The 2014 IHMSA World Championship:
Site of Great Shooting, Great Work, & Great Fun

Over 80 shooters and getting toward 600 entries crossed the line at the 2014 IHMSA World Championship in Oklahoma City in July. With cooler temperatures the first few days increasing into very warm temperatures by the end, this year’s event was blessed with little wind for the entire 8 days as well as good light conditions, and the shooting results showed the benefit of these conditions. With around 200 entries more than last year’s World Championship, this event was an obvious success. In addition to the United States, the countries of Australia, Brazil, Canada, and Paraguay were represented.

The annual banquet had many big winners as well. The top prize went to Dave Silva as he was drawn first for a new Ruger handgun. A huge thanks goes out to our many supporters in the industry.

As for some facts concerning the shooting at the World Championship, here are some impressive statistics passed along to me by Jim Fields. A total of 77 perfect 80x80s were shot, which may be a record in itself. Four 80x80s in fifth-scale is a record. For a breakdown of these perfect scores by discipline:
  • 2 were in BB Production
  • 7 were in BB Unlimited
  • 19 were in BB UAS
  • 6 were in BB ½ scale
  • 7 were in SB Unlimited
  • 21 were in SB UAS
  • 4 were in SB ½ scale
  • 4 were in Practical Hunter
  • 7 were in Air Pistol

As anyone who has attended a match of this caliber knows, it takes a lot of people to make this happen. Serving as match director, Jim Fields certainly did another fantastic job of putting this together. Jackie Brown and Dave Stone did an incredible job calling the line. Dave even called the line on the 9th day for the 500 meter match. Jim Myers deserves a great deal of credit for coordinating the line officers. Jim doesn’t even shoot silhouette, but was there every day, all day. Nancy LaCroix and Cindy Smith kept things organized and in order in the stat house. John Frizzell was there checking guns on and off the line a large number of the days. The target setters worked their tails off, keeping the match going and an incredibly brisk pace as it seems things were usually running ahead of schedule.

These are just a few of the many dedicated people who helped make everything work to put on the fantastic event. A huge thanks goes out to all of the members of the Oklahoma City Gun Club and all the volunteers who made the 2014 IHMSA World Championship a great success.

Steve Martens
• BB Revolver
• SB Unlimited
• SB Production
• SB 4-Gun Aggregate
• SB 3-Gun Aggregate
• AIR Pistol Production
• AIR Pistol U.S.C.
• AIR Pistol Standing
• 500 meter scope
• Iron Man

Nancy LaCroix - President and Cindy Smith put in countless hours in the stat house keeping everything straight.

Dave Silva was one of the big winners of the door prizes, winning a certificate for a new Ruger handgun.

People from Paraguay, Australia, Brazil, Canada and the United States convened in Oklahoma City.

The 38th IHMSA World Championship is now over. Five countries participated, they were as follows; Australia, Brazil, Canada, Paraguay and the United States. We had 100 competitors and 60 guns shot over the course of the seven days. Our annual iHMSA Board meeting took place on the last day and no new guns or rules will be voted on. However, we will be repriming the rule book this next year in order to include the Practical Hunter category.

On our trip to Oklahoma this year, Ken and I took a tour of two industry supporters, one was in Iowa at the Brownells operation, they have been a longtime supporter of IHMSA and the other one in Kansas at the Manufacturing Services, Inc. from who we purchased our logo chamber flaps from this year and in return, they donated a quite a unique physical coin the bottle eze. The bottle eze is a plastic holder for water bottles that you hook into your belt or pant pocket so you can carry your water hands free. They have a patent on it and they even put our IHMSA logo on it. Brownells is currently running a huge warehouse with a state of the art computer processing system and they are adding a clothing line. We were given the tour by the president, Pete Brownell and met his father Frank Brownell, he is the current CEO. It was amazing to see their operation and to see a family owned business that is very successful.

Manufacturing Services, Inc. is also a small family owned business that is run by a husband and wife and their children. They mold plastics and make items like the chamber flaps, bottle eze, and many more items at a very reasonable price. Again, it was a great tour of their manufacturing operation.

This year is leading into my last year as your president, a comment was made to me that all the past presidents of IHMSA seem to get away after their term is up. That will not hold true for me. Ken and I just want to enjoy more of the shooting end of things and have a wonderful game and not have to be concerned with the administrative duties. So we are looking for someone to step up and take my position. Please note, I will work diligently with that person to go over the duties of the position so a smooth transition can be made.

I also want to take this time to thank Steve Martens for serving as VP and to welcome Dave Smith to this position. Dave will be serving as Region 8 and VP until a Region 8 Director is appointed. Please join me in welcoming Dave to the IHMSA Board. Cindy, Dave’s wife is also our new AO Volunteer Administrative person, who will be handling this position while working full time outside of her IHMSA Duties. Please feel free to contact her if you have any questions and you can contact me directly and we in turn will contact Cindy to help eliminate some of the stress on her.

Until next time, shoot often and safely.

---

**Update Concerning Recent Perfect Standing Score**

**by Joe Frey**

As was reported in the August issue of the IHMSA News, Joe Cullison fired a 60x60 at the West Coast Championship in Big Bone Unlimited Standing. This was thought to be the first perfect standing score, in that the IHMSA World Records showed no evidence of it, and of the several year standing scores when we were aware of Mr. Cullison’s accomplishment at the time, nobody had ever heard of a perfect standing score. Even the ‘ol Google search didn’t show any evidence of an IHMSA perfect score, though many could be found for NRA matches. I must admit, I found this curious because I couldn’t imagine NRA shooters being that much better than IHMSA shooters, knowing how many fantastic and well-achieved people we have in our sport and our organization. With all it out, the NRA may not have better shooters—they just have better record keeping! Thanks to a few contacts from faithful IHMSA members, as well as the lengthy research performed by Region 1 Director Alan Olsen, it was discovered that this indeed was not the first perfect standing score in IHMSA.

As email from Brian Strecker was the first one I received, followed by a couple of notes, one of which noted that he remembers Joe Cullison at Kalamazoo, shooting a 40x40. When it was brought to our attention that this tremendous feat had possibly been previously accomplished, Alan Olsen took the time to go back through his copies of the IHMSA News, dating clear back to 1991, to verify this. In the beginning of 1999, Blair Hamilton took over the Big Bone Records Program. In June 1999, article indeed reports a 40x40 BB US score by Jeff Hunt fired on April 25, 1999. Then in the October 1999 edition, he reports Mark Reiner from Iowa shooting a 60x60 at the same event on August 23, 1998 at Bron, SD. In that article, it states that 40x40 as being the 2nd known perfect standing score.

