targets were pretty small, but the guys really shot well on them – Good Shooting. For once, Dave Harmer didn't win 3 and 4 gun aggregates because he wasn't here to do it. I got lucky to win 3 and 4 gun aggregates in Big Bore (only one to shoot standing), and Michael Sussman won them in Small Bore. Michael also took top honors in 1/5 scale – he was really shooting well. I would like to thank some of the people that don't get mentioned very often for their support of our sport (Fred Adams, Jerry Perks, Steve Mosher, Jim Miller, Keith Archibald, Ned Rockwell, Bill Richens, Jesse Bennet and Skip Jones). These people come out on a routine basis and shoot and have fun - THANKS. Jesse Bennet, our Club Secretary, got herself a new TC barrel in 7 TCU and will be giving us all a run for our money when she gets it going. She also managed to win Field Pistol C with her TC 30 Carbine - good shooting. Our last match is in September, hopefully not as windy. See everyone then.

oci, nopci	uny not as windy. L	occ cveryone

The Fifth Scale folks had a close one with Mil Abel taking the title with reverse animal count from Rick Redd.  The Rifle shooters are growing. Rich Burket brought 2 rifles and Walt Padgett brought a new shooter.  Rick Redd was our SB-U champion with the compensation of the day. That also earned him Himpersection of the day. That also earned him Himpersection.  FP  PAA Doug Hockinson S&W: 357 Mag. A Mike Abel Glock 23: 40 S&W PASINT David Whitman Mer32 H&R AAA Paul Hoadley T/C: 25-20  FS  UASFSINT Mike Abel Ansc  N1

First, we welcome Frank Kodl as our newest member. Frank has been attending our air pistol & small bore matches for the last few months. He is a great addition to our club. & thanks Frank for helping to set up today.

Tom Santos took the UAS & USIS titles and High Senior. Ron Silveira beat me by 1 target in US, and neither of us were thrilled with our scores.

Thanks to Tom & Ron for tearing down the range.

#### **Grants Pass, OR** 19 Turkeys, Match Director 10/11/2015

It was a good match with 22 entries. Mike Abel was to attend & he and Dave Whitman were going to have a 40 Shorty duel. Mike decided to go hunting; so, Dave got a day of practice in. We'll see if the duel will happen in November. Over in the PAS side of FP, Paul Hoadley trounced everyone & took that title. Paul also took the SB US title. However, Dave did take the Fifth Scale title.

Rich Burket brought both his Remington & Martini rifles. He shot the Martini on the Field Pistol targets. Somehow, he and I both got stuck shooting scores of 22 in every event we shot!

On the Small Bore side, Rick Redd took the P & U titles, Frank Kodl was our Standing winner & Charlie Dean took the Revolver title. Rick was also High Senior.

Thanks to Dave, Paul, Charlie, Rick, Rich, & 10 S&W 15 Paul for helping to set up and tear down the range.

#### WASHINGTON

#### Paul Bunyan Rifle Club Puyallup, Washington **Bret Stuntebeck, Match Director** 8/1/2015

We had three new shooters this month. Steve Bishop brought his brother Jon over to give his new to him Ruger SBH a go at some steel. Jon managed a R-Unc, 7 for his first time all without any initial sight settings. Also Mike Wagenbach from Seattle and Derik Andreoli from Kirkland came out to give it a try. Mike shot an entry in smallbore P-Unc and posted a very respectable 23 using his Ruger MkII. He then shot a FP P-Unc 9 using a Ruger redhawk, Nice shooting Mike. Derik shot two entries with his browning buckmark. The first in UAS-Unc posting a 21 and then in FP PAS-Unc posting a 19. Not bad for a first time out. Hope all our new shooter come back and shoot with us on a regular basis.

No 40's this month. In UAS-AAA, Steve Bishop shot a 39 missing a one ram. In U-Int, I managed another entry into the Last Ram Club with a 39 and missing of course the last ram. Guess I got a little complacent and took it for granted. Steve Cozort was back this month and managed a UASHS-AAA 31. Joe Stumpf got a respectable R-AA, 30

On the Smallbore side Joe Stumpf posted a UAS-AAA, 36. Vince Leete posted a nice P-AAA, 31. Dave Chalfant posted a S-AAA, 16.

In Field Pistol Dave Chalfant posted a Very nice P -AAA, 27. Vince Leete posted a PAS-AAA, 23. Nice shooting guys.

Once again our target setters did a fantastic job. Thanks to all who stayed to help pick up targets after the match.

Until next time shoot straight and be safe.

#### SB R A Pfitzer: Chuck Ruger: 22LR 18 NEBRASKA STATE CHAMPIONSHIP MATCH; September 17-20

We had a great State Championship Match, with more entries than ever before. There were 103 to be exact making it 19 more than last year. It started out **HOT** the first day, then cool and rainy, in fact so cool one could see there breath but that all changed for Saturday and Sunday, turning out to be great weather for the last two days. <u>Any</u> day one can shoot is a good day just some days are better than others. Ed Mundorf put in a lot of time getting our range and the self-setting Big Bore target setters installed and working. Ed, Ron Teselle, and Mike Kunkee ran the Match while Jami Knerl kept the scores up to date on the computer and a "BIG THANKS" to ALL who helped get the range ready for the match.

There were shooters from Canada, Kansas and cities throughout the State. From Lincoln Jeff Shults shot (for the first time) a 40 in UAS ... "Good Shooting" Jeff. Chuck Pfitzer also shot a 40 in UAS moving him up to Daryl Growcock in FP PAS and Chuck Pfitze

INT. Daryl Growcock, in FP-P

## October 11 2015 IZAAK WALTON LEAGUE: Lincoln Nebraska By Chuck Pfitzer

October, was a small turn out but as always a fun Match. We had my son in-law from North Dakota for a guest. He has never tried Silhouette shooting before and was thrilled when he hit 4 out 5 Rams the first time he tried them. We will be moving indoors for the next few months shooting pellet guns for the winter Silhouette Matches with outdoor Matches starting back up in March or April. Remember keep your primers and powder dry.