Another informative conversation and great history lesson for me came in a Ian Olsen for his work in researching this. Joe Cullison’s score turned out to be a quite lengthy conversation. Lon mentioned names such as Marvin J. Tannenhill and Roger Ward as people he believe may have achieved perfection in the standing realm. While this does not diminish Joe Cullison’s great accomplishment—doing something which had seemingly been forgotten or lost to history certainly is an accomplishment—we certainly appreciate the effort by our members to get this information corrected. It should be noted too that Joe’s perfect score was a 60x60 as opposed to the 40x40 scores listed above.

In the near future, I plan to get the existing known records posted in the IHMSA News, that way people can see the record currently on file. With multiple people conducting the various records programs over the years, one can easily see where maybe something would have gotten lost over time. By posting our existing records, this may bring about other great conversation of times and events which may not be known to current members.

Thanks again for the contacts people have made to me concerning this, to Al Strecker, Brian Strecker, Joe Cullison, as well as Joe Cullison for performing an accomplishment so exciting that it has allowed us to generate renewed conversation about our sport.
What Causes Them, and What To Do About It

Part 2 of 2

by Mike Bellum

This is the 2nd part of a great article by Mike Bellum. Part 1 was featured on page 5 of the August edition of the IHMSA News.

Once in awhile a barrel will be too long from the hinge pin back, and the barrel will hit on the breech face before the locking bolts drop far enough to engage the frame. Not common, but it does happen. You could try to send it back to the manufacturer to contact me, or take a few judicious strokes with a file on the end of the barrel to connect this. This is rare, so don’t go whacking on your barrel until you are sure this is needed.

Once in awhile the chamber is not cut deep enough for factory ammo or new factory cases, rimmed or rimless. Usually TO chambers are cut almost deep. You are most likely to encounter this problem with surplus ammo. John, from your chamber, deeper is the cure if it is for a factory round, best done by someone who knows what he/she is doing with chamber reamers. If it is for a wildcat round, the size die may need to be shortened enough to pass the shoulder back farther. But... 5 times out of 10, failure to lock up is due to a loose nut on the reload- ing machine or operator. Virtually no where have I seen you are being told in the mainstream gunzines or by most of your gunsmiths about the fact that “gives” in the frame lets cases grow in length when fired. If this extra length of the case is not removed by the chamber, the case is too long for the chamber. If it is too long for the chamber, guess what? It has to be cut back to fit. Cut back or you go... out of business. And if it is severe enough, even slamming the barrel shut will not push the case into the chamber far enough to allow the barrel to close fully and lock up as it should... thus the need to the 1# cause, cases too long.

You must bump shoulders back or eventually be faced with misfires and extraction problems due to cases too long for the chamber.

“Too long”, I am talking about from shoulder to head on bottleneck cases, not the overall case length. Bottom line is this. The Contender is a bolt action. Nor is it a fixed barrel single shot rifle. It is a break open design. It does give when fired, and this “gives” the cases get too long.

And, you CANNOT do an accurate job of adjusting the size die with the barrel on the frame, unless that is, you take steps that I am not going to cover here. With the barrel on the frame, anything you do by the way of size die adjustment is a blind stab in the dark. You can make it work, absolutely, but you won’t hit that “sweet spot” where it is just right.

The best results are normally where the head stop sits out about 0.01” LESS than what the gap between the barrel and frame measures, i.e. such that the breech face is not cramping the case forward and up in the chamber when you close the barrel.

I refer you to The Experiment Every Contender Shooter Should Perform. Read it, do it, and you will then understand what happens when a case is fired in a Contender. Knowing what happens, you will then see one of the most common, most harmful causes for misfires and extraction problems. And guess what? Your misfire problems will most likely suddenly go away. It is too long from shoulder to head, what is the situation when a bullet is seated out too far? Same thing, and the same potential problems.

Hint: If a case sticks out of the chamber too far because it is too long from shoulder to head, what is the situation when a bullet is seated out too far? Same thing, and the same potential problems.

Another hint: If you continue to fire rounds that are too long and slamming the barrel shut on them is only giving minimal lock up, you stand a strong risk of rounding the locking table in the frame and ruinning it. It may be locked up enough to fire, but the minimal contact surface between the lock bolts and the frame causes the case to wear on the frame at this point. When this happens, the next step is the barrel coming unlocked and flying open when fired. I think this is a good time to insert my favorite quote: “Most men occasionally stumble over the truth, but pick themselves up and continue as if nothing had happened.” -Woodrow Wilson

Many erroneous ideas exist about sitting cases. Many times they work fine for years after they are well advised not to. Again, 9 times out of 10 when someone complains of misfires, it is due to incorrect tooling of the size die to not full length size die, failing to cut it correctly. If you understand this point and try other methods, you will at least know why you fail back on when misfires do occur.

The Experiment Every Contender (and Encore) Shooter Should Perform:

Step 1:

When the Contender (or Encore) is fired, the frame stretches within its limits of elasticity, then relaxes when the pressure drops. This leaves the fired case longer from shoulder to head than it was before it was fired. You will never see this with the extractor installed, but shooting the barrel without the extractor will show you clearly what happens when a round is fired. This additional length must be removed when the case is resized, or it will interfere with lockup and cause misfires and extraction problems.

DO THIS:

Take the barrel off the frame.

Remove the extractor by tapping out the 1/16th pin roll pin that holds it in.

Drop one of your sized bottleneck cases into the chamber.

The case head should be flush with the end of the barrel, if it isn’t, you need to adjust your sized die down in small increments until the case head is flush with the end of the barrel or protrudes no more than about 0.01”. Less than what the gap between the barrel and frame measures, i.e. such that the breech face is not cramping the case forward and up in the chamber when the barrel is closed.

Now load this case with a full normal load, and shoot it.

When you open the barrel without the extractor installed, the case head will be in the position it was when fired.

Take the barrel off the frame and look at the case head again. It will usually be sticking out of the end of the barrel about 0.1” or more.

This excess length must be removed, i.e., you have to bump the shoulder back in a full length size die. Neck sizing is out. If you insist on neck sizing or just partially full length sizing and have misfire problems, this is the reason.

Typical barrel to frame gap is normally from 0 to about 0.04”. Some will be up to about 0.06” or so. To be more precise, close the barrel on feeler gauges to determine exactly what the gap is.

Your sized cases should not protrude from the end of the barrel more than the amount of the barrel to frame-gap. Failure to understand the above is one of the two main causes for misfires, and binding, and a big percentage of the questions I get.

So at the first hint of misfires, CHECK YOUR SIZE DIE ADJUSTMENT.

Cases grow in length when fired in these brake open guns. DO NOT TRY TO CRAM THEM BACK IN BY SLAMMING THE BARREL SHUT. It is like trying to drive a square peg into a round hole. It just won’t work.

Step 2:

...to demonstrate that the firing pin strikes the shoulder of the unsupported bottleneck cases that have a traditional long sloping shoulder angle substan-
tially, thus increasing headspace.

Using our Bellum Headspace Indicator or a depth micrometer with the barrel off the frame and the extractor removed, drop an empty primed (not sized) bottleneck case into the chamber and measure where the case head is in relationship to the end of the barrel. Install the barrel on the frame. Fire the primer. Remove the barrel from the frame. Measure where the case head is in relationship to the end of the barrel. You will find that the firing pin has driven the case into the chamber at least several thousandths. Thus, if let’s say, you started with 0.05” actual headspace, in the milliseconds before the powder is ignited and pressure builds, the headspace has been increased by however much the case is driven forward by the firing pin.

Functionally, you now have excess headspace.

Excess headspace and anything that softens the briskness of the firing pin strike contributes to misfires and/or erratic primer ignition and poor accuracy.

Note that this also occurs with neck sized cases where the body of the case is binding on the chamber wall and not letting the case shoulder make firm contact at the chamber shoulder.

To alleviate erratic ignition and misfires due to cartridge DESIGN...

1) Choose a rimmed cartridge or a cartridge with a sharp “Ackley Improved” type shoulder angle that resists collapse of the case shoulder under the impact of the firing pin.

2) It is a rimmed bottleneck cartridge, set it up with the minimum headspace so that the head stopping point on the case is the rim and the case is not touching at the shoulder.
Installment Plan Life Memberships

The Installment Plan for Life Memberships allows you to purchase a Life Membership by making four monthly payments of $105.00 each (a total of $420.00), or in the case of a spouse two $50.00 each (a total of $100.00). When your last payment is received, headquarters will send you Life Membership card, certificate, and pin.

If you’re in the middle of your membership year, you can purchase a Life Membership now and apply the unused portion of your current membership. Call IHMSA Headquarters at (801) 733-8423 to find out how much credit you’ve received for your current membership.

Life Membership is a great way to enjoy IHMSA for years without the hassle of paying yearly dues and show your support of IHMSA at the same time - order yours today!

Rules Addendum:

Class Description: All 3 classes are to be shot from any SAFE shooting position including prone, kneeling, sitting, or standing.

The Practical Hunter Long Course will be shot on the 200 meter Big Bore range with the standard full size targets at their normal ranges.

The Practical Hunter Short Course will be shot on the 100 meter Field Pistol range with the standard targets at their normal ranges, using standard field pistol cartridges only.

The Practical Hunter 22 LR Course will be shot on the 100 yard SB range with the standard Small Bore targets at their normal ranges.

Class Rules:
- Any hunting style hand gun

Practical Hunter

a maximum overall length of 21 inches.
- Optics are allowed up to a maximum of fix power.
- Gun must be as manufactured with only cosmetic modifications.
- Ported barrels are allowed as long as they are shot from a safe position.
- A rest such as a bipod or a sand bag supporting the barrel in a prone position may be used by a new unclassified shooter and by shooters in classes A and AA.

Classification Scores:
A 0-15
AA 16-25
AAA 26-38
INT 39-40

2014 Rule Books

Dear IHMSA Members,

In an effort to keep costs down and with the only changes being the addition of the Practical Hunter category, Headquarters has been directed to not print the IHMSA Rule Book for 2014, but to send an addendum with these changes instead.

We understand that it is important for the membership to have access to the rules. Therefore, since the 2014 rule book is available on our website (go to ihmsa.org then click on the RULES link) Headquarters is being directed to only send rule books with New Memberships and upon request for replacement. If you need a rule book, please contact headquarters.

Thank you for your patience and understanding in this matter.

Nancy LaCroix
IHMSA President

Notices

~NOTICE~
Please keep your 2013 rulebook for the 2014 season. You will receive an addendum with your membership renewal

Sanction Fee Notice

Please make every attempt to send in your Sanction Fees promptly as the Sanction Fees help us pay for the printing of the Match Results. Informally we have a club(s) that does not remit sanction fees for a match held. We understand club officers are busy, so we just send a gentle reminder. Still failing to receive the fees, a second notice is forwarded. A final notice is sent if fees are still delinquent. After the final notice, the match dates will be deleted from the match schedule and the club’s sanction will be withdrawn until the fees are received.

NON-U.S. RESIDENTS IHMSA MEMBERSHIP APPLICATION

Basic: IHMSA membership is $50.00 (US) per year. Included with your basic membership is a membership/classification card, a subscription to the IHMSA News, a copy of the IHMSA rule book, and a set of target templates and window sticker to new members. For an additional fee these last two items are available for purchase in addition to your membership fees. Family memberships, for your spouse or children under 18, are $10.00 per person per year and include only the IHMSA membership/classification card. Membership fees will be mailed first class. Please allow 3-4 weeks for processing. All prices reflect a cash discount pricing. 5% is subject to additional tax. Postage rates for delivery of the IHMSA News outside the U.S. (except Canada and bulk delivery to the Brazilian and New Zealand Directories) are:

(Choose one) All First Class - $55.00**
Surface Rates - $19.50**

(Choose one) Air First Class for Canada - $15.00**
Standard Delivery - $5.00

Make all payments payable to: IHMSA, Inc. (Membership & postage) must be made in U.S. funds

Please print clearly, your delivery is depending on it!

If this is a renewal please fill in your IHMSA Number:

Diary of My First IHMSA World Championship

by Richard Slaton

Editor’s Note: For those who know Richard Slaton of Tuscaloosa, Alabama, you already know the outgoing personal-

ity he brings with him anywhere he goes. Having shot IHMSA for just a few years now, Richard participated in his first World Championship this July. Knowing how detailed he is in his continued efforts to improve as a shooter, I asked him to con-
der what he would see that the targets and some-
time confusing mix of letters and numbers that I didn’t understand. So, I get the feeling that the 2nd target didn’t fall. The 2nd target didn’t fall, which is a malfunction, and that I could have an aliquot. So, this let me feel somewhat better—until I read the alibi shot, I did the target but because of the distance that is just a little bit lower. I shot the alibi before the “FIRE” command, so did not count.

The next target was a small Briney with Joe Frey as my spotter. I shot the sighter’s missing low on the pig and getting center hits on all the others. I re-shot the pig and center punched it the second time around. I was shooting the 2nd bank of four bank and the second the 1st bank of four and I decided to use the cleaning. I cleaned four banks of chicken and the first two of the pigs. The first shot on the 2nd bank of pig was a no show because it missed. Finally, I cleaned four bank and then cleaned four.

On the turkeys I cleaned the first 2 bank of those four and I cleaned them all the way down to the second time. I had to use the cleaning. I cleaned four bank on the second turkeys because of the second one, so now I’m down 4 shots heading into the range. I hit high on the first ram, then overa-

c checked the second one and the next one, so now I’m down 4. I missed the first ram on the last bank, so I finished 5 down for a 28-90, which converts to a 37 which has my highest score.

I had a blast on this first day. I got to hang out and spot with the Frey brothers and spent a lot of time with Allen Gaskin, and met a lot of people. David Smith spotted for us for 4th-place and told me how that. I got to watch Dan and the California crew do their thing. I’m pumped up about the fun I will have tomorrow. Up next for tomorrow—USAFS in the a.m. and SB in the p.m.

Day 2—Monday July 21:

I started with SB USA and because of all the problems yesterday on the chicken course, I decided to use the yellow bank. The line officer agreed as he was nervous, so the yellow bank was my only option, so I knew I would have to use the yellow and red banks to have 5 targets to shoot.

I cleaned the chickens and missed one pig. Then the turkeys ate my lunch! But I got up with a 70 USAFS, which con-

verts to a 35, which is a new high score for me, so I’m with this score, a happy camp-

er.

Next up—Small Bore USA. I was cleared through the 2nd bank of turkeys, missed two of those distant turkeys, then finished by cleaning the rams. A SB USA score of 78, which is a 39 converted is not bad for a “junior” shooter, I was a happy camper once again.

I had a fun day. Spent time with Jackie and was on the line with John And-

derson. After the match, the Frey family and the Slaton family went to Pop’s for the second birthday of the Slatons’ baby, born last month. A birthday followed by dinner with Allen and his family. It was a great day for our com-

pany. Fun day! Tomorrow—SB stand-

ing in the a.m. and SB production in the p.m.

Day 3—Tuesday July 22:

Well, the heat is here, but that is no ex-

cuse. Starting off with SB standing. I shot 84 and I scored 85. I shot the 84 and then the 85. Started off badly, and without a spotter, I just never recovered. I was on the line with Christopher John and Steve Martens (who made my sights). John was asking me how I liked the Martens set-up—I told him I was sold on them, but today they were not miracle workers!

After adding up my score, I was writing the total on my score card. A guy leaned over and said, “Oh, are we supposed to convert it to a 40 round score?” I looked at him, and replied, “No dude, 31 is my 80 round score!” I thought Joe Frey was going to get his pants laughing. Once again, this is just stuff that can’t go unma-

ked up. I added the 50 scores. I was not the only one that pointed this out. A guy leaned over and said, “Oh, are we supposed to convert it to a 40 round score?” I looked at him, and replied, “No dude, 31 is my 80 round score!” I thought Joe Frey was going to get his pants laughing. Once again, this is just stuff that can’t go unma-

stor today was a record-setting day. I may-

be tied or set a new low SB US score, and did set a new low SB standing score for me. And thanks to Jackie Brown for bas-

ing me out on the BB standing or it could I seen a few at that time for a World Cham-

pionship! But on a good note, today was the last of 2 days of shooting stand-

ing and today was the most fun I have had!

I spent time on the line with Richard and Jane from South Dakota at their range in Sweetwater, TX. I also spent time with the Bakkens, a super nice couple from Canada, and a host of others that I did not always catch their names. It is always a good start when you’re greeted by the always-smiling Jackie Brown and John Anderson. The weather was a great 101 degrees in the shade with 90% humid-

ity, making it just like being at home.

Day 4—Thursday July 24

Well, it is all over but. And yes, it was a blast. This day, Arizona won the first gun, but Oklahoma won the second. I started the day with US HS and was clean until…you guessed it, the turkeys. I went 15/20 on those. Got back on track on rams, going 14/20 and finished with a 73. That equals 35.5 for a new high score for me and put me in 1st at AA USAHS, so I was pretty happy with that.

The second gun, BB USA (same gun) finished my first World Championship just like I had a few days ago—another second. I shot myself in the foot. And I did a great job at that. Let me just put it this way—

I was 79 seconds, knocked over 79 targets, and my score was 75. I will leave the rest to your imagination.

Either way, I shot 10 guns, had 2 new personal best scores, and tied two other high scores, so I was somewhat pleased with the way I shot. I had a lot of fun spending time with Mr. Fields, Jackie Brown is top notch, I got to spend time with an old friend and meet some super new ones.

But the main thing I learned from this match is that the World Championship is no green monster. There is no reason for a new shooter such as me to be intimidat-

ed. There are some things in this game that fly in the ointment is what causes excitement.

Would I ever go to another World Championship? I hope to, but not every year. Would I ever go back to OKC? In a heartbeat! Of course, all of this is solely a reflection of my personal experiences that are just

Finals to Note:

- 2 guns a day was the right call—no more.
- Shooting BB Unlimited or half-scale unlimited would have been more fun than shooting SB USA
- It’s you’re lucky and get a spotter, dis-

inspect what you need to hear and what you don’t need to know. Something for me to be kept in mind is that I can be on the correct target and I can be given the right directions, but the amount of time that I need to keep ME on the correct target and let me know of any shot trend-

- All my shooting standing shots trend-

- My shooting skills (that was my range) was not a problem with free style.
- Put felt tip pen writes better on score cards than bath point!...
The New Silhouetter

By Ken Horowitz

The imagination of target manufacturers is highlighted in the continuing flow of new targets from Birchwood Casey. Whether shooting for score, measuring groups, practicing for a match or just having fun plinking, Birchwood Casey seems to have something for everyone and keeps adding to its repertoire.

Most recently, I’ve tried three of Birchwood Casey’s Eze-Scorer 22” x 35” targets. One is a two bullseye target, one is a 6 bullseye target, and one is a “52-Card Shootout.” The advantages of these targets include the sheer size and the number of bullseyes or shooting points per target. Our target boards at Falls Township Rifle and Pistol Association are the typical 24” x 38” that are found in many ranges. The Birchwood Casey targets utilize the full 22” x 35” sheets that I saw millions of passing through sheet-fed presses when I was in the printing business. By the time these sheets are stapled to the target boards, that “1” difference disappears and the shooter gets full utilization of the entire backer board.

For open sight practice, I like the two bullseye version, vertically positioned, time downrange. The “52-Card Shootout” can be set up for a full day’s range shooting, especially with a well sighted and aimed 22LR. There are actually 56 cards per sheet, including all the cards in a full deck, two Jokers and two additional targets. Each separate card has multiple shooting points. For example, every suit has two symbols for that suit (spade, heart, club or diamond) plus the center point of the card. I’ve yet to use a full sheet at one range visit.

While the two bullseye targets are more practical for competition practice, the “52-Card Shootout” brings back fond memories of the use of playing cards for targets when I was in my youth. My friend Tommy and I would have contests on who could completely remove all the red diamonds from a card similar to some boardwalk gallery games. The difference was that we really aimed rifles that shot fairly well instead of the virtual rifle and pray of the beat up 22 shorts or BBs that they usually had at the boardwalk.

At the then spectacular distance of just 21 feet, we were always both successful in achieving a ragged hole with all white around it, having completely removed the red. The only contest was who did it first and the winner/loser changed just about 50-50. Reporting the results was always fun. When asked by other friends how we made out, even if Tommy won I could always say I came in second place and Tommy was next to last! For the past 20 years or so, I don’t recall shooting anything at less than 25 yards nor have I kept in touch with Tommy, but it would be interesting to try clearing the red at the greater 25 yard distance. I suppose I could get one sheet of “52-Card Shootout” to last a very long time.

Birchwood Casey just announced three new targets in its Ground Strike line. I’ve previously written about these types of reactive targets made from a firm resin material that almost seems to heal itself. These targets are pounding with all kinds of fodder including 22RL, pistol and rifle cartridges. Two of the items that keep the way to me are “dancers” where the target is held on a spring like base to wobble back and forth upon being hit. The third Ground Strike is its Hex Ball Target that is free to spin, fly and dance wherever it pleases. It seems to have more rocks and crannies than the previously tested Ground Strike led targets. The indentations and cutouts ensure that every shot will result in its own particular reaction. I can’t wait to get my hands on these new offerings from Birchwood Casey.

Returning to one of the threads in last month’s column, I’ve been having my CMP match at my new 200 yard standard instead of the 100 yards I have been using for the last couple of decades. It makes not my personal best using my Garand, I have now shot my highest score in over five years, more or less confirming my comfort with the 200 yard sight picture over 100 yards. This also points out the benefit of keeping some sort of records to verify that what you are thinking is true (or debunking it if that is the case).

I expect the same positive result when I eventually return to shooting my Bushmaster A2 at 200 yards in lieu of my 100 yards to date. The Bushmaster, being a tight target rifle will always outscore the rack grade Garand, but right now I’m having too much fun with the battle rifle. While the 30-06 uses considerably more powder and bullet weight than the 223, as long as I can get supply, it will remain fun.

I’ve had some time to play around with the new Hodgdon Reloading Data Center. I was so used to the mechanics and protocol of working the previous Data Center version that I am good to myself when things weren’t the same. Well that changed quickly as I saw how to navigate the new site and get on screen companions of much more data than in the previous version, including the ability to get up to four different cartridges for companions on tabs. I actually do a lot more “flat screen reloading” than I do at the bench. Besides satisfying my own curiosity, when I do go to the bench, it’s with purpose and a plan as to exactly which of my components and recipe I will use. Drawing my passion for the hobby, I find less and less time to stand at the bench so tools such as the Hodgdon Reloading Data Center pay off big-time for me.

Hodgdon recently announced its launch of the first professionally produced how-to videos on its Reloading Data Center. The videos cover rifle, pistol and shotshell reloading basics in an easy to use step-by-step format. Recognizing the current vogue of using hand-held devices, the videos are compatible with smart phones and other devices. When I first went to the Reloading Data Center to view the videos, they did not jump out and hit me in the head. Although they were hiding in plain sight, I had to scroll down and pay attention until I saw them. It must be the male “Where’s the milk?” syndrome as we stare into the refrigerator waiting to be beated as our spouses point to the container within inches of our face. Anyway, these
Looking for a New Silhouette Challenge? Try 500 Meters with a Handgun!

by Joe Frey

I can still remember vividly the first time I tried to shoot a silhouette 10 years ago—those 200 meter rams looked so far away and so small. I would see people shooting 200 yard rams and wonder why they wouldn’t get to that point with a scoped gun, and to think about hitting 40 with open sights didn’t even cross my mind.

So here I was years later, getting ready to try something new—a new silhouette match. The 2014 World Championship had just ended the day before, and I had decided to throw myself into the match at least to see if I had enough ammo—which I did have 45 cartridges left in my open sight unlimited 6-Ton rifle. I had no idea what to expect, I never had shot past 500 meters, but I had just enough ammunition left to run the course.

I had thought about doing a 500 meter match on a few occasions, but I always found a good excuse not to. It seemed pretty intimidating shooting at standard silhouette targets at those extreme distances, and after my range only goes out to 200 yards, there was never a way to even shoot paper at such lengthy distances.

Anyhow, for me, Gary Closs of Oklahoma generously brought a scoped XP-100 with ammo for me to try, conveniently chambers of choice for the 500 meter unlimited gun. It was set up for shooting out of the flip with an 18x 10kon scope—I shoot my small BASS gun out of the flip with a 3x 9kon scope.

New Practical Hunter "Options" Implemented

At the annual board meeting, a new option was added to the Practical Hunter category.

Previous rules allowed a shooter to use a rest, such as sandbags or a bipod until recently. The only draw backs were to shoot out of the Creedmoor or other positions just like any other freestyle event. However, with many new or younger shooters (which is what Practical Hunter is a description of), they reach AAA pretty quickly, but not yet be experienced enough behind the trigger to feel comfortable having the end of their barrel close to their leg. Or in the case of some younger shooters, they may not have the arm strength to hold the gun steady in that position.

So now the shooter has an option of a bench rest or a bipod. The shooter can then use a freestyle position and continue shooting on the full size targets, just as before. However, there is a 15 minute grace period to set up on the sandbag or bipod—but if the shooter chooses to continue using the sandbag or bipod once reaching AAA or INT sta- tus, they have to shoot the course on Fifth-Scale or Half-Scale targets.

If the shooter chooses a bench rest, they will aid those less experienced shooters in that they aren’t forced to shoot in a position they may be uncomfortable with and give them the benefit of focusing on key aspects of shooting, such as breathing, picture, trigger control, etc. They will also experience the great satisfaction of hitting those tiny targets—there is noth- ing cooler for a newer shooter than seeing that first Fifth-Scale chicken go flying.

So for those ready to shoot out of a freestyle position, there is an advantage for them, in that they have the opportunity to compete full size targets to shoot at. This advantage will serve as an incentive for shooters to begin experimenting with free- style positions as they become ready for it, which will then open up many other shooting positions as well.

This new option applies to 2 of the 3 Practical Hunter categories—the Long Range PH (shot on full-size Big Bone targets) and the 22 Practical Hunter (shot on standard 33 targets). Thus, Long Range PH shooters will now have the option to use support on 5 scale targets, and 22 PH shooters would have the option to use support on Half-Scale targets. For the Short Course PH (shot on Field Pisto targets), there is no such option available, since only one size of Field Pisto targets. In addition, some ranges may not have Half-Scale or Fifth- Scale targets. Obviously this option wouldn’t be available at those places.

For those who may not be familiar with Practical Hunter, the basic parameter is a such—maximum overall length is 21 inches, optics are allowed up to 4x, and they take into account atmospheric modifications. For more detail, see the Rules Addendum on the IHMSA Bul- letin Board. The third month’s edition of this month’s IHMSA News.

New Silhouettes... Continued from Page 6

short few minute videos are a great way to share the testing process to someone new to the hobby.

In addition to the new videos, the Re- loading is Testing section of the information section for beginners (and others) on safety procedures, frequently asked questions, and troubleshooting.

This free web source is a credit to Hodgdon and I encourage you to take advantage of this quick peak and I sure you’ll be impressed.

MARKSMANSHIP COMPETITIONS

The Burritt Cup:
Cocked .22 Long Rifle caliber handguns only. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a Ransom Rest, vise, or any other mechanical clamping device. Lying on your back in a freestyle position and piling sandbags by your body for support is legal. This will allow scoped guns set up for creedmore to better compete.

The Weaver Trophy:
Cocked centerfire handguns. Your best 5-shot group at 100 yards or meters. Guns may be bench rested over any solid rest as long as the gun is not in a Ransom Rest, vise, or any other mechanical clamping device. Lying on your back in freestyle position and pile sandbags by your body for support is legal. This will allow scoped guns set up for creedmoor to better compete.

The merit Challenge:
Centerfire handguns with iron / open sights. Your best 5-shot group at 100 yards or meters. Groups must be fired from an IHMSA legal freestyle position. No benchrest or artificial support allowed.

The Daisy Avanti Trophy:
API Production guns with Iron/Open sights. Your best 5-shot group at 18 yards. Groups must be fired from an IHMSA legal freestyle position. No benchrest or artificial support allowed.

General Rules: All entries must be shot with IHMSA legal guns. Production, Revolver, and Unlimited guns are allowed in the Burritt, Weaver, and Mark classes.

Witness: Winning groups must be witnessed by an IHMSA or NRA member. Eligible winning targets must be signed and dated by the shooter and witness. Also, please include the shooter's IHMSA number and the witness's IHMSA or NRA number by their name. A witness is not required to enter but is required to win.

Targets: Targets submitted must contain no more and no less than 5 shots in each bull zone.

Marksmanship Program
No new scores submitted this month. Bob Smith is still holding on to that top spot with a sub-.1/2 inch group out of his .22-255. We're starting to see components make their way back to the shelves a little more than for the past couple of years or so. Hopefully, if you are like me and have some new toys to experiment with and have been held up due to the lack of access to certain bullets and/or powders, we'll all be back in business soon! Until next month, be safe.

Weaver Trophy Standings:
Name Group GunCaliber Witness
Bob Smith (CO) .471" .22-250 Yes
Bob Smith (CO) .692" .22 Yes
Timothy Montgomery (UT) .752" .30 Carbine No

Timothy Montgomery (UT) 800" 22 K Hornet No
Timothy Montgomery (UT) 800" .224 Montgomery No
Timothy Montgomery (UT) 1.034" 7 TCU No
Joe Frey (CO) 1.121 .300 Whisper No

Targets can be sent to the address below. If you desire to have targets back, I can certainly return them to you. Be safe.

September 2014

IMHSAA NEWS - SECTION B
**Big Bore Records**

By Joe Cullison

Pretty slow this month but the scores that came in were excellent.

Steve Martens (MN) had an excellent match at the Region 8 Championship. Steve shot a 5-58, P-40, R-40, and A-40 for a 3-gun 108 and a 4-gun 148. Nice shooting Steve. This also adds 2 entrees toward the state race for MN.

Eric King (CA) shot a great match at the Internationals scoring a 5-56, P-79, U-79 and R-74. These scores convert to a 3-gun 106 and a 4-gun 143. This raises Eric’s 3 gun and gives him an entry into the 4-gun category. This also gives California the lead in the state race.

There may be a few more scores from the World Championships. Please send your scores to me and I will get them posted.

State totals for 2014 are: CA-5, OR-5, MN-4, OH 3, SC-2, TX-2, WA-1

Please bring at least one friend or acquaintance to every match. Together, we can keep IHMSA growing.

Please forgive me if I have left out anyone of much or fewer errors. Send me the information and I will make it right as soon as I can.

Send requests for your support of the BSBR.

Send entries to:

By Al Kuenn

We had a bit of a slow month with only one Pa 30 and a Joe Lipp shot a 29 Prod, then a 34 Pas to post a 63. He also posted the same aggregate during a June 14 match with a 63 PAS and a Pas 31.

Nice shooting Joel!

Shoot well and often.

**Half-Scale and Fifth-Scale Records**

By Jim Harris

We’ve got the latest results including the top shooters from the IHMSA Internationals! Congrats to the following outstanding shooters in the 80-round championship in Oklahoma.

Half-Scale 80xUASHS: John Weaver (Champ), Steve Martens, Scott Thompson, Bob Doherty, Joe Cullison and Gary Cress.

Fifth-Scale 80xUASHS: Gary Liddell (Champ) and Russel Pliake (155). Honorable mention to Woody Liddell for his outstanding 79x80 in Fifth-Scale open.

Please let me know of any corrections or additions to these records. I made a number of corrections to existing records listing, notably Woody Liddell did not have a Half-Scale Open Sight 40x40 it was actually a Fifth-Scale Open Sight perfect score 217.

Send your records reports to me at harripg@earthlink.net, or my home address: 1507 Bridge Ave, Simi Valley, CA 93065. Or give me a call at (805) 581-0009.

Ascension Silhouettes

May 4, 2014

by Charlie Braud

We were able to get in our second match of the year, Sunday May the 4th, Husband and wife team Wll and Brenda Kirade made the long drive to see us today. Brenda had previously not even intended to shoot but after finding out that Wll had secreted her gun into the Suburban in case she was going to need it, she decided to give it a try. She really enjoyed herself as she was surprised to find that she was better than expected. She got enough to best Wll by two targets. Wll in turn was pleased to have come the old eye and got a 40x40 in Unlimited. This is the first time I’ve been able to do this in over two years. My brother Phil was also able to notch yet another 40x40 in UHAS with his flop Ruger Charger in spite of the fact that he was walking wounded (allegedly).

Today I attempted to sight in my PAS 22 Hornet as I went. This was a new rocket bullet load which had bentic tested very good. The problem...
was the sight settings were very far off from my jacketed loads. I did manage to salvage a 2700 yard 7X10mm match this year."

Thursday, August 3, 2017

August 3, 2017 was light attended with only 4 hangon shooters. We did have an additional 6 Cowboy Lever Action rifle shooters to help keep the line full. Phil Gaspar continued his domination of UAS with his Ruger Super Blackhawk. Paul Lasch was able to lead the pack in UPS with a 38x40 using his High Standard Svoogke. Jack Hull had a couple of solid rounds. The rifle shoot was instigated by the Missporers but I don’t have those scores. Thanks to all who stayed and helped pick up the targets and stands. We hope to see you all throw up late in the season."

* * *

**Match Publication Policy**

As we continually update our match directories, following is the IHMSA News policy on publication of state, regional, and “specialty” riot notices and match results.

**Any IHMSA sanctioned club in good standing may publish a notice of their club’s state, regional, or specialty match. No charge for these notices.**

**Regional match notices are limited to 2 1/4 x 5."** Regional match notices are limited to 4 3/4 x 5." if a club wishes to publish a "specialty" match and that match does not replace one of these championships, the club may publish a 2 1/4 x 5." notice. These notices will run in Section B only. The club may publish additional notices of the same event as many times as desired. Adds must be rubberized before printing. All payments are to be sent to IHMSA HQ, P.O. Box 22356, Cheyenne WY 82003. The club may specify whether the paid notice is published in Section A or B. IHMSA sanction state match results can list first, second, and third place finishes. "Specialty" matches may list first, second, and third place finishes. IHMSA sanction state championships may publish first and second place finishes. "Specialty" matches may publish first and second place finishes. IHMSA publications do not exceed the number of published IHMSA results. **Publication is limited to IHMSA sanctioned handgunt discipline only.**

Any questions concerning this policy to your Regional Director.

**JULY 13, 2014**

by Bob Curry

Nice weather for a July match, but I predict we’re going to get rain before too long. I sure miss those 160-degree days, with high 90s and muggy. It’ll be to our benefit, too. I’d like to welcome all of our competitors that all helped out at the match. See you next time for more shooting.

Our April match was about weatherwise, a little windy but all-in a good day to shoot. We had a good match this month with 34 guns and 30 total entries. As our target setters did a great job, thanks to everyone who helped with the match. Only 4x40’s were shot in this match.

Final Farewell - LEFT THE RANGE
Larry Allenbaugh

Lawrence Roy Allenbaugh, 65, died peacefully in his home, surrounded by his family. Larry was born on August 6, 1948 in Marysville, CA and grew up and attended schools in Sutter, CA. After high school, he enlisted in the U.S. Army and served in Vietnam and Germany. After his discharge from the Army, he went to college and graduated from Fanta College in Marysville, and then began his career in Radiology at Ran- ding Memorial Hospital, Fudding CA and the University of California at Davis Medical Center in Sacramento, CA where he spent the remainder of his life. His love of fishing and the great outdoors eventually brought him to Pocatello where he worked at Pocatello Regional Medical Center as the Coordinator of the Cardiac Cath. Larry attended Physician Procedures Lab. Additionally he continued to work for the Inter- mountain Health Care as a radiation safety consultant.

Larry enjoyed hunting, fishing, and anything to do with the outdoors. His pride and joy were his children Derek and Kris, and his granddaughter Ciana.

Larry was a leader in the creation of Pocatello’s first shooting range open to the public, Oregon Trail Shooting Range, and the establishment of the Gate City Gun Club, serving as President for many years.

Larry was an avid supporter of IHMSA. He never missed a match in Jerome Idaho Falls.

Larry was dearly loved by his family, friends, and co-workers. He will be missed by all who knew him. Condolences may be sent to the family online at www.coloradou- nion.com.

WYOMING

CHEYENNE, WYOMING

Cheyenne Rifle and Pistol Club
July 12, 2014
by Dave Smith

We had a nice turn out today with 24 entrants crossing the line, and a lot of good shooting being done as some of our Region 6 members are putting in their final preparations for the World Championships.

Russell Plasse had a few shooting day, getting it in 6 entries, including firing a 28 in Field Pistol, a 4404 in the Small Bore Unlimited, a 36 in Production, and a 36 in Unlimited Fifth Scale.

Trocy Fryer jumped into 11th class in Small Bore Revolver, shooting a 38 with his Freedom Arms. Joe Butler also had a 37 in Small Bore Unlimited, another sold score.

Joe Butler continues to knock on the door of perfection—leaving a turkey to get a 39 in Small Bore UAS. His previous 39 left the 10th ram standing, so at least this one didn’t hunt as bad as that. The key has been shooting that 40-40 now for over—keep it up, Joe.

Anthony Butler was seen with his girlfriend Melissa. Anthony got several sold entries in, both in freestyle and standing categories, and continues to impress into becoming a very good all-around shooter.

A big thanks goes out to Neil Allen and Sherr Johnson as they were able to stop a couple of guns in as they travelled through on the way to Denver for this event. It is great to see people include IHMSA into their travel and family plans.

Thanks to everyone for help with set up and take down—we both had a worming day time. Good luck and safe travels to everybody heading to OKC for the World Championship.

State Championship Matches

REGIONALS

IHMSA Creates People of integrity
The Big Matches Are Far From Over

For many sports, the “playoffs” or “championship” signifies then end of that sport’s season. People take a break, rest up, and then start planning for next year. Fortunately for us in IHMSA, that is not the case.

Whether you were able to attend the World Championship or not, the bulk of the IHMSA shooting year is far from over. This fall’s IHMSA schedule has many championship matches on the slate.

The month of September is loaded with many state championship events, in areas scattered all over the country. These championship matches include:

- Los Angeles Extravaganza—August 30-Sept. 1
- Georgia—Sept. 26-28
- Kansas (Small Bore & Field Pistol)—Sept. 6 & 7
- Minnesota (State Half Scale on Sept. 13, State Small Bore & Fifth Scale on Sept. 19-21)
- Nebraska—Sept. 18-21
- South Carolina (Small Bore & Fifth Scale)—Sept. 13 & 14

240 Entries is Top Regional/State Shoot So Far—Will It Hold?

by Joe Frey

There have certainly been some significantly attended matches this year. Aside from the World Championship, which by my memory had 566 entries, there have been several events which have had triple-digit entry counts. If my memory serves me correctly, here are the top-attended IHMSA Region/State matches thus far.

1. Region 8 in Pringle, South Dakota—240 entries
2. East Coast Championship, Lawrenceburg, Kentucky—223 entries
3. West Coast Championship, Grants Pass, Oregon—215 entries
4. Oklahoma State Championship, Oklahoma City—158 entries
5. Arizona State Championship, Boulder, Arizona—153 entries
6. Idaho State Championship, Idaho Falls, Idaho—152 entries

There are a few shoots left which may break into these ranks, with a couple that are almost certain to. The LA Extravaganza is an event which I have not attended (as of yet, at least!), but it sounds like it is a crazy good time. The South Dakota State Championship is usually in the 150+ entry range, and located in one of the most scenic areas of the country. Both of these matches are held over the Labor Day weekend, making for a good “end of summer” experience.

But the one event that probably has the best chance of possibly taking the “bragging rights” for the year and knocking the Region 8 Championship out of that top spot of 240 entries may be the Region 4 Championship, held on October 3-5 at the Oklahoma City Gun Club. Site of two of the past three World Championships, this is one of the premier silhouette ranges in the United States.

If you were somebody who wasn’t able to attend the World Championship, but would like to experience a shoot with world-class competition at a much more affordable price than the World Championship, the Region 4 Championship is the place to be. A mere $95 gets you all the shooting you can handle for three days. All categories of IHMSA shooting can be had here, including indoor air pistol and a 500 meter match. Many of this year’s world champions will be in attendance at this match, and it is open to any shooter whether you live in Region 4 or not, so it provides one last opportunity in 2014 to see how you stack up with some of the top IHMSA shooters.

It has been an exciting year of silhouette shooting thus far. Hopefully your personal schedule allows for one more chance to attend one of the many state or regional matches left on the 2014 schedule.
Paraguay’s attendance at the IHMSA World Championships has been greatly appreciated the past few years. Luis Brittz (left) and Sebastian Gorostiza (center) share a moment with Joe Frey of Colorado.

Carroll Plante of Sierra Bullets was on hand to get in some good shooting.

Jackie Brown was able to take an occasional break from running the line to get a little shooting in.

Ryan Schuff was able to celebrate more than just fantastic shooting. He officially became a teenager during this match!

The volunteer help from OKC Gun Club members was tremendous.

IHMSA is Growing, Because of…

by Joe Lipp

Hello Silhouette Shooters, my name is Joe Lipp and I am the Wisconsin IHMSA State Director. Last week I called Joe Frey, our IHMSA paper editor to request some score cards for a new club we are getting started here in Wisconsin and he suggested I write an article on the club to use in the “IHMSA is Growing Because of” section in the monthly paper. Well, I am not a writer but I will do my best. The official name of this club is “Town of Washington, Cecil Game & Fish Club”.

The club was formed about 50 years ago and I have been a member for about 10 years. In recent years the club was declining in to rather poor condition with much needed work to the club house and the grounds. I offered to try to get the club going in the right direction and was given the support of the few remaining members.

First, we cleaned up the facilities and finished the club house that was never completed. Second, with the help of my sons, nephew and a couple club members, we built a cover over the shooting line. Then, Paul Frank, a good friend and long time Silhouette shooter offered the club a set of .22 and Field Pistol re-settable targets.

Last month we held our first unsanctioned match just to try out the targets and facilities. Everything went pretty good and now we are ready to start hosting sanctioned matches on September 13th and October 11th. Due to a lot of hard work and the help of several people we now have another club here in Wisconsin to enjoy Silhouette shooting. We now have four (4) established clubs hosting IHMSA matches here in Wisconsin. So, I think Silhouette shooting is secure for years to come.

Editor’s Note: This is the second month in a row the IHMSA News has been able to report on a new range shooting IHMSA sanctioned matches! A huge congratulations goes out to Joe Lipp and all of the people who made this new range come togetherness put forth by so many of our IHMSA membership truly is admirable.

World Championship Funnies

As with any event in which you get good folks and friends together, there are always humorous things that happen or are talked about. I would like to invite anyone who had an interesting item from the World Championship to please share it with me, thus I can put it in the next issue and share it with all of our members.

I’ll start us off with the top 3 things I overheard at this year’s World Championship. Knowing the good nature of all three of these people, I don’t think they will mind me sharing these tid-bits.

1. Richard Slaton of Alabama mentions this in his article, but I’ll throw it in here as well. Richard had just finished a less-than-satisfying standing event, and he added up his final score and wrote it on his card. Another shooter glanced at his card and asked something to the effect of, “Oh, are we supposed to convert our scores to a 40 round equivalent?” The ever-affable Richard could only smile and say, “No, that’s my actual score!”

2. Russell Plakke of Colorado was looking at his hits through the spotting scope, when he mentioned to the shooter next to him, “You’ve got some nice tight groups on your targets...a-ma-zin’ math-matics!”

3. And finally, Carroll Pilant of Missouri was shooting at the rams in Bondelio, which anyone who has shot Borrello knows what a task that is. I was shooting field pistol next to him, squeezing the trigger and anticipat- ing the gun to go off at any moment. Right then, I heard his spotter say, “You hit a tree!” Needless to say, I missed my shot too.

Email me at ihmsaditorjoep@gmail.com or give me a call at home (970-667-4968) if you have anything you would like to share and think would be of interest to others. Knowing the great time I had at that 8-day event, I’m sure there are a lot of other great stories out there.

World Championships - this what makes world championships - - people working together, sharing stories, caring for each other, having fun.

Precise Case Trimming Without Measuring.

The E-ZEE Trim™ Case Trimmer

NEW!

Factory pre-set, trim-to-length pilots assure precise case length with any popular shellholder. Installed on the system’s hand operated cutter head, the pilots stop the cutting action at the correct overall cartridge length. In addition, a power adapter is included for use in a standard electric drill to speed case trimming.

- Pistol 6 Pilot Multi-Pack Set: .9mm, .38 Spec., .357 Mag., .40 S&W, .44 Mag, .45 ACP.
